TRANSNATIONAL ISSUES

Disputes—international: Eritrea and Ethiopia agreed to abide by the 2002 Eritrea-Ethiopia Boundary Commission's (EEBC) delimitation decision, but neither party responded to the revised line detailed in the November 2006 EEBC Demarcation Statement; the undemarcated former British administrative line has little meaning as a political separation to rival clans within Ethiopia's Ogaden and southern Somalia's Oromo region; Ethiopian forces invaded southern Somalia and routed Islamist Courts from Mogadishu in January 2007; "Somaliland" secessionists provide port facilities in Berbera and trade ties to landlocked Ethiopia; civil unrest in eastern Sudan has hampered efforts to demarcate the porous boundary with Ethiopia

Refugees and internally displaced persons:

refugees (country of origin): 243,824 (Somalia); 136,284 (South Sudan); 84,271 (Eritrea); 40,781 (Sudan) (2014)

IDPs: 200,000-300,000 (border war with Eritrea from 1998-2000, ethnic clashes in Gambela, and ongoing Ethiopian military counterinsurgency in Somali region; most IDPs are in Tigray and Gambela Provinces) (2008)

Illicit drugs: transit hub for heroin originating in Southwest and Southeast Asia and destined for Europe, as well as cocaine destined for markets in southern Africa; cultivates qat (khat) for local use and regional export, principally to Djibouti and Somalia (legal in all three countries); the lack of a well-developed financial system limits the country's utility as a money laundering center

EUROPEAN UNION

INTRODUCTION

Background: Following the two devastating World Wars in the first half of the 20th century, a number of European leaders in the late 1940s became convinced that the only way to establish a lasting peace was to reconcile the two chief belligerent nations—France and Germany—both economically and politically. In 1950, the French Foreign Minister Robert SCHUMAN proposed an eventual union of all Europe, the first step of which would be the integration of the coal and steel industries of Western Europe. The following year, the European Coal and Steel Community (ECSC) was set up when six members, Belgium, France, West Germany, Italy, Luxembourg, and the Netherlands, signed the Treaty of Paris.

The ECSC was so successful that within a few years the decision was made to integrate other elements of the countries' economies. In 1957,

envisioning an “ever closer union,” the Treaties of Rome created the European Economic Community (EEC) and the European Atomic Energy Community (Euratom), and the six member states undertook to eliminate trade barriers among themselves by forming a common market. In 1967, the institutions of all three communities were formally merged into the European Community (EC), creating a single Commission, a single Council of Ministers, and the body known today as the European Parliament. Members of the European Parliament were initially selected by national parliaments, but in 1979 the first direct elections were undertaken and have been held every five years since.

In 1973, the first enlargement of the EC took place with the addition of Denmark, Ireland, and the United Kingdom. The 1980s saw further membership expansion with Greece joining in 1981 and Spain and Portugal in 1986. The 1992 Treaty of Maastricht laid the basis for further forms of cooperation in foreign and defense policy, in judicial and internal affairs, and in the creation of an economic and monetary union—including a common currency. This further integration created the European Union (EU), at the time standing alongside the European Community. In 1995, Austria, Finland, and Sweden joined the EU/EC, raising the membership total to 15.

A new currency, the euro, was launched in world money markets on 1 January 1999; it became the unit of exchange for all EU member states except Denmark, Sweden, and the United Kingdom. In 2002, citizens of those 12 countries began using euro banknotes and coins. Ten new countries joined the EU in 2004—Cyprus, the Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, and Slovenia. Bulgaria and Romania joined in 2007 and Croatia in 2013, bringing the current membership to 28.

In an effort to ensure that the EU could function efficiently with an expanded membership, the Treaty of Nice (signed in 2000) set forth rules aimed at streamlining the size and procedures of EU institutions. An effort to establish a “Constitution for Europe,” growing out of a Convention held in 2002-2003, foundered when it was rejected in referenda in France and the Netherlands in 2005. A subsequent effort in 2007 incorporated many of the features of the rejected Constitution while also making a number of substantive and symbolic changes. The new treaty, initially known as the Reform Treaty but subsequently referred to as the Treaty of Lisbon, sought to amend existing treaties rather than replace them. The treaty was approved at the EU intergovernmental conference of the 27 member states held in Lisbon in December 2007, after which the process of national

ratifications began. In October 2009, an Irish referendum approved the Lisbon Treaty (overturning a previous rejection) and cleared the way for an ultimate unanimous endorsement. Poland and the Czech Republic signed on soon after. The Lisbon Treaty, again invoking the idea of an “ever closer union,” came into force on 1 December 2009 and the European Union officially replaced and succeeded the European Community.

Preliminary statement: The evolution of what is today the European Union (EU) from a regional economic agreement among six neighboring states in 1951 to today’s hybrid intergovernmental and supranational organization of 28 countries across the European continent stands as an unprecedented phenomenon in the annals of history. Dynastic unions for territorial consolidation were long the norm in Europe; on a few occasions even country-level unions were arranged—the Polish-Lithuanian Commonwealth and the Austro-Hungarian Empire were examples. But for such a large number of nation-states to cede some of their sovereignty to an overarching entity is unique.

Although the EU is not a federation in the strict sense, it is far more than a free-trade association such as ASEAN, NAFTA, or Mercosur, and it has certain attributes associated with independent nations: its own flag, currency (for some members), and law-making abilities, as well as diplomatic representation and a common foreign and security policy in its dealings with external partners.

Thus, inclusion of basic intelligence on the EU has been deemed appropriate as a new, separate entity in The World Factbook. However, because of the EU’s special status, this description is placed after the regular country entries.

GOVERNMENT

Union name: conventional long form: European Union

abbreviation: EU

Political structure: a hybrid and unique intergovernmental and supranational organization

Capital: name: Brussels (Belgium), Strasbourg (France), Luxembourg
geographic coordinates: (Brussels) 50 50 N, 4 20 E

time difference: UTC+1 (6 hours ahead of Washington, DC during Standard Time)

daylight saving time: +1hr, begins last Sunday in March; ends last Sunday in October

note: the European Council and the Council of the European Union meet in Brussels, Belgium; the European Parliament meets in Brussels and Strasbourg, France, and has administrative offices in Luxembourg; the Court of Justice of the European Union meets in Luxembourg

Member states: 28 countries: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, UK; note—candidate countries: Iceland, Macedonia, Montenegro, Serbia, Turkey

Independence: 7 February 1992 (Maastricht Treaty signed establishing the European Union); 1 November 1993 (Maastricht Treaty entered into force)

note: the Treaties of Rome, signed on 25 March 1957 and subsequently entered into force on 1 January 1958, created the European Economic Community and the European Atomic Energy Community; a series of subsequent treaties have been adopted to increase efficiency and transparency, to prepare for new member states, and to introduce new areas of cooperation—such as single currency; the Treaty of Lisbon, signed on 13 December 2007 and entered into force on 1 December 2009 is the most recent of these treaties and is intended to make the EU more democratic, more efficient, and better able to address global problems with one voice

National holiday: Europe Day 9 May (1950); *note*—the day in 1950 that Robert SCHUMAN proposed the creation of what became the European Coal and Steel Community, the progenitor of today's European Union, with the aim of achieving a united Europe

Constitution: none

note: the EU legal order, although based on a series of treaties, has often been described as “constitutional” in nature; the Treaty on European Union (TEU), as modified by the Lisbon Treaty, states in Article 1 that “the HIGH CONTRACTING PARTIES establish among themselves a EUROPEAN UNION ... on which the Member States confer competences to attain objectives they have in common”; Article 1 of the TEU states further that the EU is “founded on the present Treaty and on the Treaty on the Functioning of the European Union (hereinafter referred to as ‘the Treaties’),” both possessing the same legal value; Article 6 of the TEU provides that a separately adopted Charter of Fundamental Rights of the European Union “shall have the same legal value as the Treaties” (2013)

Legal system: unique supranational law system in which, according to an interpretive declaration of member-state governments appended to the Treaty of Lisbon, “the Treaties and the law adopted by the Union on the basis of the Treaties have primacy over the law of Member States” under conditions laid down in the case law of the Court of Justice; key principles of EU law include fundamental rights as guaranteed by the Charter of Fundamental Rights and as resulting from constitutional traditions common to the EU's states; EU law is divided into ‘primary’ and ‘secondary’ legislation; the treaties (primary legislation) are the basis for all EU action; secondary legislation—which includes regulations, directives and decisions—are derived from the principles and objectives set out in the treaties

Suffrage: 18 years of age; universal; voting for the European Parliament is permitted in each member state

Executive branch: under the EU treaties there are three distinct institutions, each of which conducts functions that may be regarded as executive in nature:

the European Council: brings together heads of state and government, along with the president of the European Commission, and meets at least four times a year; its aim is to provide the impetus for the development of the Union and to issue general policy guidelines; leaders of the EU member states appointed former Belgian Prime Minister Herman VAN ROMPUY to be the first full-time president of the European Council in November 2009; he took office on 1 December 2009 for a two-and-one-half-year term, renewable once; EU member state leaders confirmed Herman VAN ROMPUY for a second and final two-and-one-half-year term in March 2012; his core responsibilities include chairing the EU summits and providing policy and organizational continuity

the Council of the European Union: consists of ministers of each EU member state and meets regularly in different configurations depending on the subject matter; it carries out policy-making and coordinating functions (as well as legislative functions); ministers of EU member states chair meetings of the Council of the EU based on a six-month rotating presidency

the European Commission: is headed by a College of Commissioners composed of 28 members, one from each member country; each commissioner is responsible for one or more policy areas; the Commission's responsibilities include the sole right to initiate EU legislation (except for foreign and defense policy), promoting the general interest of the EU, acting as "guardian of the Treaties," executing the budget and managing programs, ensuring the Union's external representation, and additional duties; its president is Jose Manuel BARROSO (since 2004); the president of the European Commission is nominated by member state governments taking into account the results of the European Parliament elections and elected by the European Parliament; working from member state recommendations, the Commission president then assembles the "college" of Commission members; the European Parliament confirms the

entire Commission for a five-year term; the next confirmation process will likely be held in the fall of 2014

note: for external representation and foreign policy making, leaders of the EU member states appointed Catherine ASHTON of the United Kingdom to be the first High Representative of the Union for Foreign Affairs and Security Policy; ASHTON took office on 1 December 2009; her concurrent appointment as Vice President of the European Commission endows her position with the policymaking influence of the Council of the EU and the

budgetary influence of the European Commission; the High Representative helps develop and implement the EU's Common Foreign and Security Policy (CFSP) and Common Security and Defense Policy (CSDP), chairs the Foreign Affairs Council, represents and acts for the Union in many international contexts, and oversees the European External Action Service (EEAS), the diplomatic corps of the EU, established on 1 December 2010

Legislative branch: two legislative bodies consisting of the Council of the European Union (28 member-state ministers having 352 votes; the number of votes is roughly proportional to member-states' population, and 255 votes plus a majority of member states forms a "qualified majority" to pass a measure) and the European Parliament (766 seats; seats allocated among member states in proportion to population; members elected by direct universal suffrage for a five-year term); note—the European Parliament President is elected by a majority of fellow members of the European Parliament (MEP), and represents the Parliament within the EU and internationally; German MEP Martin SCHULZ from the Group of the Progressive Alliance of Socialists and Democrats (S&D) was elected in January 2012; the Council of the EU is the main decision-making body of the EU, although the European Parliament must also approve almost all EU legislation; the Parliament does not have the right to initiate legislation
elections: last held on 4-7 June 2009 (next to be held 22-25 May 2014)

election results: percent of vote—EPP 36%, S&D 25%, ALDE 11.4%, Greens/EFA 7.5%, ECR 7.3%, GUE/NGL 4.8%, EFD 4.3%, independents 3.7%; seats by party—EPP 265, S&D 184, ALDE 84, Greens/EFA 55, ECR 54, GUE/NGL 35, EFD 32, nonaffiliated 27, plus 18 "observers"; note—current seats by party as of July 2013—EPP 275, S&D 195, ALDE 84, Greens/EFA 58, ECR 56, GUE/NGL 36, EFD 33, nonaffiliated 29

Judicial branch: *highest court(s):* Court of Justice of the European Union (organized into Court of Justice, General Court, and Civil Service Tribunal; consists of 27 judges, one from each of the member states) note—the Court of Justice ensures that treaties are interpreted and applied uniformly throughout the EU, resolves disputed issues among the EU institutions, issues opinions on questions of EU law referred by member state courts;
judge selection and term of office: judges appointed for 6-year terms; note—the court can sit in chambers, in a "Grand Chamber" of 13 judges, or as the full court; General Court (a court below the Court of Justice)—27 judges appointed for six-year terms; Civil Service Tribunal—7 judges appointed for

3-year terms

subordinate courts:

Political parties and leaders: Confederal Group of the European United Left-Nordic Green Left or GUE/NGL [Gabriele ZIMMER]; Europe of Freedom and Democracy Group or EFD [Nigel Farage and Francesco SPERONI]; European Conservatives and Reformists Group or ECR [Martin CALLANAN]; Group of Greens/European Free Alliance or Greens/EFA [Rebecca HARMS and Daniel COHN-BENDIT]; Group of the Alliance of Liberals and Democrats for Europe or ALDE [Guy VERHOFSTADT]; Group of the European People's Party or EPP [Joseph DAUL]; Group of the Progressive Alliance of Socialists and Democrats or S&D [Hannes SWOBODA]

International organization participation: ARF (dialogue member), ASEAN (dialogue member), Australian Group, BIS, BSEC (observer), CBSS, CERN, EBRD, FAO, FATE, G-8, G-10, G-20, IDA, IEA, IGAD (partners), LAIA (observer), NSG (observer), OAS (observer), OECD, PIF (partner), SAARC (observer), UN (observer), UNRWA (observer), WCO, WTO, ZC (observer)

Flag description: a blue field with 12 five-pointed gold stars arranged in a circle in the center; blue represents the sky of the Western world, the stars are the peoples of Europe in a circle, a symbol of unity; the number of stars is fixed

National symbol(s): a circle of 12 stars

National anthem: name: "Ode to Joy"

lyrics/music: none/Ludwig VON BEETHOVEN, arranged by Herbert VON KARAJAN

note: adopted 1972, not in use until 1986; according to the European Union, the song is meant to represent all of Europe rather than just the organization; the song also serves as the anthem for the Council of Europe

ECONOMY

Economy—overview: Internally, the EU has adopted the framework of a single market with free movement of goods, services and capital and a common currency amongst 18 member states. Internationally, the EU aims to bolster Europe's trade position and its political and economic weight. Despite great differences in per capita income among member states (from \$13,000 to \$82,000) and in national attitudes toward issues like inflation, debt, and foreign trade, the EU has achieved a high degree of coordination of economic and fiscal policies. Eleven established EU member states, under the auspices of the European Economic and Monetary Union (EMU), introduced the euro as their common currency on 1 January 1999 (Greece did so two years later). Between 2004 and 2007, 12 states acceded to the EU that are, in general, less advanced economically than the other 15 member states. On 1 July 2013 Croatia became the most recent member of the EU, following a decade long application process. Of the 13 most recent entrants, Slovenia (1 January 2007), Cyprus and Malta (1 January 2008), Slovakia (1 January 2009), Estonia (1 January 2011) and Latvia (2014) have adopted the euro; 11 other member states—other than the UK and Denmark, which have formal opt-outs—are required by EU treaties to adopt the common currency upon meeting fiscal and monetary convergence criteria. Following the 2008-09 global economic crisis, the EU economy saw moderate GDP growth in 2010 and 2011, but a sovereign debt crisis in the eurozone intensified in 2011, making it impossible for several member states to gain market financing for new sovereign debt to sustain fiscal deficits. As a result, the eurozone crisis became the bloc's top economic and political priority. Despite EU/IMF rescue programs in Greece, Ireland, Portugal, Spain and Cyprus, and fiscal consolidation measures in many other EU member states, significant risks to growth remain, including high public and private debt loads, crimped lending as banks raise capital, aging populations, onerous regulations, and high unemployment. In response, eurozone leaders in 2011 boosted funding levels for the temporary European Financial Stability Facility (EFSF) to almost \$600 billion and made loan terms more favorable for crisis-hit countries, followed in July 2012 by the permanent European

Stabilization Mechanism (ESM). In addition, 26 of 28 EU member states (all except the UK and Czech Republic) enacted a “fiscal compact” treaty to boost long-term budgetary discipline and coordination. In September 2012 the European Central Bank indicated its willingness to purchase bonds from troubled eurozone member states that agree to a formal program of fiscal and structural reforms, aiming to reduce their borrowing costs and restore confidence in the eurozone. The eurozone has since made great strides towards a banking union to increase financial stability and improve lending conditions. In an effort to restore economic growth and create jobs, in 2013 the EU and the United States started negotiations on an ambitious and comprehensive free trade agreement with the goal of expanding already massive trade and investment flows.

TRANSNATIONAL ISSUES

Disputes—international: as a political union, the EU has no border disputes with neighboring countries, but Estonia has no land boundary agreements with Russia, Slovenia disputes its land and maritime boundaries with Croatia, and Spain has territorial and maritime disputes with Morocco and with the UK over Gibraltar; the EU has set up a Schengen area—consisting of 22 EU member states that have signed the convention implementing the Schengen agreements or “acquis” (1985 and 1990) on the free movement of persons and the harmonization of border controls in

Europe; these agreements became incorporated into EU law with the implementation of the 1997 Treaty of Amsterdam on 1 May 1999; in addition, non-EU states Iceland and Norway (as part of the Nordic Union) have been included in the Schengen area since 1996 (full members in 2001), Switzerland since 2008, and Liechtenstein since 2011 bringing the total current membership to 26; the UK (since 2000) and Ireland (since 2002) take part in only some aspects of the Schengen area, especially with respect to police and criminal matters; nine of the 12 new member states that joined the EU since 2004 joined Schengen on 21 December 2007; of the three remaining EU states, Romania and Bulgaria may join in 2013 or 2014, while Cyprus' entry is held up by the ongoing Cyprus dispute

FALKLAND ISLANDS (ISLAS MALVINAS)

INTRODUCTION

Background: Although first sighted by an English navigator in 1592, the first landing (English) did not occur until almost a century later in 1690, and the first settlement (French) was not established until 1764. The colony was turned over to Spain two years later and the islands have since been the subject of a territorial dispute, first between Britain and Spain, then between

Britain and Argentina. The UK asserted its claim to the islands by establishing a naval garrison there in 1833. Argentina invaded the islands on 2 April 1982. The British responded with an expeditionary force that landed seven weeks later and after fierce fighting forced an Argentine surrender on 14 June 1982. With hostilities ended and Argentine forces withdrawn, UK administration resumed. In response to renewed calls from Argentina for Britain to relinquish control of the islands, a referendum was held in March 2013, which resulted in 99.8% of the population voting to remain a part of the UK.

GEOGRAPHY

ECONOMY

Economy—overview: The economy was formerly based on agriculture, mainly sheep farming but fishing and tourism currently comprise the bulk of economic activity. In 1987, the government began selling fishing licenses to foreign trawlers operating within the Falkland Islands’ exclusive fishing zone. These license fees net more than \$40 million per year, which help support the island’s health, education, and welfare system. The waters around the Falkland Islands are known for their squid, which account for around 75% of the annual 200,000 ton fish catch. Dairy farming supports domestic consumption; crops furnish winter fodder. Foreign exchange earnings come from shipments of high-grade wool to the UK and from the sale of postage stamps and coins. In 2001, the government purchased 100 reindeer with the intent to increase the number to 10,000 over the following 20 years so that venison could be exported to Scandinavia and Chile. Tourism, especially eco-tourism, is increasing rapidly, with about 69,000 visitors in 2009. The British military presence also provides a sizeable economic boost. The islands are now self-financing except for defense. In 1993 the British Geological Survey announced a 200-mile oil exploration zone around the islands, and early seismic surveys suggest substantial reserves capable of producing 500,000 barrels per day. Political tensions between the UK and Argentina remain high following the start of oil drilling activities in the waters. In September 2011, a British exploration firm announced that it plans to commence oil production in 2016.

FAROE ISLANDS

INTRODUCTION

Background: The population of the Faroe Islands is largely descended from Viking settlers who arrived in the 9th century. The islands have been connected politically to Denmark since the 14th century. A high degree of self-government was granted the Faroese in 1948, who have autonomy over most internal affairs while Denmark is responsible for justice, defense, and foreign affairs. The Faroe Islands are not part of the European Union.

ECONOMY

Economy—overview: The Faroese economy is dependent on fishing, which makes the economy vulnerable to price fluctuations. The sector normally accounts for about 95% of exports and nearly half of GDP. In early 2008 the Faroese economy began to slow as a result of smaller catches and historically high oil prices. The slowdown in the Faroese economy followed a strong performance since the mid-1990s with annual growth rates averaging close to 6%, mostly a result of increased fish landings and salmon farming, and high export prices. Unemployment reached its lowest level in June 2008 at 1.1% but gradually increased to about 5.5% in 2012. The Faroese Home Rule Government produced increasing budget surpluses in that period, which helped to reduce the large public debt, most of it to Denmark. However, total dependence on fishing and salmon farming make the Faroese economy vulnerable to fluctuations in world demand. Initial discoveries of oil in the Faroese area give hope for eventual oil production, which may provide a foundation for a more diversified economy and less dependence on Danish economic assistance. Aided by an annual subsidy from Denmark amounting to about 3% of Faroese GDP, the Faroese have a standard of living almost equal to that of Denmark and Greenland. The Faroese Government ran relatively large deficits from 2008 to 2010 and budget deficits are forecast for several years ahead. At year-end 2010 gross external debt had reached approximately US\$900 million.

FIJI

INTRODUCTION

Background: Fiji became independent in 1970 after nearly a century as a British colony. Democratic rule was interrupted by two military coups in 1987 caused by concern over a government perceived as dominated by the Indian community (descendants of contract laborers brought to the islands by the British in the 19th century). The coups and a 1990 constitution that cemented native Melanesian control of Fiji led to heavy Indian emigration; the population loss resulted in economic difficulties, but ensured that Melanesians became the majority. A new constitution enacted in 1997 was more equitable. Free and peaceful elections in 1999 resulted in a government led by an Indo-Fijian, but a civilian-led coup in May 2000 ushered in a prolonged period of political turmoil. Parliamentary elections

held in August 2001 provided Fiji with a democratically elected government led by Prime Minister Laisenia QARASE. Re-elected in May 2006, QARASE was ousted in a December 2006 military coup led by Commodore Voreqe BAINIMARAMA, who initially appointed himself acting president but in January 2007 became interim prime minister. Since taking power BAINIMARAMA has neutralized his opponents, crippled Fiji's democratic institutions, and initially refused to hold elections. In 2012, he promised to hold elections in 2014.

Flag description: light blue with the flag of the UK in the upper hoist-side quadrant and the Fijian shield centered on the outer half of the flag; the blue symbolizes the Pacific ocean and the Union Jack reflects the links with Great Britain; the shield—taken from Fiji’s coat of arms—depicts a yellow lion above a white field quartered by the cross of Saint George; the four quarters depict stalks of sugarcane, a palm tree, bananas, and a white dove

National anthem: name: “God Bless Fiji”

lyrics/music: Michael Francis Alexander PRESCOTT/C. Austin MILES (adapted by Michael Francis Alexander PRESCOTT)

note: adopted 1970; the anthem is known in Fijian as “Meda Dau Doka” (Let Us Show Pride); adapted from the hymn, “Dwelling in Beulah Land,” the anthem’s English lyrics are generally sung, although they differ in meaning from the official Fijian lyrics

ECONOMY

Economy—overview: Fiji, endowed with forest, mineral, and fish resources, is one of the most developed of the Pacific island economies though still with a large subsistence sector. Sugar exports, remittances from Fijians working abroad, and a growing tourist industry—with 400,000 to 500,000 tourists annually—are the major sources of foreign exchange. Fiji’s sugar has special access to European Union markets but will be harmed by

the EU's decision to cut sugar subsidies. Sugar processing makes up one-third of industrial activity but is not efficient. Fiji's tourism industry was damaged by the December 2006 coup and is facing an uncertain recovery time. In 2007 tourist arrivals were down almost 6%, with substantial job losses in the service sector, and GDP dipped. The coup has created a difficult business climate. The EU has suspended all aid until the interim government takes steps toward new elections. Long-term problems include low investment, uncertain land ownership rights, and the government's inability to manage its budget. Overseas remittances from Fijians working in Kuwait and Iraq have decreased significantly. Fiji's current account deficit peaked at 23% of GDP in 2006, and declined to less than 12% of GDP in 2013.

FINLAND

INTRODUCTION

Background: Finland was a province and then a grand duchy under Sweden from the 12th to the 19th centuries, and an autonomous grand duchy of Russia after 1809. It gained complete independence in 1917. During World War II, it successfully defend its independence through cooperation with Germany and resisted subsequent invasions by the Soviet Union—albeit with some loss of territory. In the subsequent half century, Finland transformed from a farm/forest economy to a diversified modern industrial economy; per capita income is among the highest in Western Europe. A member of the European Union since 1995, Finland was the only Nordic state to join the euro single currency at its initiation in January 1999. In the 21st century, the key features of Finland's modern welfare state are high quality education, promotion of equality, and a national social welfare system—currently challenged by an aging population and the fluctuations of an export-driven economy.

Flag description: white with a blue cross extending to the edges of the flag; the vertical part of the cross is shifted to the hoist side in the style of the Dannebrog (Danish flag); the blue represents the thousands of lakes scattered across the country, while the white is for the snow that covers the land in winter

National symbol(s): lion

National anthem: *name:* “Maamme” (Our Land)

lyrics/music: Johan Ludvig RUNEBERG/Fredrik PACIUS

note: in use since 1848; although never officially adopted by law, the anthem has been popular since it was first sung by a student group in 1848; Estonia’s anthem uses the same melody as that of Finland

Economy

Economy—overview: Finland has a highly industrialized, largely free-market economy with per capita output almost as high as that of Austria, Belgium, the Netherlands, or Sweden. Trade is important, with exports accounting for over one-third of GDP in recent years. Finland is historically

competitive in manufacturing—principally the wood, metals, engineering, telecommunications, and electronics industries. Finland excels in export of technology for mobile phones as well as promotion of startups in the ICT, gaming, cleantech, and biotechnology sectors. Except for timber and several minerals, Finland depends on imports of raw materials, energy, and some components for manufactured goods. Because of the climate, agricultural development is limited to maintaining self-sufficiency in basic products. Forestry, an important export earner, provides a secondary occupation for the rural population. Finland had been one of the best performing economies within the EU in recent years and its banks and financial markets avoided the worst of global financial crisis. However, the world slowdown hit exports and domestic demand hard in 2009, with Finland experiencing one of the deepest contractions in the euro zone. A recovery of exports, domestic trade, and household consumption stimulated economic growth in 2010-11, however, continued recession within the EU dampened the economy in 2012-13. The recession affected general government finances and the debt ratio, turning previously strong budget surpluses into deficits, but Finland took action to ensure it that it met the EU deficit targets in 2013 and retained its triple-A credit rating. Finland's main challenge will be to stimulate growth while faced with weak export demand in the EU and its own government austerity measures. Longer-term, Finland must address a rapidly aging population and decreasing productivity in traditional industries that threaten competitiveness, fiscal sustainability, and economic growth.

FRANCE

INTRODUCTION

Background: France today is one of the most modern countries in the world and is a leader among European nations. It plays an influential global role as a permanent member of the United Nations Security Council, NATO, the G-8, the G-20, the EU and other multilateral organizations. France rejoined NATO's integrated military command structure in 2009, reversing de Gaulle's 1966 decision to take French forces out of NATO. Since 1958, it has constructed a hybrid presidential-parliamentary governing system resistant to the instabilities experienced in earlier, more purely parliamentary administrations. In recent decades, its reconciliation and cooperation with Germany have proved central to the economic integration of Europe, including the introduction of a common currency,

the euro, in January 1999. In the early 21st century, five French overseas entities—French Guiana, Guadeloupe, Martinique, Mayotte, and Reunion—became French regions and were made part of France proper.

GEOGRAPHY

Location: metropolitan France: Western Europe, bordering the Bay of Biscay and English Channel, between Belgium and Spain, southeast of the UK; bordering the Mediterranean Sea, between Italy and Spain

French Guiana: Northern South America, bordering the North Atlantic Ocean, between Brazil and Suriname

Guadeloupe: Caribbean, islands between the Caribbean Sea and the North Atlantic Ocean, southeast of Puerto Rico

Martinique: Caribbean, island between the Caribbean Sea and North Atlantic Ocean, north of Trinidad and Tobago

Mayotte: Southern Indian Ocean, island in the Mozambique Channel, about half way between northern Madagascar and northern Mozambique

Reunion: Southern Africa, island in the Indian Ocean, east of Madagascar

Geographic coordinates:

metropolitan France: 46 00 N, 2 00 E

French Guiana: 4 00 N, 53 00 W

Guadeloupe: 16 15 N, 61 35 W

Martinique: 14 40 N, 61 00 W

Mayotte: 12 50 S, 45 10 E

Reunion: 21 06 S, 55 36 E

Climate: metropolitan France: generally cool winters and mild summers, but mild winters and hot summers along the Mediterranean; occasional strong, cold, dry, north-to-northwesterly wind known as mistral

French Guiana: tropical; hot, humid; little seasonal temperature variation

Guadeloupe and Martinique: subtropical tempered by trade winds; moderately high humidity; rainy season (June to October); vulnerable to devastating cyclones (hurricanes) every eight years on average

Mayotte: tropical; marine; hot, humid, rainy season during northeastern monsoon (November to May); dry season is cooler (May to November)

Reunion: tropical, but temperature moderates with elevation; cool and dry (May to November), hot and rainy (November to April)

Terrain: metropolitan France: mostly flat plains or gently rolling hills in north and west; remainder is mountainous, especially Pyrenees in south, Alps in east

French Guiana: low-lying coastal plains rising to hills and small mountains

Guadeloupe: Basse-Terre is volcanic in origin with interior mountains; Grande-Terre is low limestone

formation; most of the seven other islands are volcanic in origin

Martinique: mountainous with indented coastline; dormant volcano

Mayotte: generally undulating, with deep ravines and ancient volcanic peaks

Reunion: mostly rugged and mountainous; fertile lowlands along coast

Elevation extremes: *lowest point:* Rhone River delta -2 m

highest point: Mont Blanc 4,807 m

note: in order to assess the possible effects of climate change on the ice and snow cap of Mont Blanc, its surface and peak have been extensively

measured in recent years; these new peak measurements have exceeded the traditional height of 4,807 m and have varied between 4,808 m and 4,811 m; the actual rock summit is 4,792 m and is 40 m away from the ice-covered summit

Natural resources: metropolitan France: coal, iron ore, bauxite, zinc, uranium, antimony, arsenic, potash, feldspar, fluorspar, gypsum, timber, fish
French Guiana: gold deposits, petroleum, kaolin, niobium, tantalum, clay

Flag description: three equal vertical bands of blue (hoist side), white, and red; known as the “Le drapeau tricolore” (French Tricolor), the origin of the flag dates to 1790 and the French Revolution when the “ancient French color” of white was combined with the blue and red colors of the Parisian militia; the official flag for all French dependent areas

note: the design and/or colors are similar to a number of other flags, including those of Belgium, Chad, Cote d’Ivoire, Ireland, Italy, Luxembourg, and Netherlands

National symbol(s): Gallic rooster, fleur-de-lis, Marianne

National anthem: *name:* “La Marseillaise” (The Song of Marseille)

lyrics/music: Claude-Joseph ROUGET de Lisle

note: adopted 1795, restored 1870; originally known as “Chant de Guerre pour l’Armee du Rhin” (War Song for the Army of the Rhine), the National Guard of Marseille made the song famous by singing it while marching into Paris in 1792 during the French Revolutionary Wars

ECONOMY

Economy—overview: The French economy is diversified across all sectors. The government has partially or fully privatized many large companies, including Air France, France Telecom, Renault, and Thales. However, the government maintains a strong presence in some sectors, particularly power, public transport, and defense industries. With at least 82 million foreign tourists per year, France is the most visited country in the world and maintains the third largest income in the world from tourism. France’s leaders remain committed to a capitalism in which they maintain social equity by means of laws, tax policies, and social spending that mitigate economic inequality. France’s real GDP stagnated in 2012 and 2013. The unemployment rate (including overseas territories) increased from 7.8% in 2008 to 10.2% in 2013. Youth unemployment in metropolitan France decreased from a high of 25.4% in the fourth quarter of 2012 to 22.8% in the fourth quarter of 2013. Lower-than-expected growth and high spending have strained France’s public finances. The budget deficit rose sharply from 3.3% of GDP in 2008 to 7.5% of GDP in 2009 before improving to 4.1% of GDP in 2013, while France’s public debt rose from 68% of GDP to nearly 94% over the same period. In accordance with its EU obligations, France is targeting a deficit of 3.6% of GDP in 2014 and 2.8% in

2015. The administration of President Francois HOLLANDE has implemented greater state support for employment, the separation of banks' traditional deposit taking and lending activities from more speculative businesses, increasing the top corporate and personal tax rates, including a temporary 75% tax on wages over one million euros, and hiring an additional 60,000 teachers during his five-year term. In January 2014 HOLLANDE proposed a "Responsibility Pact" aimed primarily at lowering labor costs in return for businesses' commitment to create jobs. Despite stagnant growth and fiscal challenges, France's borrowing costs have declined in recent years because investors remain attracted to the liquidity of France's bonds.

FRENCH POLYNESIA

INTRODUCTION

Background: The French annexed various Polynesian island groups during the 19th century. In September 1995, France stirred up widespread protests by resuming nuclear testing on the Mururoa atoll after a three-year moratorium. The tests were halted in January 1996. In recent years, French Polynesia's autonomy has been considerably expanded.

ECONOMY

Economy—overview: Since 1962, when France stationed military personnel in the region, French Polynesia has changed from a subsistence

agricultural economy to one in which a high proportion of the work force is either employed by the military or supports the tourist industry. With the halt of French nuclear testing in 1996, the military contribution to the economy fell sharply. Tourism accounts for about one-fourth of GDP and is a primary source of hard currency earnings. Other sources of income are handicrafts, public works projects, aquaculture, pearl farming and deep-sea commercial fishing. The small manufacturing sector primarily processes agricultural products. The territory benefits substantially from development agreements with France aimed principally at creating new businesses and strengthening social services.

FRENCH SOUTHERN AND ANTARCTIC LANDS

INTRODUCTION

Background: In February 2007, the Iles Eparses became an integral part of the French Southern and Antarctic Lands (TAAF). The Southern Lands are now divided into five administrative districts, two of which are archipelagos, Iles Crozet and Iles Kerguelen; the third is a district composed of two volcanic islands, Ile Saint-Paul and Ile Amsterdam; the fourth, Iles Eparses, consists of five scattered tropical islands around Madagascar. They contain no permanent inhabitants and are visited only by researchers

studying the native fauna, scientists at the various scientific stations, fishermen, and military personnel. The fifth district is the Antarctic portion, which consists of "Adelie Land," a thin slice of the Antarctic continent discovered and claimed by the French in 1840.

Ile Amsterdam: Discovered but not named in 1522 by the Spanish, the island subsequently received the appellation of Nieuw Amsterdam from a Dutchman; it was claimed by France in 1843. A short-lived attempt at cattle farming began in 1871. A French meteorological station established on the island in 1949 is still in use. *Ile Saint Paul:* Claimed by France since 1893, the island was a fishing industry center from 1843 to 1914. In 1928, a spiny lobster cannery was established, but when the company went bankrupt in 1931, seven workers were abandoned. Only two survived until 1934 when rescue finally arrived. *Iles Crozet:* A large archipelago formed from the Crozet Plateau, Iles Crozet is divided into two main groups: L'Occidental (the West), which includes Ile aux Cochons, Ilots des Apotres, Ile des Pingouins, and the reefs Brisants de l'Heroine; and L'Oriental (the East), which includes Ile d'Est and Ile de la Possession (the largest island of the Crozets). Discovered and claimed by France in 1772, the islands were used for seal hunting and as a base for whaling. Originally administered as a dependency of Madagascar, they became part of the TAAF in 1955.

Iles Kerguelen: This island group, discovered in 1772, is made up of one large island (Ile Kerguelen) and about 300 smaller islands. A permanent group of 50 to 100 scientists resides at the main base at Port-aux-Francais.

Adelie Land: The only non-insular district of the TAAF is the Antarctic claim known as "Adelie Land." The US Government does not recognize it as a French dependency.

Bassas da India: A French possession since 1897, this atoll is a volcanic rock surrounded by reefs and is awash at high tide.

Europa Island: This heavily wooded island has been a French possession since 1897; it is the site of a small military garrison that staffs a weather station.

Glorioso Islands: A French possession since 1892, the Glorioso Islands are composed of two lushly vegetated coral islands (Ile Glorieuse and Ile du Lys) and three rock islets. A military garrison operates a weather and radio station on Ile Glorieuse.

Juan de Nova Island: Named after a famous 15th century Spanish navigator and explorer, the island has been a French possession since 1897. It has been exploited for its guano and phosphate. Presently a small military garrison oversees a meteorological station.

Tromelin Island: First explored by the French in 1776, the island came under

the jurisdiction of Reunion in 1814. At present, it serves as a sea turtle sanctuary and is the site of an important meteorological station.

GEOGRAPHY

Location: southeast and east of Africa, islands in the southern Indian Ocean, some near Madagascar and others about equidistant between Africa, Antarctica, and Australia; note—French Southern and Antarctic Lands include Ile Amsterdam, Ile Saint-Paul, Iles Crozet, Iles Kerguelen, Bassas da India, Europa Island, Glorioso Islands, Juan de Nova Island, and Tromelin Island in the southern Indian Ocean, along with the French-claimed sector of Antarctica, “Adelie Land”; the US does not recognize the French claim to “Adelie Land”

exclusive economic zone: 200 nm from Iles Kerguelen and Iles Eparses (does not include the rest of French Southern and Antarctic Lands); Juan de Nova Island and Tromelin Island

claim a continental shelf of 200-m depth or to the depth of exploitation

Climate:

Ile Amsterdam et Ile Saint-Paul: oceanic with persistent westerly winds and high humidity

Iles Crozet: windy, cold, wet, and cloudy

Iles Kerguelen: oceanic, cold, overcast, windy

Iles Eparses: tropical

Terrain:

Ile Amsterdam (Ile Amsterdam et Ile Saint-Paul): a volcanic island with steep coastal cliffs; the center floor of the volcano is a large plateau

Ile Saint-Paul (Ile Amsterdam et Ile Saint-Paul): triangular in shape, the island is the top of a volcano, rocky with steep cliffs on the eastern side; has active thermal springs

Iles Crozet: a large archipelago formed from the Crozet Plateau is divided into two groups of islands

Iles Kerguelen: the interior of the large island of Ile Kerguelen is composed of rugged terrain of high mountains, hills, valleys, and plains with a number of peninsulas stretching off its coasts

Bassas da India (Iles Eparses): atoll, awash at high tide; shallow (15 m) lagoon

Europa Island, Glorioso Islands, Juan de Nova Island: low, flat, and sandy

Tromelin Island (Iles Eparses): low, flat, sandy; likely volcanic seamount

Irrigated land: 0 sq km (2011)

Natural hazards: Ile Amsterdam and Ile Saint-Paul are inactive volcanoes; Iles Eparses subject to periodic cyclones; Bassas da India is a maritime hazard since it is under water for a period of three hours prior to and following the high tide and surrounded by reefs

volcanism: Reunion Island—Piton de la Fournaise (elev. 2,632 m,), which has erupted many times in recent years including 2010, is one of the world's most active volcanoes; although rare, eruptions outside the volcano's caldera could threaten nearby cities

Environment—current issues: introduction of foreign species on Iles Crozet has caused severe damage to the original ecosystem; overfishing of Patagonian toothfish around Iles Crozet and Iles Kerguelen

Geography—note: islands component is widely scattered across remote locations in the southern Indian Ocean

Bassas da India (Iles Eparses): the atoll is a circular reef that sits atop a long-extinct, submerged volcano

Europa Island and Juan de Nova Island (Iles Eparses): wildlife sanctuary for seabirds and sea turtles

Glorioso Island (Iles Eparses): the islands and rocks are surrounded by an extensive reef system

Tromelin Island (Iles Eparses): climatologically important location for forecasting cyclones in the western Indian Ocean; wildlife sanctuary (seabirds, tortoises)

PEOPLE AND SOCIETY

Population: no indigenous inhabitants

Ile Amsterdam (Ile Amsterdam et Ile Saint-Paul): has no permanent residents but has a meteorological station

Ile Saint-Paul (Ile Amsterdam et Ile Saint-Paul): is uninhabited but is frequently visited by fishermen and has a scientific research cabin for short stays

Iles Crozet: are uninhabited except for 18 to 30 people staffing the Alfred Faure research station on Ile del la Possession

Iles Kerguelen: 50 to 100 scientists are located at the main base at Port-aux-Francais on Ile Kerguelen

Bassas da India (Iles Eparses): uninhabitable

Europa Island, Glorioso Islands, Juan de Nova Island (Iles Eparses): a small French military garrison and a few meteorologists on each possession; visited by scientists

Tromelin Island (Iles Eparses): uninhabited, except for visits by scientists

Tromelin Island (Iles Eparses): claimed by Mauritius

GABON

INTRODUCTION

Background: El Hadj Omar BONGO Ondimba—one of the longest-serving heads of state in the world—dominated the country’s political scene for four decades (1967-2009) following independence from France in 1960. President BONGO introduced a nominal multiparty system and a new

constitution in the early 1990s. However, allegations of electoral fraud during local elections in December 2002 and the presidential elections in 2005 exposed the weaknesses of formal political structures in Gabon. Following President BONGO's death in 2009, new elections brought Ali BONGO Ondimba, son of the former president, to power. Despite constrained political conditions, Gabon's small population, abundant natural resources, and considerable foreign support have helped make it one of the more stable African countries.

ECONOMY

Economy—overview: Gabon enjoys a per capita income four times that of most sub-Saharan African nations, but because of high income inequality, a large proportion of the population remains poor. Gabon depended on timber and manganese until oil was discovered offshore in the early 1970s. The economy was reliant on oil for about 50% of its GDP, about 70% of revenues, and 87% of goods exports for 2010, although some fields

have passed their peak production. A rebound of oil prices from 1999 to 2008 helped growth, but declining production has hampered Gabon from fully realizing potential gains. Gabon signed a 14-month Stand-By Arrangement with the IMF in May 2007, and later that year issued a \$1 billion sovereign bond to buy back a sizable portion of its Paris Club debt. Gabon continues to face fluctuating prices for its oil, timber, and manganese exports. Despite the abundance of natural wealth, poor fiscal management has stifled the economy. However, President BONGO ONDIMBA has made efforts to increase transparency and is taking steps to make Gabon a more attractive investment destination to diversify the economy. BONGO ONDIMBA has attempted to boost growth by increasing government investment in human resources and infrastructure. GDP grew more than 6% per year over the 2010-13 period.

GAMBIA, THE

INTRODUCTION

Background: The Gambia gained its independence from the UK in 1965. Geographically surrounded by Senegal, it formed a short-lived federation of Senegambia between 1982 and 1989. In 1991 the two nations signed a friendship and cooperation treaty, but tensions have flared up intermittently since then. Yahya JAMMEH led a military coup in 1994 that overthrew the president and banned political activity. A new constitution and presidential elections in 1996, followed by parliamentary balloting in 1997, completed a nominal return to civilian rule. JAMMEH has been elected president in all subsequent elections including most recently in late 2011.

ECONOMY

Economy—overview: The Gambia has sparse natural resource deposits and a limited agricultural base, and relies in part on remittances from workers overseas and tourist receipts. About three-quarters of the

population depends on the agricultural sector for its livelihood and the sector provides for about one-fifth of GDP. The agricultural sector has untapped potential—less than half of arable land is cultivated. Small-scale manufacturing activity features the processing of peanuts, fish, and hides. The Gambia's natural beauty and proximity to Europe has made it one of the larger markets for tourism in West Africa, boosted by government and private sector investments in eco-tourism and upscale facilities. In 2012, however, sluggish tourism led to a decline in GDP. Tourism brings in about one-fifth of GDP. Agriculture also took a hit in 2012 due to unfavorable weather patterns. The Gambia's re-export trade accounts for almost 80% of goods exports. Unemployment and underemployment rates remain high. Economic progress depends on sustained bilateral and multilateral aid, on responsible government economic management, and on continued technical assistance from multilateral and bilateral donors. International donors and lenders continue to be concerned about the quality of fiscal management and The Gambia's debt burden.

Trafficking in persons: *current situation:* The Gambia is a source, transit, and destination country for women and children subjected to forced labor and sex trafficking; Gambian women, children, and, to a lesser extent, boys are exploited for prostitution and domestic servitude; women, girls, and boys from West African countries are trafficked to the Gambia for sexual exploitation, particularly catering to European tourists seeking sex with children; some Gambian trafficking victims have been identified in neighboring West African countries and the UK; boys in some Koranic schools are forced into street vending or begging

tier rating: Tier 2 Watch List—The Gambia does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; the government has sustained its modest anti-trafficking law enforcement efforts, opening some investigations but failing to initiate any prosecutions or to formally identify any victims; a government program was launched providing resources and financial support to 12 Koranic schools on the condition that their students are not forced to beg (2013)

GAZA STRIP

INTRODUCTION

Background: Inhabited since at least the 15th century B.C., Gaza has been dominated by many different peoples and empires throughout its history; it was incorporated into the Ottoman Empire in the early 16th century. Gaza fell to British forces during World War I, becoming a part of the British Mandate of Palestine. Following the 1948 Arab-Israeli War, Egypt administered the newly formed Gaza Strip; it was captured by Israel in the Six-Day War in 1967. Under a series of agreements signed between 1994 and 1999, Israel transferred to the Palestinian Authority (PA) security and civilian responsibility for many Palestinian-populated areas of the Gaza Strip as well as the West Bank. Negotiations to determine the permanent status of the West Bank and Gaza Strip stalled after the outbreak of an

intifada in mid- 2000. In early 2003, the “Quartet” of the US, EU, UN, and Russia, presented a roadmap to a final peace settlement by 2005, calling for two states—Israel and a democratic Palestine. Following Palestinian leader Yasir ARAFAT’s death in late 2004 and the subsequent election of Mahmud ABBAS (head of the Fatah political party) as the PA president, Israel and the PA agreed to move the peace process forward. Israel in late 2005 unilaterally withdrew all of its settlers and soldiers and dismantled its military facilities in the Gaza Strip, but continues to control maritime, airspace, and other access. In early 2006, the Islamic Resistance Movement, HAMAS, won the Palestinian Legislative Council election and took control of the PA government. Attempts to form a unity government between Fatah and HAMAS failed, and violent clashes between Fatah and HAMAS supporters ensued, culminating in HAMAS’s violent seizure of all military and governmental institutions in the Gaza Strip in June 2007. Fatah and HAMAS in early 2011 agreed to reunify the Gaza Strip and West Bank, but the factions have struggled to implement details on governance and security. Brief periods of increased violence between Israel and Palestinian militants in the Gaza Strip in 2007-08 and again in 2012, both led to Egyptian-brokered truces. The status quo remains with HAMAS in control of the Gaza Strip and the PA governing the West Bank.

ECONOMY

Economy—overview: Israeli security controls imposed since the end of the second intifada have degraded economic conditions in the Gaza Strip, the smaller of the two areas comprising the Palestinian territories. Israeli-imposed border closures, which became more restrictive after HAMAS seized control of the territory in June 2007, have resulted in high unemployment, elevated poverty rates, and a sharp contraction of the private sector that had relied primarily on export markets. Gazans increasingly turned to tunnels that ran under the Egyptian border to bring

in fuel, construction materials, and consumer goods. In July 2013, Egyptian authorities began a serious crackdown on the tunnels, causing shortages in Gaza. The population depends on government spending—by both the Palestinian Authority and HAMAS's de facto government—and humanitarian assistance. Changes to Israeli restrictions on imports in 2010 resulted in a rebound in some economic activity, but regular exports from Gaza still are not permitted. Standard-of-living measures remain below levels seen in the mid-1990s.

GEORGIA

INTRODCTION

Background: The region of present day Georgia contained the ancient kingdoms of Colchis and Kartli-Iberia. The area came under Roman influence in the first centuries A.D., and Christianity became the state religion in the 330s. Domination by Persians, Arabs, and Turks was followed by a Georgian golden age (11th-13th centuries) that was cut short by the Mongol invasion of 1236. Subsequently, the Ottoman and Persian empires competed for influence in the region. Georgia was absorbed into the Russian Empire in the 19th century. Independent for three years (1918-1921) following the Russian revolution, it was forcibly incorporated into the USSR in 1921 and regained its independence when the Soviet Union dissolved in 1991. Mounting public discontent over rampant corruption and ineffective government services, followed by an attempt by the incumbent Georgian Government to manipulate national legislative elections in November 2003 touched off widespread protests that led to the resignation of Eduard SHEVARDNADZE, president since 1995. In the aftermath of that popular movement, which became known as the “Rose Revolution,” new elections in early 2004 swept Mikheil SAAKASHVILI into power along with his United National Movement (UNM) party. Progress on market reforms and democratization has been made in the years since

independence, but this progress has been complicated by Russian assistance and support to the separatist regions of Abkhazia and South Ossetia. Periodic flare-ups in tension and violence culminated in a five-day conflict in August 2008 between Russia and Georgia, including the invasion of large portions of undisputed Georgian territory. Russian troops pledged to pull back from most occupied Georgian territory, but in late August 2008 Russia unilaterally recognized the independence of Abkhazia and South Ossetia, and Russian military forces remain in those regions. Billionaire philanthropist Bidzina IVANISHVILI's unexpected entry into politics in October 2011 brought the divided opposition together under his Georgian Dream coalition, which won a majority of seats in the October 2012 parliamentary election and removed UNM from power. Conceding defeat, SAAKASHVILI named IVANISHVILI as prime minister and allowed Georgian Dream to create a new government. Georgian Dream's Giorgi MARGVELASHVILI was inaugurated as president on 17 November 2013, ending a tense year of power-sharing between SAAKASHVILI and IVANISHVILI. IVANISHVILI voluntarily resigned from office after the presidential succession, and Georgia's legislature on 20 November 2013 confirmed Irakli GARIBASHVILI as his replacement. Georgia's recent elections represent unique examples of a former Soviet state that emerged to conduct democratic and peaceful government transitions of power. Popular and government support for integration with the West is high in Georgia. Joining the EU and NATO are among the country's top foreign policy goals.

Economy

Economy—overview: Georgia’s main economic activities include cultivation of agricultural products such as grapes, citrus fruits, and hazelnuts; mining of manganese, copper, and gold; and producing alcoholic and nonalcoholic beverages, metals, machinery, and chemicals in small-scale industries. The country imports nearly all its needed supplies of natural gas and oil products. It has sizeable hydropower capacity that now provides most of its energy needs. Georgia has overcome the chronic energy shortages and gas supply interruptions of the past by renovating hydropower plants and by increasingly relying on natural gas imports from Azerbaijan instead of from Russia. Construction of the Baku-T’bilisi-Ceyhan oil pipeline, the South Caucasus gas pipeline, and the Kars-Akhalkalaki Railroad are part of a strategy to capitalize on Georgia’s strategic location between Europe and Asia and develop its role as a transit point for gas, oil, and other goods. The expansion of the South Caucasus pipeline, as part of the Shah Deniz II Southern Gas Corridor project, will result in a \$2 billion foreign investment in Georgia, the largest ever in the country. Gas from Shah Deniz II is expected to begin flowing in 2019. Georgia’s economy sustained GDP growth of more than 10% in 2006-07, based on strong inflows of foreign investment and robust government spending. However, GDP growth slowed following the August 2008 conflict with Russia, and sunk to negative 4% in 2009 as foreign direct investment and workers’ remittances declined in the wake of the global financial crisis. The economy rebounded in 2010-13, but FDI inflows, the engine of Georgian economic growth prior to the 2008 conflict, have not recovered

fully. Unemployment has also remained high. Georgia has historically suffered from a chronic failure to collect tax revenues; however, since 2004 the government has simplified the tax code, improved tax administration, increased tax enforcement, and cracked down on petty corruption, leading to higher revenues. The country is pinning its hopes for renewed growth on a determined effort to continue to liberalize the economy by reducing regulation, taxes, and corruption in order to attract foreign investment, with a focus on hydropower, agriculture, tourism, and textiles production. The government has received high marks from the World Bank for its anti-corruption efforts. Over the past year the Georgian Dream-led government continued the previous administration's low-regulation, low-tax, free market policies, while modestly increasing social spending, strengthening anti-trust policy, and amending the labor code to comply with International Labor Standards. The government is finalizing its 2020 Economic Development Strategy and has launched the Georgia Co-Investment Fund, a \$6 billion private equity fund that will invest in tourism, agriculture, logistics, energy, infrastructure, and manufacturing.

GERMANY

INTRODUCTION

Background: As Europe's largest economy and second most populous nation (after Russia), Germany is a key member of the continent's economic, political, and defense organizations. European power struggles immersed Germany in two devastating World Wars in the first half of the 20th century and left the country occupied by the victorious Allied powers of the US, UK, France, and the Soviet Union in 1945. With the advent of the Cold War, two German states were formed in 1949: the western Federal Republic of Germany (FRG) and the eastern German Democratic Republic (GDR). The democratic FRG embedded itself in key Western economic and security organizations, the EC, which became the EU, and NATO, while the communist GDR was on the front line of the Soviet-led Warsaw Pact. The

decline of the USSR and the end of the Cold War allowed for German unification in 1990. Since then, Germany has expended considerable funds to bring Eastern productivity and wages up to Western standards. In January 1999, Germany and 10 other EU countries introduced a common European exchange currency, the euro.

National anthem: *name:* “Das Lied der Deutschen” (Song of the Germans)

lyrics/music: August Heinrich HOFFMANN VON FALLERSLEBEN/Franz Joseph HAYDN

note: adopted 1922; the anthem, also known as “Deutschlandlied” (Song of Germany), was originally adopted for its connection to the March 1848 liberal revolution; following appropriation by the Nazis of the first verse, specifically the phrase, “Deutschland, Deutschland ueber alles” (Germany, Germany above all) to promote nationalism, it was banned after 1945; in 1952, its third verse was adopted by West Germany as its national anthem; in 1990, it became the national anthem for the reunited Germany

ECONOMY

Economy—overview: The German economy—the fifth largest economy in the world in PPP terms and Europe’s largest—is a leading exporter of machinery, vehicles, chemicals, and household equipment and benefits from a highly skilled labor force. Like its Western European neighbors, Germany faces significant demographic challenges to sustained long-term growth. Low fertility rates and declining net immigration are increasing pressure on the country’s social welfare system and necessitate structural reforms. Reforms launched by the government of Chancellor Gerhard SCHROEDER (1998-2005), deemed necessary to address chronically high unemployment and low average growth, has contributed to strong growth and falling unemployment. These advances, as well as a government subsidized, reduced working hour scheme, help explain the relatively modest increase in unemployment during the 2008-09 recession—the deepest since World War II—and its decrease to 5.3% in 2013. The new German government introduced a minimum wage of \$11 per hour to take effect in 2015. Stimulus and stabilization efforts initiated in 2008 and 2009 and tax cuts introduced in Chancellor Angela MERKEL’s second term increased Germany’s total budget deficit—including federal, state, and municipal—to 4.1% in 2010, but slower spending and higher tax revenues reduced the deficit to 0.8% in 2011 and in 2012 Germany reached a budget surplus of 0.1%. A constitutional amendment approved in 2009 limits the federal government to structural deficits of no more than 0.35% of GDP per annum as of 2016 though the target was already reached in 2012. Following the March 2011 Fukushima nuclear disaster, Chancellor Angela MERKEL announced in May 2011 that eight of the country’s 17 nuclear reactors would be shut down immediately and the remaining plants would close by 2022. Germany hopes to replace nuclear power with renewable energy. Before the shutdown of the eight reactors, Germany relied on nuclear power for 23% of its electricity generating capacity and 46% of its base-load electricity production.

GHANA

INTRODUCTION

Background: Formed from the merger of the British colony of the Gold Coast and the Togoland trust territory, Ghana in 1957 became the first sub-Saharan country in colonial Africa to gain its independence. Ghana endured a long series of coups before Lt. Jerry RAWLINGS took power in 1981 and banned political parties. After approving a new constitution and restoring multiparty politics in 1992, RAWLINGS won presidential elections in 1992 and 1996 but was constitutionally prevented from running for a third term in 2000. John KUFUOR succeeded him and was reelected in 2004. John Atta MILLS won the 2008 presidential election and took over as head of state, but he died in July 2012 and was constitutionally succeeded by his vice president John Dramani MAHAMA, who subsequently won the

December 2012 presidential election.

ECONOMY

Economy—overview: Ghana's economy has been strengthened by a quarter century of relatively sound management, a competitive business environment, and sustained reductions in poverty levels. In late 2010, Ghana was recategorized as a lower middle-income country. Ghana is well-endowed with natural resources and agriculture accounts for roughly one-quarter of GDP and employs more than half of the workforce, mainly small landholders. The services sector accounts for 50% of GDP. Gold and cocoa production and individual remittances are major sources of foreign exchange. Oil production at Ghana's offshore Jubilee field began in mid-December 2010, and is producing close to target levels. Additional oil projects are being developed and are expected to come on line in a few years. Estimated oil reserves have jumped to almost 700 million barrels and Ghana's growing oil industry is expected to boost economic growth as the country faces the consequences of two years of loose fiscal policy, high budget and current account deficits, and a depreciating currency. President MAHAMA faces challenges in managing a population that is unhappy with living standards and that perceives they are not reaping the benefits of oil production because of political corruption.

GIBRALTAR

INTRODUCTION

Background: Strategically important, Gibraltar was reluctantly ceded to Great Britain by Spain in the 1713 Treaty of Utrecht; the British garrison was formally declared a colony in 1830. In a referendum held in 1967, Gibraltarians voted overwhelmingly to remain a British dependency. The subsequent granting of autonomy in 1969 by the UK led to Spain closing the border and severing all communication links. Between 1997 and 2002, the UK and Spain held a series of talks on establishing temporary joint sovereignty over Gibraltar. In response to these talks, the Gibraltar Government called a referendum in late 2002 in which the majority of citizens voted overwhelmingly against any sharing of sovereignty with Spain. Since late 2004, Spain, the UK, and Gibraltar have held tripartite

talks with the aim of cooperatively resolving problems that affect the local population, and work continues on cooperation agreements in areas such as taxation and financial services; communications and maritime security; policy, legal and customs services; environmental protection; and education and visa services. Throughout 2009, a dispute over Gibraltar's claim to territorial waters extending out three miles gave rise to periodic non-violent maritime confrontations between Spanish and UK naval patrols and in 2013, the British reported a record number of entries by Spanish vessels into waters claimed by Gibraltar following a dispute over Gibraltar's creation of an artificial reef in those waters. A new noncolonial constitution came into effect in 2007, and the European Court of First Instance recognized Gibraltar's right to regulate its own tax regime in December 2008. The UK retains responsibility for defense, foreign relations, internal security, and financial stability.

ECONOMY

Economy—overview: Self-sufficient Gibraltar benefits from an extensive shipping trade, offshore banking, and its position as an international conference center. Tax rates are low to attract foreign investment. The British military presence has been sharply reduced and now contributes about 7% to the local economy, compared with 60% in 1984. The financial sector, tourism (over 11 million visitors in 2012), gaming revenues, shipping services fees, and duties on consumer goods also generate revenue. The financial sector, tourism, and the shipping sector contribute 30%, 30%, and 25%, respectively, of GDP. Telecommunications, e-commerce, and e-gaming account for the remaining 15%. In recent years, Gibraltar has seen major structural change from a public to a private sector economy, but changes in government spending still have a major impact on the level of employment.

GREECE

INTRODUCTION

Background: Greece achieved independence from the Ottoman Empire in 1830. During the second half of the 19th century and the first half of the 20th century, it gradually added neighboring islands and territories, most with Greek-speaking populations. In World War II, Greece was first invaded by Italy (1940) and subsequently occupied by Germany (1941-44); fighting endured in a protracted civil war between supporters of the king and other anti-communist and communist rebels. Following the latter's defeat in 1949, Greece joined NATO in 1952. In 1967, a group of military officers seized power, establishing a military dictatorship that suspended many political liberties and forced the king to flee the country. In 1974, democratic elections and a referendum created a parliamentary republic and abolished

the monarchy. In 1981, Greece joined the EC (now the EU); it became the 12th member of the European Economic and Monetary Union in 2001. In 2010, the prospect of a Greek default on its euro-denominated debt created severe strains within the EMU and raised the question of whether a member country might voluntarily leave the common currency or be removed.

National anthem: *name:* "Ymnos eis tin Eleftherian" (Hymn to Liberty)

lyrics/music: Dionysios SOLOMOS/Nikolaos MANTZAROS

note: adopted 1864; the anthem is based on a 158 verse poem by the same name, which was inspired by the Greek Revolution of 1821 against the Ottomans; Cyprus also uses “Hymn to Liberty” as its anthem

ECONOMY

Economy—overview: Greece has a capitalist economy with a public sector accounting for about 40% of GDP and with per capita GDP about two-thirds that of the leading euro-zone economies. Tourism provides 18% of GDP. Immigrants make up nearly one-fifth of the work force, mainly in agricultural and unskilled jobs. Greece is a major beneficiary of EU aid, equal to about 3.3% of annual GDP. The Greek economy averaged growth of about 4% per year between 2003 and 2007, but the economy went into recession in 2009 as a result of the world financial crisis, tightening credit conditions, and Athens’ failure to address a growing budget deficit. By 2013 the economy had contracted 26%, compared with the pre-crisis level of 2007. Greece met the EU’s Growth and Stability Pact budget deficit criterion of no more than 3% of GDP in 2007-08, but violated it in 2009, with the deficit reaching 15% of GDP. Austerity measures have reduced the deficit to about 4% in 2013, including government debt payments. Deteriorating public finances, inaccurate and misreported statistics, and consistent underperformance on reforms prompted major credit rating agencies to downgrade Greece’s international debt rating in late 2009, and led the country into a financial crisis. Under intense pressure from the EU and international market participants, the government adopted a medium-term austerity program that includes cutting government spending, decreasing tax evasion, overhauling the health-care and pension systems, and reforming the labor and product markets. Athens, however, faces long-term challenges to continue pushing through unpopular reforms in the face of widespread unrest from the country’s powerful labor unions and the general public. In April 2010 a leading credit agency assigned Greek debt its lowest possible credit rating; in May 2010, the International Monetary Fund and Euro-Zone governments provided Greece emergency short- and medium-term loans worth \$147 billion so that the country could make debt repayments to creditors. In exchange for the largest bailout ever assembled, the government announced combined spending cuts and tax increases totaling \$40 billion over three years, on top of the tough austerity measures already taken. Greece, however, struggled to meet 2010 targets set by the EU and the IMF, especially after Eurostat—the EU’s statistical office—revised upward Greece’s deficit and debt numbers for 2009 and 2010. European

leaders and the IMF agreed in October 2011 to provide Athens a second bailout package of \$169 billion. The second deal however, called for holders of Greek government bonds to write down a significant portion of their holdings. As Greek banks held a significant portion of sovereign debt, the banking system was adversely affected by the write down and €41 billion of the second bailout package was set aside to ensure the banking system was adequately capitalized. In exchange for the second loan Greece promised to introduce an additional \$7.8 billion in austerity measures during 2013-15. However, the massive austerity cuts have prolonged Greece's economic recession and depressed tax revenues. Throughout 2013, Greece's lenders called on Athens to step up efforts to increase tax collection, dismiss public servants, privatize public enterprises, and rein in health spending. In June 2013 Prime Minister Antonis SAMARAS's efforts to meet bailout conditions led to the departure of one party, the Democratic Left, from the governing coalition when his government made the controversial decision to shut down and restructure the state-owned television and radio company. Subsequent reluctance to institute further cuts and delays in meeting public sector reform targets prompted Greek lenders to withhold bailout fund disbursements until December 2013. However, investor confidence began to show signs of strengthening by the end of 2013 as leading macroeconomic indicators suggested the economy's freefall had been arrested.

TRANSNATIONAL ISSUES

Disputes—international: Greece and Turkey continue discussions to resolve their complex maritime, air, territorial, and boundary disputes in the Aegean Sea; Greece rejects the use of the name Macedonia or Republic of Macedonia; the mass migration of unemployed Albanians still remains a problem for developed countries, chiefly Greece
and Italy

Refugees and internally displaced persons:

stateless persons: 154 (2012)

Illicit drugs: a gateway to Europe for traffickers smuggling cannabis and heroin from the Middle East and Southwest Asia to the West and precursor chemicals to the East; some South American cocaine transits or is consumed in Greece; money laundering related to drug trafficking and organized crime

GREENLAND

INTRODUCTION

Background: Greenland, the world's largest island, is about 81% ice-capped. Vikings reached the island in the 10th century from Iceland; Danish colonization began in the 18th century, and Greenland was made an integral part of Denmark in 1953. It joined the European Community (now the EU) with Denmark in 1973 but withdrew in 1985 over a dispute centered on stringent fishing quotas. Greenland was granted self-government in 1979 by the Danish parliament; the law went into effect the following year. Greenland voted in favor of increased self-rule in November 2008 and acquired greater responsibility for internal affairs when the Act on Greenland Self-Government was signed into law in June 2009. Denmark, however, continues to exercise control over several policy areas on behalf of Greenland including foreign affairs, security, and financial policy in consultation with Greenland's Self-Rule Government.

National symbol(s): polar bear

National anthem: *name:* “Nunarput utoqqarsuanngoravit” (“Our Country, Who’s Become So Old” also translated as “You Our Ancient Land”)

lyrics/music: Henrik LUND/Jonathan PETERSEN

note: adopted 1916; the government also recognizes “Nuna asiilasooq” as a secondary anthem

ECONOMY

Economy—overview: The economy remains critically dependent on exports of shrimp and fish, income from resource exploration and extraction, and on a substantial subsidy from the Danish Government. The subsidy was budgeted to be about \$651 million in 2012, approximately 56% of government revenues that year. The public sector, including publicly owned enterprises and the municipalities, plays the dominant role in Greenland’s economy. Greenland’s real GDP contracted about 1% in 2009 as a result of the global economic slowdown, but is estimated to have grown marginally in 2010-13. The relative ease with which Greenland has weathered the economic crisis is due to increased hydrocarbon and mineral exploration and extraction activities, a high level of construction activity in the Nuuk area and the increasing price of fish and shrimp. During the last decade the Greenland Home Rule Government (GHRG) pursued conservative fiscal and monetary policies, but public pressure has increased for better schools, health care and retirement systems. The Greenlandic economy has benefited from increasing catches and exports of shrimp, Greenland halibut and, more recently, crabs. Due to Greenland’s continued dependence on exports of fish—which accounted for 89% of exports in 2010—the economy remains very sensitive to foreign developments. International consortia are increasingly active in exploring for hydrocarbon resources off Greenland’s western coast, and international studies indicate the potential for oil and gas fields in northern and northeastern Greenland. In May 2007 a US aluminum producer concluded a memorandum of understanding with the Greenland Home Rule Government to build an aluminum smelter and a power generation facility, which takes advantage of Greenland’s abundant hydropower potential. Within the area of mining, olivine sand continues to be produced and gold production has resumed in south Greenland, while rare-earth and iron ore mineral projects have been proposed or planned elsewhere on the island. Tourism also offers another avenue of economic growth for Greenland, with increasing numbers of cruise lines now operating in Greenland’s western and southern waters

during the peak summer tourism season.

GRENADA

INTRODUCTION

Background: Carib Indians inhabited Grenada when Christopher COLUMBUS discovered the island in 1498, but it remained uncolonized for more than a century. The French settled Grenada in the 17th century, established sugar estates, and imported large numbers of African slaves. Britain took the island in 1762 and vigorously expanded sugar production. In the 19th century, cacao eventually surpassed sugar as the main export crop; in the 20th century, nutmeg became the leading export. In 1967, Britain gave Grenada autonomy over its internal affairs. Full independence was attained in 1974 making Grenada one of the smallest independent countries in the Western Hemisphere. Grenada was seized by a Marxist military council on 19 October 1983. Six days later the island was invaded

by US forces and those of six other Caribbean nations, which quickly captured the ringleaders and their hundreds of Cuban advisers. Free elections were reinstituted the following year and have continued since that time. Hurricane Ivan struck Grenada in September of 2004 causing severe damage.

ECONOMY

Economy—overview: Grenada relies on tourism as its main source of foreign exchange especially since the construction of an international airport in 1985. Hurricanes Ivan (2004) and Emily (2005) severely damaged the agricultural sector—particularly nutmeg and cocoa cultivation—which had been a key driver of economic growth. Grenada has rebounded from the devastating effects of the hurricanes but is now saddled with the debt burden from the rebuilding process. Public debt-to-GDP is nearly 110%, leaving the MITCHELL administration limited room to engage in public investments and social spending. MITCHELL in 2013 announced a structural adjustment program that includes a plan to increase tax revenue. Strong performances in construction and manufacturing, together with the development of tourism and an offshore financial industry, have contributed to growth in national output; however, economic growth remained stagnant in 2010-12 after a sizeable contraction in 2009, because of the global economic slowdown's effects on tourism and remittances.

GUATEMALA

INTRODUCTION

Background: The Maya civilization flourished in Guatemala and surrounding regions during the first millennium A.D. After almost three centuries as a Spanish colony, Guatemala won its independence in 1821. During the second half of the 20th century, it experienced a variety of military and civilian governments, as well as a 36-year guerrilla war. In 1996, the government signed a peace agreement formally ending the conflict, which had left more than 200,000 people dead and had created, by some estimates, about 1 million refugees.

GEOGRAPHY

Location: Central America, bordering the North Pacific Ocean, between El Salvador and Mexico, and bordering the Gulf of Honduras (Caribbean Sea) between Honduras and Belize

Geographic coordinates: 15 30 N, 90 15 W

Map references: Central America and the Caribbean

Area: *total:* 108,889 sq km

country comparison to the world: 107

land: 107,159 sq km

Coastline: 400 km

Maritime claims: territorial sea: 12 nm

exclusive economic zone: 200 nm

continental shelf: 200 m depth or to the depth of exploitation

Climate: tropical; hot, humid in lowlands; cooler in highlands

Terrain: mostly mountains with narrow coastal plains and rolling limestone plateau

Elevation extremes: *lowest point:* Pacific Ocean 0 m

highest point: Volcan Tajumulco 4,211 m

note: highest point in Central America

Natural resources: petroleum, nickel, rare woods, fish, chicle, hydropower

Land use: *arable land:* 13.78%

permanent crops: 8.68%

other: 77.55% (2011)

Irrigated land: 3,121 sq km (2003)

Freshwater withdrawal (domestic/industrial/agricultural): *total:* 3.46 cu km/yr (15%/31%/54%)

per capita: 259.1 cu m/yr (2006)

Natural hazards: numerous volcanoes in mountains, with occasional violent earthquakes; Caribbean coast extremely susceptible to hurricanes and other tropical storms

volcanism: significant volcanic activity in the Sierra Madre range; Santa Maria (elev. 3,772 m) has been deemed a Decade Volcano by the International Association of Volcanology and Chemistry of the Earth's Interior, worthy of study due to its explosive history and close proximity to human populations; Pacaya (elev. 2,552 m), which erupted in May 2010 causing an ashfall on Guatemala City and prompting evacuations, is one of the country's most active volcanoes with frequent eruptions since 1965; other historically active volcanoes include Acatenango, Almolonga, Atitlan, Fuego, and Tacana

Environment—current issues: deforestation in the Peten rainforest; soil erosion; water pollution

Environment—international agreements:

party to: Antarctic Treaty, Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Endangered Species, Environmental Modification, Hazardous Wastes, Law of the Sea, Marine Dumping, Ozone Layer Protection, Ship Pollution, Wetlands, Whaling

signed, but not ratified: none of the selected agreements

PEOPLE AND SOCIETY

Nationality: *noun*: Guatemalan(s)

adjective: Guatemalan

Ethnic groups: Mestizo (mixed Amerindian-Spanish—in local Spanish called Ladino) and European 59.4%, K'iche 9.1%, Kaqchikel 8.4%, Mam 7.9%, Q'eqchi 6.3%, other Mayan 8.6%, indigenous non-Mayan 0.2%, other 0.1% (2001 census)

Languages: Spanish (official) 60%, Amerindian languages 40%

note: there are 23 officially recognized Amerindian languages, including Quiche, Cakchiquel, Kekchi, Mam, Garifuna, and Xinca

Religions: Roman Catholic, Protestant, indigenous Mayan beliefs

Demographic profile: Guatemala is a predominantly poor country that

struggles in several areas of health and development, including infant, child, and maternal mortality, malnutrition, literacy, and contraceptive awareness and use. The large indigenous population is disproportionately affected. Guatemala is the most populous country in Central America and has the highest fertility rate in Latin America. It also has the highest population growth rate in Latin America, which is likely to continue in the long term because of its large reproductive-age population and high birth rate. Almost half of Guatemala's population is under age 19, making it the youngest population in Latin America. Guatemala's total fertility rate has slowly declined during the last few decades due in part to limited government-funded health programs. However, the birth rate is still more than three children per woman and is markedly higher among its rural and indigenous populations. Guatemalans have a history of emigrating legally and illegally to Mexico, the United States, and Canada because of a lack of economic opportunity, political instability, and natural disasters. Emigration, primarily to the United States, escalated during the 1960-1996 civil war and accelerated after a peace agreement was signed. Thousands of Guatemalans who fled to Mexico returned after the war, but labor migration to southern Mexico continues.

ECONOMY

Economy—overview: Guatemala is the most populous country in Central America with a GDP per capita roughly one-half that of the average for Latin America and the Caribbean. The agricultural sector accounts for 13.5% of GDP and 38% of the labor force; key agricultural exports include coffee, sugar, bananas, and vegetables. The 1996 peace accords, which ended 36 years of civil war, removed a major obstacle to foreign investment, and since then Guatemala has pursued important reforms and macroeconomic stabilization. The Dominican Republic-Central American Free Trade Agreement (CAFTA-DR) entered into force in July 2006 spurring increased investment and diversification of exports, with the largest increases in ethanol and non-traditional agricultural exports. While CAFTA-DR has helped improve the investment climate, concerns over security, the lack of skilled workers and poor infrastructure continue to hamper foreign direct investment. The distribution of income remains highly unequal with the richest 20% of the population accounting for more than 51% of Guatemala's overall consumption. More than half of the population is below the national poverty line and 13% of the population lives in extreme poverty. Poverty among indigenous groups, which make up about 40% of the population, averages 73% and extreme poverty rises to 28%. Nearly one-half of Guatemala's children under age five are chronically malnourished, one of the highest malnutrition rates in the world. Given Guatemala's large expatriate community in the United States, it is the top remittance recipient in Central America, with inflows serving as a primary source of foreign income equivalent to nearly two-fifths of exports or one-tenth of GDP.

TRANSNATIONAL ISSUES

Disputes—international: annual ministerial meetings under the Organization of American States-initiated Agreement on the Framework for Negotiations and Confidence Building Measures continue to address Guatemalan land and maritime claims in Belize and the Caribbean Sea; Guatemala persists in its territorial claim to half of Belize, but agrees to Line of Adjacency to keep Guatemalan squatters out of Belize's forested interior; both countries agreed in April 2012 to hold simultaneous referenda,

scheduled for 6 October 2013, to decide whether to refer the dispute to the ICJ for binding resolution; Mexico must deal with thousands of impoverished Guatemalans and other Central Americans who cross the porous border looking for work in Mexico and the United States

Refugees and internally displaced persons:

IDPs: undetermined (more than three decades of internal conflict that ended in 1996 displaced mainly the indigenous Maya population and rural peasants; ongoing drug cartel and gang violence) (2011)

Illicit drugs: major transit country for cocaine and heroin; in 2005, cultivated 100 hectares of opium poppy after reemerging as a potential source of opium in 2004; potential production of less than 1 metric ton of pure heroin; marijuana cultivation for mostly domestic consumption; proximity to Mexico makes Guatemala a major staging area for drugs (particularly for cocaine); money laundering is a serious problem; corruption is a major problem

GUERNSEY

INTRODUCTION

Background: Guernsey and the other Channel Islands represent the last remnants of the medieval Dukedom of Normandy, which held sway in both France and England. The islands were the only British soil occupied by German troops in World War II. Guernsey is a British crown dependency but is not part of the UK or of the European Union. However, the UK Government is constitutionally responsible for its defense and international representation.

ECONOMY

Economy—overview: Financial services—banking, fund management, insurance—account for about 23% of employment and about 55% of total income in this tiny, prosperous Channel Island economy. Tourism, manufacturing, and horticulture, mainly tomatoes and cut flowers, have been declining. Financial services, construction, retail, and the public sector have been growing. Light tax and death duties make Guernsey a popular tax

haven. In January 2013, Guernsey signed a tax agreement with Jersey and the Isle of Man, in order to enable the islands' authorities to end tax avoidance and evasion. The evolving economic integration of the EU nations is changing the environment under which Guernsey operates.

GUINEA

INTRODUCTION

Background: Guinea is at a turning point after decades of authoritarian rule since gaining its independence from France in 1958. Guinea held its first free and competitive democratic presidential and legislative elections in 2010 and 2013 respectively. Alpha CONDE was elected to a five year term as president in 2010, and the National Assembly was seated in January 2014. CONDE's cabinet is the first all-civilian government in Guinea. Previously, Sekou TOURE ruled the country as president from independence to his death in 1984. Lansana CONTE came to power in 1984 when the military seized the government after TOURE's death. Gen. CONTE organized and won presidential elections in 1993, 1998, and 2003, though all the polls were rigged. Upon CONTE's death in December 2008, Capt. Moussa Dadis

CAMARA led a military coup, seizing power and suspending the constitution. His unwillingness to yield to domestic and international pressure to step down led to heightened political tensions that culminated in September 2009 when presidential guards opened fire on an opposition rally killing more than 150 people, and in early December 2009 when CAMARA was wounded in an assassination attempt and exiled to Burkina Faso. A transitional government led by Gen. Sekouba KONATE paved the way for Guinea's transition to a fledgling democracy.

ECONOMY

Economy—overview: Guinea is a poor country that possesses major mineral, hydropower, solar power, and agricultural resources. Guinea has historically been an exporter of agricultural commodities, but in recent years has shifted to importing the majority of food crops. Bauxite is Guinea's main mineral resource as well as its main source of foreign currency. Guinea is the second largest producer of bauxite in the world and has the largest reserves of bauxite, estimated at 29 billion tons. The country also has significant iron ore, gold, and diamond reserves. However, Guinea has been unable to profit from this potential, as rampant corruption, dilapidated infrastructure, and political uncertainty have drained investor confidence. In the time since a 2008 coup following the death of long-term President

Lansana CONTE, international donors, including the G-8, the IMF, and the World Bank, significantly curtailed their development programs but, following the December 2010 presidential elections, the IMF approved a new 3-year ECF arrangement in 2012. Guinea in September 2012 reached HIPC completion point status. Further international assistance and investment are contingent on the ability of the government to be transparent, combat corruption, reform its banking system, improve its business environment, and build infrastructure. International investors have expressed keen interest in Guinea's vast iron ore reserves, which could propel the country's growth. The government in April 2013 amended the September 2011 mining code to reduce taxes and royalties. Longer range plans to deploy broadband Internet throughout the country could spur economic growth as well. The biggest threats to Guinea's economy are political instability and low international commodity prices.

TRANSNATIONAL ISSUES

Disputes—international: conflicts among rebel groups, warlords, and youth gangs in neighboring states have spilled over into Guinea resulting in domestic instability; Sierra Leone considers Guinea's definition of the flood plain limits to define the left bank boundary of the Makona and Moa rivers excessive and protests Guinea's continued occupation of these lands, including the hamlet of Yenga, occupied since 1998

Refugees and internally displaced persons:

refugees (country of origin): 6,552 (Cote d'Ivoire) (2012)

Trafficking in persons: *current situation:* Guinea is a source, transit, and, to a lesser extent, a destination country for men, women, and children subjected to forced labor and sex trafficking; the majority of trafficking victims are Guinean children; Guinean girls are subjected to domestic servitude and commercial sexual exploitation, while boys are forced to beg, work as street vendors or shoe shiners, or miners; some Guinean children are forced to mine in Senegal, Mali, and possibly other West African countries; Guinean women and girls are subjected to domestic servitude and sex trafficking in Nigeria, Cote d'Ivoire, Benin, Senegal, Greece, and Spain, while Chinese and Vietnamese women are reportedly forced into prostitution in Guinea

tier rating: Tier 2 Watch List—Guinea does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; a new police unit has been created to focus on human trafficking and child labor; the government has initiated five new trafficking investigations but has failed to prosecute or convict any trafficking offenders, which represents a decrease in anti-trafficking law

enforcement over the previous year; the government fails to provide victims with protective services and has not supported NGOs that assist victims but continues to refer child victims to NGOs on an ad hoc basis; Guinean law does not prohibit all forms of trafficking, excluding, for example, forced prostitution of adults and debt bondage, which are not criminalized (2013)

GUINEA-BISSAU

INTRODUCTION

Background: Since independence from Portugal in 1974, Guinea-Bissau has experienced considerable political and military upheaval. In 1980, a military coup established authoritarian dictator Joao Bernardo ‘Nino’ VIEIRA as president. Despite setting a path to a market economy and multiparty system, VIEIRA’s regime was characterized by the suppression of political opposition and the purging of political rivals. Several coup attempts through the 1980s and early 1990s failed to unseat him. In 1994 VIEIRA was elected president in the country’s first free elections. A military mutiny and resulting civil war in 1998 eventually led to VIEIRA’s ouster in May 1999. In February 2000, a transitional government turned over power to opposition leader Kumba YALA after he was elected president in

transparent polling. In September 2003, after only three years in office, YALA was overthrown in a bloodless military coup, and businessman Henrique ROSA was sworn in as interim president. In 2005, former President VIEIRA was re-elected president pledging to pursue economic development and national reconciliation; he was assassinated in March 2009. Malam Bacai SANHA was elected in an emergency election held in June 2009, but he passed away in January 2012 from an existing illness. A military coup in April 2012 prevented Guinea-Bissau's second-round presidential election—to determine SANHA's successor—from taking place.

ECONOMY

Economy—overview: Guinea-Bissau’s legal economy is based on farming and fishing, but trafficking in narcotics is probably the most lucrative economic activity. The combination of limited economic prospects, a weak and faction-ridden government, and favorable geography have made this West African country a way station for drugs bound for Europe. Cashew nuts are the main source of income for rural communities and the country’s main export crop. Cashew sector performance helps to determine the overall macroeconomic situation of the country and food security status of rural areas. In 2013 cashew production and exports were disrupted as a result of the March 2012 coup. Guinea-Bissau is heavily reliant on foreign aid, which has not recovered to pre-coup levels.

TRANSNATIONAL ISSUES

Disputes—international: in 2006, political instability within Senegal's Casamance region resulted in thousands of Senegalese refugees, cross-border raids, and arms smuggling into Guinea-Bissau

Refugees and internally displaced persons:

refugees (country of origin): 7,700 (Senegal) (2012)

Trafficking in persons: *current situation:* Guinea-Bissau is a country of origin and destination for children subjected to forced labor and sex trafficking; the scope of the problem of trafficking women or men for forced labor or forced prostitution is unknown; boys reportedly are transported to southern Senegal for forced manual and agricultural labor; girls may be subjected to forced domestic service and child prostitution in Senegal and Guinea; both boys and girls are forced to work as street vendors in cities in Guinea-Bissau and Senegal

tier rating: Tier 3—the government of Guinea-Bissau does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; despite enacting an anti-trafficking law and finalizing and adopting a national action plan in 2011, authorities have not conducted any investigations or prosecutions of trafficking offenses; the government has not provided adequate protection to identified trafficking victims, conducted any tangible prevention activities in 2012, or made progress on the implementation of its national action plan (2013)

Illicit drugs: increasingly important transit country for South American cocaine en route to Europe; enabling environment for trafficker operations thanks to pervasive corruption; archipelago-like geography around the capital facilitates drug smuggling

GUYANA

INTRODUCTION

Background: Originally a Dutch colony in the 17th century, by 1815 Guyana had become a British possession. The abolition of slavery led to black settlement of urban areas and the importation of indentured servants from India to work the sugar plantations. The resulting ethnocultural divide has persisted and has led to turbulent politics. Guyana achieved independence from the UK in 1966, and since then it has been ruled mostly by socialist-oriented governments. In 1992, Cheddi JAGAN was elected president in what is considered the country's first free and fair election since independence. After his death five years later, his wife, Janet JAGAN, became president but resigned in 1999 due to poor health. Her successor, Bharrat JAGDEO, was reelected in 2001 and again in 2006. Donald

RAMOTAR was elected president in 2011.

PEOPLE AND SOCIETY

Nationality: noun: Guyanese (singular and plural)

adjective: Guyanese

Ethnic groups: East Indian 43.5%, black (African) 30.2%, mixed 16.7%, Amerindian 9.1%, other 0.5% (2002 census)

Languages: English, Amerindian dialects, Creole, Caribbean Hindustani (a dialect of Hindi), Urdu

Religions: Protestant 30.5% (Pentecostal 16.9%, Anglican 6.9%, Seventh-Day Adventist 5%, Methodist 1.7%), Hindu 28.4%, Roman Catholic 8.1%, Jehovah's Witnesses 1.1%, Muslim 7.2%, other Christian 17.7%, other 4.3%, none 4.3% (2002 census)

Demographic profile: Guyana is the only English-speaking country in South America and shares cultural and historical bonds with the Anglophone Caribbean. Guyana's two largest ethnic groups are the Afro-Guyanese (descendants of African slaves) and the Indo-Guyanese (descendants of Indian indentured laborers), which together comprise about three quarters of Guyana's population. Tensions periodically have boiled over between the two groups, which back ethnically based political parties and vote along ethnic lines. Poverty reduction has stagnated since the late 1990s. About one-third of the Guyanese population lives below the

poverty line; indigenous people are disproportionately affected. Although Guyana's literacy rate is reported to be among the highest in the Western Hemisphere, the level of functional literacy is considerably lower, which has been attributed to poor education quality, teacher training, and infrastructure. Guyana's emigration rate is among the highest in the world—more than 55% of its citizens reside abroad—and it is one of the largest recipients of remittances relative to GDP among Latin American and Caribbean countries. Although remittances are a vital source of income for most citizens, the pervasive emigration of skilled workers deprives Guyana of professionals in healthcare and other key sectors. More than 80% of Guyanese nationals with tertiary level educations have emigrated. Brain drain and the concentration of limited medical resources in Georgetown hamper Guyana's ability to meet the health needs of its predominantly rural population. Guyana has one of the highest HIV prevalence rates in the region and continues to rely on international support for its HIV treatment and prevention programs.

ECONOMY

Economy—overview: The Guyanese economy exhibited moderate economic growth in recent years and is based largely on agriculture and extractive industries. The economy is heavily dependent upon the export of six commodities—sugar, gold, bauxite, shrimp, timber, and rice—which represent nearly 60% of the country's GDP and are highly susceptible to adverse weather conditions and fluctuations in commodity prices. Guyana's entrance into the Caricom Single Market and Economy (CSME) in January 2006 has broadened the country's export market, primarily in the raw materials sector. Guyana has experienced positive growth almost every year over the past decade. Inflation has been kept under control. Recent years have seen the government's stock of debt reduced significantly—with external debt now less than half of what it was in the early 1990s. Chronic problems include a shortage of skilled labor and a deficient infrastructure. Despite recent improvements, the government is still juggling a sizable external debt against the urgent need for expanded public investment. In March 2007, the Inter-American Development Bank, Guyana's principal donor, canceled Guyana's nearly \$470 million debt, equivalent to 21% of GDP, which along with other Highly Indebted Poor Country (HIPC) debt forgiveness brought the debt-to-GDP ratio down from 183% in 2006 to 60% in 2013. Guyana had become heavily indebted as a result of the inward-looking, state-led development model pursued in the 1970s and 1980s. Much of Guyana's growth in recent years has come from a surge in gold production in response to global prices, although downward trends in gold prices may threaten future growth. In 2013, production of sugar dropped to a 23-year low.

TRANSNATIONAL ISSUES

Disputes—international: all of the area west of the Essequibo River is

claimed by Venezuela preventing any discussion of a maritime boundary; Guyana has expressed its intention to join Barbados in asserting claims before UN Convention on the Law of the Sea (UNCLOS) that Trinidad and Tobago's maritime boundary with Venezuela extends into their waters; Suriname claims a triangle of land between the New and Kutari/Koetari rivers in a historic dispute over the headwaters of the Courantyne; Guyana seeks arbitration under provisions of the UNCLOS to resolve the long-standing dispute with Suriname over the axis of the territorial sea boundary in potentially oil-rich waters

Trafficking in persons: current situation: Guyana is a source and destination country for men, women, and children subjected to sex trafficking and forced labor; Guyanese and foreign women and girls are forced into prostitution in Guyana; experts are concerned that Guyanese children are subjected to exploitive labor practices in the mining, agriculture, and forestry sectors; Indonesian workers are victims of forced labor on Guyanese-flagged fishing boats

tier rating: Tier 2 Watch List—Guyana does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; despite some progress in identifying and assisting some trafficking victims, the government has failed to increase its efforts to hold trafficking offenders accountable with jail time, creating an enabling environment for human trafficking; public comments from the government downplaying the scope of Guyana's trafficking problem diminishes the potential impact of its awareness campaigns; authorities operate a hotline for trafficking victims and conduct several awareness and sensitization sessions that target vulnerable communities (2013)

Illicit drugs: transshipment point for narcotics from South America—primarily Venezuela—to Europe and the US; producer of cannabis; rising money laundering related to drug trafficking and human smuggling

H

HAITI

INTRODUCTION

Background: The native Taino—who inhabited the island of Hispaniola when it was discovered by Christopher COLUMBUS in 1492—were virtually annihilated by Spanish settlers within 25 years. In the early 17th century, the French established a presence on Hispaniola. In 1697, Spain ceded to the French the western third of the island, which later became

Haiti. The French colony, based on forestry and sugar-related industries, became one of the wealthiest in the Caribbean but only through the heavy importation of African slaves and considerable environmental degradation. In the late 18th century, Haiti's nearly half million slaves revolted under Toussaint L'OUVERTURE. After a prolonged struggle, Haiti became the first post-colonial black-led nation in the world, declaring its independence in 1804. Currently the poorest country in the Western Hemisphere, Haiti has experienced political instability for most of its history. After an armed rebellion led to the forced resignation and exile of President Jean-Bertrand ARISTIDE in February 2004, an interim government took office to organize new elections under the auspices of the United Nations. Continued instability and technical delays prompted repeated postponements, but Haiti inaugurated a democratically elected president and parliament in May of 2006. This was followed by contested elections in 2010 that resulted in the election of Haiti's current President, Michel MARTELLY. A massive magnitude 7.0 earthquake struck Haiti in January 2010 with an epicenter about 25 km (15 mi) west of the capital, Port-au-Prince. Estimates are that over 300,000 people were killed and some 1.5 million left homeless. The earthquake was assessed as the worst in this region over the last 200 years.

ECONOMY

Economy—overview: Haiti is a free market economy that enjoys the advantages of low labor costs and tariff-free access to the US for many of its exports. Poverty, corruption, vulnerability to natural disasters, and low levels of education for much of the population are among Haiti’s most serious impediments to economic growth. Haiti’s economy suffered a severe setback in January 2010 when a 7.0 magnitude earthquake destroyed much of its capital city, Port-au-Prince, and neighboring areas. Currently the poorest country in the Western Hemisphere with 80% of the population living under the poverty line and 54% in abject poverty, the earthquake further inflicted \$7.8 billion in damage and caused the country’s GDP to contract. In 2011, the Haitian economy began recovering from the earthquake. However, two hurricanes adversely affected agricultural output and the low public capital spending slowed the recovery in 2012. Two-fifths of all Haitians depend on the agricultural sector, mainly small-scale subsistence farming, and remain vulnerable to damage from frequent natural disasters, exacerbated by the country’s widespread deforestation. US economic engagement under the Caribbean Basin Trade Preference Agreement (CBTPA) and the 2008 Haitian Hemispheric Opportunity through Partnership Encouragement (HOPE II) Act helped increase apparel exports and investment by providing duty-free access to the US. Congress voted in 2010 to extend the CBTPA and HOPE II until 2020 under the Haiti Economic Lift Program (HELP) Act; the apparel sector accounts for about 90% of Haitian exports and nearly one-twentieth of GDP. Remittances are the primary source of foreign exchange, equaling one-fifth of GDP and representing more than five times the earnings from exports in 2012. Haiti suffers from a lack of investment, partly because of weak infrastructure such as access to electricity. Haiti’s outstanding external debt was cancelled by donor countries following the 2010 earthquake, but has since risen to \$1.1 billion as of December 2013. The government relies on formal international

economic assistance for fiscal sustainability, with over half of its annual budget coming from outside sources. The MARTELLY administration in 2011 launched a campaign aimed at drawing foreign investment into Haiti as a means for sustainable development. To that end, the MARTELLY government in 2012 created a Commission for Commercial Code Reform, effected reforms to the justice sector, and inaugurated the Caracol industrial park in Haiti's north coast. In 2012, private investment exceeded donor assistance for the first time since the 2010 earthquake.

TRANSNATIONAL ISSUES

Disputes—international: since 2004, peacekeepers from the UN Stabilization Mission in Haiti have assisted in maintaining civil order in Haiti; the mission currently includes 6,685 military, 2,607 police, and 443 civilian personnel; despite efforts to control illegal migration, Haitians cross into the Dominican Republic and sail to neighboring countries; Haiti claims US-administered Navassa Island

Refugees and internally displaced persons:

IDPs: 137,000 (includes only IDPs from the 2010 earthquake living in camps or camp-like situations; information is lacking about IDPs living outside camps or who have left camps) (2014)

Trafficking in persons: current situation: Haiti is a source, transit, and

destination country for men, women, and children subjected to forced labor and sex trafficking; many of Haiti's trafficking cases involve children recruited to live with families in other towns in the hope of going to school but who instead become forced domestic servants known as restaveks; restaveks are vulnerable to abuse and make up a large proportion of Haiti's population of street children, who are forced into prostitution, begging, and street crime by violent gangs; Haitians are exploited in forced labor in the Dominican Republic, elsewhere in the Caribbean, and the US, and some Dominican women are forced into prostitution in Haiti; women and children living in camps for internally displaced people are at increased risk of sex trafficking and forced labor

tier rating: Tier 2 Watch List—Haiti does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; the government has made no discernible progress in prosecuting trafficking offenders largely because Haiti does not have a law specifically prohibiting human trafficking; the government does not provide direct or specialized services for trafficking victims and refers suspected victims to donor-funded NGOs, which provide shelter, food, medical, and psychosocial support; no proactive identification or assistance for adult victims was reported; an inter-ministerial working-group on human trafficking and a national commission for the elimination of the worst forms of child labor have been created (2013)

Illicit drugs: Caribbean transshipment point for cocaine en route to the US and Europe; substantial bulk cash smuggling activity; Colombian narcotics traffickers favor Haiti for illicit financial transactions; pervasive corruption; significant consumer of cannabis

HEARD ISLAND AND MCDONALD ISLANDS

INTRODUCTION

Background: The United Kingdom transferred these uninhabited, barren, sub-Antarctic islands to Australia in 1947. Populated by large numbers of seal and bird species, the islands have been designated a nature preserve.

GEOGRAPHY

Location: islands in the Indian Ocean, about two-thirds of the way from Madagascar to Antarctica

Geographic coordinates: 53 06 S, 72 31 E

Map references: Antarctic Region

Area: *total:* 412 sq km

country comparison to the world: 203

HOLY SEE (VATICAN CITY)

INTRODUCTION

Background: Popes in their secular role ruled portions of the Italian peninsula for more than a thousand years until the mid 19th century, when many of the Papal States were seized by the newly united Kingdom of Italy. In 1870, the pope's holdings were further circumscribed when Rome itself was annexed. Disputes between a series of "prisoner" popes and Italy were resolved in 1929 by three Lateran Treaties, which established the independent state of Vatican City and granted Roman Catholicism special status in Italy. In 1984, a concordat between the Holy See and Italy modified certain of the earlier treaty provisions, including the primacy of Roman Catholicism as the Italian state religion. Present concerns of the Holy See include religious freedom, threats against minority Christian communities

in Africa and the Middle East, sexual misconduct by clergy, international development, interreligious dialogue and reconciliation, and the application of church doctrine in an era of rapid change and globalization. About 1.2 billion people worldwide profess Catholicism—the world’s largest Christian faith.

ECONOMY

Economy—overview: The Holy See is supported financially by a variety of sources, including investments, real estate income, and donations from Catholic individuals, dioceses, and institutions; these help fund the Roman Curia (Vatican bureaucracy), diplomatic missions, and media outlets. Moreover, an annual collection taken up in dioceses and from direct donations go to a non-budgetary fund, known as Peter's Pence, which is used directly by the Pope for charity, disaster relief, and aid to churches in developing nations. Donations increased between 2010 and 2011. The separate Vatican City State budget includes the Vatican museums and post office and is supported financially by the sale of stamps, coins, medals, and tourist mementos; by fees for admission to museums; and by publication sales. Its revenues increased between 2010 and 2011 because of expanded opening hours and a growing number of visitors. However, the Holy See has not escaped the financial difficulties engulfing other European countries; in 2012 it started a spending review to determine where to cut costs to reverse its 2011 budget deficit of 15 million euros. Most public expenditures go to wages and other personnel costs; the incomes and living standards of lay workers are comparable to those of counterparts who work in the city of Rome.

HONDURAS

INTRODUCTION

Background: Once part of Spain's vast empire in the New World, Honduras became an independent nation in 1821. After two and a half decades of mostly military rule, a freely elected civilian government came to power in 1982. During the 1980s, Honduras proved a haven for anti-Sandinista contras fighting the Marxist Nicaraguan Government and an ally to Salvadoran Government forces fighting leftist guerrillas. The country was devastated by Hurricane Mitch in 1998, which killed about 5,600 people and caused approximately \$2 billion in damage. Since then, the economy has slowly rebounded.

per capita: 295.6 cu m/yr (2006)

Natural hazards: frequent, but generally mild, earthquakes; extremely

susceptible to damaging hurricanes and floods along the Caribbean coast

Environment—current issues: urban population expanding; deforestation results from logging and the clearing of land for agricultural purposes; further land degradation and soil erosion hastened by uncontrolled development and improper land use practices such as farming of marginal lands; mining activities polluting Lago de Yojoa (the country's largest source of fresh water), as well as several rivers and streams, with heavy metals

adjective: Honduran

Ethnic groups: mestizo (mixed Amerindian and European) 90%, Amerindian 7%, black 2%, white 1%

Languages: Spanish (official), Amerindian dialects

Religions: Roman Catholic 97%, Protestant 3%

Demographic profile: Honduras is one of the poorest countries in Latin America and has the world's highest murder rate. More than half of the population lives in poverty and per capita income is one of the lowest in the region. Poverty rates are higher among rural and indigenous people and in the south, west, and along the eastern border than in the north and central areas where most of Honduras' industries and infrastructure are concentrated. The increased productivity needed to break Honduras' persistent high poverty rate depends, in part, on further improvements in educational attainment. Although primary-school enrollment is near 100%, educational quality is poor, the drop-out rate and grade repetition remain high, and teacher and school accountability is low. Honduras' population

growth rate has slowed since the 1990s, but it remains high at nearly 2% annually because the birth rate averages approximately three children per woman and more among rural, indigenous, and poor women. Consequently, Honduras' young adult population—ages 15 to 29—is projected to continue growing rapidly for the next three decades and then stabilize or slowly shrink. Population growth and limited job prospects outside of agriculture will continue to drive emigration. Remittances represent about a fifth of GDP.

Population: 8,598,561 (July 2014 est.)

country comparison to the world: 94

note: estimates for this country explicitly take into account the effects of excess mortality due to AIDS; this can result in lower life expectancy, higher infant mortality, higher death rates, lower population growth rates, and changes in the distribution of population by age and sex than would otherwise be expected

Flag description: three equal horizontal bands of blue (top), white, and blue, with five blue, five-pointed stars arranged in an X pattern centered in

the white band; the stars represent the members of the former Federal Republic of Central America—Costa Rica, El Salvador, Guatemala, Honduras, and Nicaragua; the blue bands symbolize the Pacific Ocean and the Caribbean Sea; the white band represents the land between the two bodies of water and the peace and prosperity of its people

note: similar to the flag of El Salvador, which features a round emblem encircled by the words REPUBLICA DE EL SALVADOR EN LA AMERICA CENTRAL centered in the white band; also similar to the flag of Nicaragua, which features a triangle encircled by the words REPUBLICA DE NICARAGUA on top and AMERICA CENTRAL on the bottom, centered in the white band

National symbol(s): scarlet macaw; white-tailed deer

National anthem: *name:* “Himno Nacional de Honduras” (National Anthem of Honduras)

lyrics/music: Augusto Constanancio COELLO/Carlos HARTLING

note: adopted 1915; the anthem’s seven verses chronicle Honduran history; on official occasions, only the chorus and last verse are sung

ECONOMY

Economy—overview: Honduras, the second poorest country in Central America, suffers from extraordinarily unequal distribution of income, as well as high underemployment. While historically dependent on the export of bananas and coffee, Honduras has diversified its export base to include apparel and automobile wire harnessing. Nearly half of Honduras’s economic activity is directly tied to the US, with exports to the US accounting for 30% of GDP and remittances for another 20%. The US-Central America-Dominican Republic Free Trade Agreement (CAFTA-DR) came into force in 2006 and has helped foster foreign direct investment, but physical and political insecurity, as well as crime and perceptions of corruption, may deter potential investors; about 70% of FDI is from US firms. The economy registered modest economic growth of 3.0%-4.0% from 2010 to 2012, insufficient to improve living standards for the nearly 65% of the population in poverty. An 18-month IMF Standby Arrangement expired in March 2012 and was not renewed, due to the country’s growing budget deficit and weak current account performance. Public sector workers complained of not receiving their salaries in November and December 2012, and government suppliers are owed at least several hundred million dollars in unpaid contracts. The government announced in January 2013

that loss-making public enterprises will be forced to submit financial rescue plans before receiving their budget allotments for 2013.

TRANSNATIONAL ISSUES

Disputes—international: International Court of Justice (ICJ) ruled on the delimitation of “bolsones” (disputed areas) along the El Salvador-Honduras border in 1992 with final settlement by the parties in 2006 after an Organization of American States survey and a further ICJ ruling in 2003; the 1992 ICJ ruling advised a tripartite resolution to a maritime boundary in the Gulf of Fonseca with consideration of Honduran access to the Pacific; El Salvador continues to claim tiny Conejo Island, not mentioned in the ICJ ruling, off Honduras in the Gulf of Fonseca; Honduras claims the Belizean-administered Sapodilla Cays off the coast of Belize in its constitution, but agreed to a joint ecological park around the cays should Guatemala consent to a maritime corridor in the Caribbean under the OAS-sponsored 2002 *Belize-Guatemala Differendum*

Trafficking in persons: *current situation:* Honduras is a source and transit country for men, women, and children subjected to sex trafficking and forced labor; Honduran women and girls, and, to a lesser extent, women and girls from neighboring countries, are forced into prostitution in urban and tourist centers; Honduran women and girls are also exploited in sex trafficking in other countries in the region, including Mexico,

Guatemala, El Salvador, and the US; Honduran adults and children are subjected to forced labor in Guatemala, Mexico, and the US and domestically in agriculture and domestic service; gangs coerce some young men to transport drugs or be hit men

tier rating: Tier 2 Watch List—Honduras does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; the government maintains limited law enforcement efforts against child sex trafficking offenders but has held no offenders accountable for the forced labor or forced prostitution of adults; most trafficking offenders are prosecuted under non-trafficking statutes that prescribe lower penalties; government efforts to identify, refer, and assist trafficking victims are inadequate, and most services for victims are provided by NGOs without government funding (2013)

Illicit drugs: transshipment point for drugs and narcotics; illicit producer of cannabis, cultivated on small plots and used principally for local consumption; corruption is a major problem; some money-laundering activity

HONG KONG

INTRODUCTION

Background: Occupied by the UK in 1841, Hong Kong was formally ceded by China the following year; various adjacent lands were added later in the 19th century. Pursuant to an agreement signed by China and the UK on 19 December 1984, Hong Kong became the Hong Kong Special Administrative Region (SAR) of the People's Republic of China on 1 July 1997. In this agreement, China promised that, under its “one country, two systems” formula, China’s socialist economic system would not be imposed on Hong Kong and that Hong Kong would enjoy a “high degree of autonomy” in all matters except foreign and defense affairs for the subsequent 50 years.

Flag description: red with a stylized, white, five-petal Bauhinia flower in the center; each petal contains a small, red, five-pointed star in its middle; the red color is the same as that on the Chinese flag and represents the motherland; the fragrant Bauhinia—developed in Hong Kong the late 19th century—has come to symbolize the region; the five stars echo those on the flag of China

National symbol(s): orchid tree flower

National anthem: *note:* as a Special Administrative Region of China, “Yiyongjun Jinxingqu” is the official anthem (see China)

ECONOMY

Economy—overview: Hong Kong has a free market economy, highly dependent on international trade and finance—the value of goods and services trade, including the sizable share of re-exports, is about four times GDP. Hong Kong has no tariffs on imported goods, and it levies excise duties on only four commodities, whether imported or produced locally:

hard alcohol, tobacco, hydrocarbon oil, and methyl alcohol. There are no quotas or dumping laws. Hong Kong's open economy left it exposed to the global economic slowdown that began in 2008. Although increasing integration with China, through trade, tourism, and financial links, helped it to make an initial recovery more quickly than many observers anticipated, its continued reliance on foreign trade and investment leaves it vulnerable to renewed global financial market volatility or a slowdown in the global economy. The Hong Kong government is promoting the Special Administrative Region (SAR) as the site for Chinese renminbi (RMB) internationalization. Hong Kong residents are allowed to establish RMB-denominated savings accounts; RMB-denominated corporate and Chinese government bonds have been issued in Hong Kong; and RMB trade settlement is allowed. The territory far exceeded the RMB conversion quota set by Beijing for trade settlements in 2010 due to the growth of earnings from exports to the mainland. RMB quota set by Beijing for trade settlements in 2010 due to the growth of earnings from exports to the mainland. RMB deposits grew to roughly 12% of total system deposits in Hong Kong by the end of 2013. The government is pursuing efforts to introduce additional use of RMB in Hong Kong financial markets and is seeking to expand the RMB quota. The mainland has long been Hong Kong's largest trading partner, accounting for about half of Hong Kong's total trade by value. Hong Kong's natural resources are limited, and food and raw materials must be imported. As a result of China's easing of travel restrictions, the number of mainland tourists to the territory has surged from 4.5 million in 2001 to 34.9 million in 2012, outnumbering visitors from all other countries combined. Hong Kong has also established itself as the premier stock market for Chinese firms seeking to list abroad. In 2012 mainland Chinese companies constituted about 46.6% of the firms listed on the Hong Kong Stock Exchange and accounted for about 57.4% of the Exchange's market capitalization. During the past decade, as Hong Kong's manufacturing industry moved to the mainland, its service industry has grown rapidly. Credit expansion and tight housing supply conditions have caused Hong Kong property prices to rise rapidly; consumer prices increased by more than 4% in 2013. Lower and middle income segments of the population are increasingly unable to afford adequate housing. Hong Kong continues to link its currency closely to the US dollar, maintaining an arrangement established in 1983. In 2013, Hong Kong and China signed new agreements under the Closer Economic Partnership Agreement, adopted in 2003 to forge closer ties between Hong Kong and the mainland. The new measures, effective from January 2014, cover services and trade

facilitation, and will improve access to the mainland's service sector for Hong Kong-based companies.

HUNGARY

INTRODUCTION

Background: Hungary became a Christian kingdom in A.D. 1000 and for many centuries served as a bulwark against Ottoman Turkish expansion in Europe. The kingdom eventually became part of the polyglot Austro-Hungarian Empire, which collapsed during World War I. The country fell under communist rule following World War II. In 1956, a revolt and an announced withdrawal from the Warsaw Pact were met with a massive military intervention by Moscow. Under the leadership of Janos KADAR in 1968, Hungary began liberalizing its economy, introducing so-called “Goulash Communism.” Hungary held its first multiparty elections in 1990 and initiated a free market economy. It joined NATO in 1999 and the EU five years later. In 2011, Hungary assumed the six-month rotating presidency of the EU for the first time.

ECONOMY

Economy—overview: Hungary has made the transition from a centrally planned to a market economy, with a per capita income nearly two-thirds that of the EU-28 average. In late 2008, Hungary's impending inability to service its short-term debt—brought on by the global financial crisis - led Budapest to obtain an IMF/EU/World Bank-arranged financial assistance package worth over \$25 billion. The global economic downturn, declining exports, and low domestic consumption and fixed asset accumulation, dampened by government austerity measures, resulted in a severe economic contraction in 2009. In 2010 the new government implemented a number of changes including cutting business and personal income taxes, but imposed “crisis taxes” on financial institutions, energy and telecom companies, and retailers. The IMF/EU bail-out program lapsed at the end of the year and was replaced by Post Program Monitoring and Article IV Consultations on overall economic and fiscal processes. At the end of 2011 the government turned to the IMF and the EU to obtain financial backstop to support its efforts to refinance foreign currency debt and bond obligations in 2012 and beyond, but Budapest's rejection of EU and IMF economic policy recommendations led to a breakdown in talks with the lenders in late 2012. Global demand for high yield has since helped Hungary to obtain funds on international markets. Hungary's progress reducing its deficit to under 3% of GDP led the European Commission in 2013 to permit Hungary for the first time since joining the EU in 2004 to exit the Excessive Deficit Procedure.

ICELAND

INTRODUCTION

Background: Settled by Norwegian and Celtic (Scottish and Irish) immigrants during the late 9th and 10th centuries A.D., Iceland boasts the world's oldest functioning legislative assembly, the Althing, established in 930. Independent for over 300 years, Iceland was subsequently ruled by

Norway and Denmark. Fallout from the Askja volcano of 1875 devastated the Icelandic economy and caused widespread famine. Over the next quarter century, 20% of the island's population emigrated, mostly to Canada and the US. Denmark granted limited home rule in 1874 and complete independence in 1944. The second half of the 20th century saw substantial economic growth driven primarily by the fishing industry. The economy diversified greatly after the country joined the European Economic Area in 1994, but Iceland was especially hard hit by the global financial crisis in the years following 2008. Literacy, longevity, and social cohesion are first rate by world standards.

GEOGRAPHY

Location: Northern Europe, island between the Greenland Sea and the North Atlantic Ocean, northwest of the United Kingdom

Geographic coordinates: 65 00 N, 18 00 W

ECONOMY

Economy—overview: Iceland's Scandinavian-type social-market economy combines a capitalist structure and free-market principles with an extensive welfare system. Prior to the 2008 crisis, Iceland had achieved high growth, low unemployment, and a remarkably even distribution of income. The economy depends heavily on the fishing industry, which provides 40% of export earnings, more than 12% of GDP, and employs nearly 5% of the work force. It remains sensitive to declining fish stocks as well as to fluctuations in world prices for its main exports: fish and fish products, aluminum, and ferrosilicon. Iceland's economy has been diversifying into manufacturing and service industries in the last decade, particularly within the fields of software production, biotechnology, and tourism. In fall 2013,

the Icelandic government approved a joint application by Icelandic, Chinese and Norwegian energy firms to conduct oil exploration off Iceland's northeast coast. Abundant geothermal and hydropower sources have attracted substantial foreign investment in the aluminum sector, boosted economic growth, and sparked some interest from high-tech firms looking to establish data centers using cheap green energy, although the financial crisis has put several investment projects on hold. Much of Iceland's economic growth in recent years came as the result of a boom in domestic demand following the rapid expansion of the country's financial sector. Domestic banks expanded aggressively in foreign markets, and consumers and businesses borrowed heavily in foreign currencies, following the privatization of the banking sector in the early 2000s. Worsening global financial conditions throughout 2008 resulted in a sharp depreciation of the krona vis-a-vis other major currencies. The foreign exposure of Icelandic banks, whose loans and other assets totaled more than 10 times the country's GDP, became unsustainable. Iceland's three largest banks collapsed in late 2008. The country secured over \$10 billion in loans from the IMF and other countries to stabilize its currency and financial sector, and to back government guarantees for foreign deposits in Icelandic banks. GDP fell 6.8% in 2009, and unemployment peaked at 9.4% in February 2009. Since the collapse of Iceland's financial sector, government economic priorities have included: stabilizing the krona, implementing capital controls, reducing Iceland's high budget deficit, containing inflation, addressing high household debt, restructuring the financial sector, and diversifying the economy. Three new banks were established to take over the domestic assets of the collapsed banks. Two of them have foreign majority ownership, while the State holds a majority of the shares of the third. Iceland began making payments to the UK, the Netherlands, and other claimants in late 2011 following Iceland's Supreme Court ruling that upheld 2008 emergency legislation that gives priority to depositors for compensation from failed Icelandic banks. Iceland owes British and Dutch authorities approximately \$5.5 billion for compensating British and Dutch citizens who lost deposits in Icesave when parent bank Landsbanki failed in 2008. Iceland began accession negotiations with the EU in July 2010, but decided in mid-2013 to suspend negotiations with the EU because of concern about losing control over fishing resources and worries over the ongoing Eurozone crisis.

INDIA

INTRODUCTION

Background: The Indus Valley civilization, one of the world's oldest, flourished during the 3rd and 2nd millennia B.C. and extended into northwestern India. Aryan tribes from the northwest infiltrated the Indian subcontinent about 1500 B.C.; their merger with the earlier Dravidian inhabitants created the classical Indian culture. The Maurya Empire of the 4th and 3rd centuries B.C.—which reached its zenith under ASHOKA—united much of South Asia. The Golden Age ushered in by the Gupta dynasty (4th to 6th centuries A.D.) saw a flowering of Indian science, art, and culture. Islam spread across the subcontinent over a period of 700 years. In the 10th and 11th centuries, Turks and Afghans invaded India and established the Delhi Sultanate. In the early 16th century, the Emperor

BABUR established the Mughal Dynasty which ruled India for more than three centuries. European explorers began establishing footholds in India during the 16th century. By the 19th century, Great Britain had become the dominant political power on the subcontinent. The British Indian Army played a vital role in both World Wars. Years of nonviolent resistance to British rule, led by Mohandas GANDHI and Jawaharlal NEHRU, eventually resulted in Indian independence, which was granted in 1947. Large-scale communal violence took place before and after the subcontinent partition into two separate states—India and Pakistan. The neighboring nations have fought three wars since independence, the last of which was in 1971 and resulted in East Pakistan becoming the separate nation of Bangladesh. India's nuclear weapons tests in 1998 emboldened Pakistan to conduct its own tests that same year. In November 2008, terrorists originating from Pakistan conducted a series of coordinated attacks in Mumbai, India's financial capital. Despite pressing problems such as significant overpopulation, environmental degradation, extensive poverty, and widespread corruption, economic growth following the launch of economic reforms in 1991 and a massive youthful population are driving India's emergence as a regional and global power.

ECONOMY

Economy—overview: India is developing into an open-market economy, yet traces of its past autarkic policies remain. Economic liberalization measures, including industrial deregulation, privatization of state-owned enterprises, and reduced controls on foreign trade and investment, began in the early 1990s and served to accelerate the country's growth, which averaged under 7% per year from 1997 to 2011. India's diverse economy encompasses traditional village farming, modern agriculture, handicrafts, a wide range of modern industries, and a multitude of services. Slightly less than half of the work force is in agriculture, but, services are the major source of economic growth, accounting for nearly two-thirds of India's

output with less than one-third of its labor force. India has capitalized on its large educated English-speaking population to become a major exporter of information technology services, business outsourcing services, and software workers. India's economic growth began slowing in 2011 because of a decline in investment, caused by high interest rates, rising inflation, and investor pessimism about the government's commitment to further economic reforms and about the global situation. In late 2012, the Indian Government announced additional reforms and deficit reduction measures, including allowing higher levels of foreign participation in direct investment in the economy. The outlook for India's long-term growth is moderately positive due to a young population and corresponding low dependency ratio, healthy savings and investment rates, and increasing integration into the global economy. However, India has many challenges that it has yet to fully address, including poverty, corruption, violence and discrimination against women and girls, an inefficient power generation and distribution system, ineffective enforcement of intellectual property rights, decades-long civil litigation dockets, inadequate transport and agricultural infrastructure, limited non-agricultural employment opportunities, high spending and poorly-targeted subsidies, inadequate availability of quality basic and higher education, and accommodating rural-to-urban migration. Growth in 2013 fell to a decade low based on weak fundamentals, and India's economic leaders are now struggling to improve the country's wide fiscal and current account deficits. Improving conditions in Western countries have led investors to shift investment away from India and prompted a severe depreciation in the rupee.

Telephone system: *general assessment:* supported by recent deregulation and liberalization of telecommunications laws and policies, India has emerged as one of the fastest growing telecom markets in the world; total telephone subscribership base exceeded 900 million in 2011, an overall teledensity of roughly 75%, and subscribership is currently growing more than 20 million per month; urban teledensity now exceeds 100% and rural teledensity is steadily growing

domestic: mobile cellular service introduced in 1994 and organized nationwide into four metropolitan areas and 19 telecom circles each with multiple private service providers and one or more state-owned service providers; in recent years significant trunk capacity added in the form of fiber-optic cable and one of the world's largest domestic satellite systems, the Indian National Satellite system (INSAT), with 6 satellites supporting 33,000 very small aperture terminals (VSAT)

international: country code—91; a number of major international submarine cable systems, including Sea-Me-We-3 with landing sites at Cochin and Mumbai (Bombay), Sea-Me-We-4 with a landing site at Chennai, Fiber-Optic Link Around the Globe (FLAG) with a landing site at Mumbai (Bombay), South Africa—Far East (SAFE) with a landing site at Cochin, the i2i cable network linking to Singapore with landing sites at Mumbai (Bombay) and Chennai (Madras), and Tata Indicom linking Singapore and Chennai (Madras), provide a significant increase in the

bandwidth available for both voice and data traffic; satellite earth stations—8 Intelsat (Indian Ocean) and 1 Inmarsat (Indian Ocean region); 9 gateway exchanges operating from Mumbai (Bombay), New Delhi, Kolkata (Calcutta), Chennai (Madras), Jalandhar, Kanpur, Gandhinagar, Hyderabad, and Ernakulam (2011)

Broadcast media: Doordarshan, India's public TV network, operates about 20 national, regional, and local services; a large and increasing number of privately owned TV stations are distributed by cable and satellite service providers; by 2011, more than 100 million homes had access to cable and satellite TV offering more than 700 TV channels; government controls AM radio with All India Radio operating domestic and external networks; news broadcasts via radio are limited to the All India Radio Network; since 2000, privately-owned FM stations have been permitted and their numbers have increased rapidly (2007)

TRANSNATIONAL ISSUES

Disputes—international: since China and India launched a security and foreign policy dialogue in 2005, consolidated discussions related to the dispute over most of their rugged, militarized boundary, regional nuclear proliferation, Indian claims that China transferred missiles to Pakistan, and other matters continue; Kashmir remains the site of the world's largest and most militarized territorial dispute with portions under the de facto administration of China (Aksai Chin), India (Jammu and Kashmir), and Pakistan (Azad Kashmir and Northern Areas); India and Pakistan resumed bilateral dialogue in February 2011 after a two-year hiatus, have maintained the 2003 cease-fire in Kashmir, and continue to have disputes over water sharing of the Indus River and its tributaries; UN Military Observer Group in India and Pakistan has maintained a small group of peacekeepers since 1949; India does not recognize Pakistan's ceding historic Kashmir lands to China in 1964; to defuse tensions and prepare for discussions on a maritime boundary, India and Pakistan seek technical resolution of the disputed boundary in Sir Creek estuary at the mouth of the Rann of Kutch in the Arabian Sea; Pakistani maps continue to show its Junagadh claim in Indian Gujarat State; Prime Minister Singh's September 2011 visit to Bangladesh resulted in the signing of a Protocol to the 1974 Land Boundary Agreement between India and Bangladesh, which had called for the settlement of longstanding boundary disputes over undemarcated areas and the exchange of territorial enclaves, but which had never been implemented; Bangladesh referred its maritime boundary claims with Burma and India to the

International Tribunal on the Law of the Sea; Joint Border Committee with Nepal continues to examine contested boundary sections, including the 400 square kilometer dispute over the source of the Kalapani River; India maintains a strict border regime to keep out Maoist insurgents and control illegal cross-border activities from Nepal

Refugees and internally displaced persons:

refugees (country of origin): 100,003 (Tibet/China); 67,165 (Sri Lanka); 9,633 (Afghanistan); 7,671 (Burma) (2012)

IDPs: at least 540,000 (about 250,000 are Kashmiri Pandits from Jammu and Kashmir) (2012)

Illicit drugs: world's largest producer of licit opium for the pharmaceutical trade, but an undetermined quantity of opium is diverted to illicit international drug markets; transit point for illicit narcotics produced in neighboring countries and throughout Southwest Asia; illicit producer of methaqualone; vulnerable to narcotics money laundering through the hawala system; licit ketamine and precursor production

INDIAN OCEAN

INTRODUCTION

Background: The Indian Ocean is the third largest of the world's five oceans (after the Pacific Ocean and Atlantic Ocean, but larger than the Southern Ocean and Arctic Ocean). Four critically important access waterways are the Suez Canal (Egypt), Bab el Mandeb (Djibouti-Yemen), Strait of Hormuz (Iran-Oman), and Strait of Malacca (Indonesia-Malaysia). The decision by the International Hydrographic Organization in the spring of 2000 to delimit a fifth ocean, the Southern Ocean, removed the portion of the Indian Ocean south of 60 degrees south latitude.

GEOGRAPHY

Location: body of water between Africa, the Southern Ocean, Asia, and

Australia

Geographic coordinates: 20 00 S, 80 00 E

Map references: Political Map of the World

Area: *total:* 68.556 million sq km

note: includes Andaman Sea, Arabian Sea, Bay of Bengal, Flores Sea, Great Australian Bight, Gulf of Aden, Gulf of Oman, Java Sea, Mozambique Channel, Persian Gulf, Red Sea, Savu Sea, Strait of Malacca, Timor Sea, and other tributary water bodies

Area—comparative: about 5.5 times the size of the US

Coastline: 66,526 km

Climate: northeast monsoon (December to April), southwest monsoon (June to October); tropical cyclones occur during May/June and October/November in the northern Indian Ocean and January/February in the southern Indian Ocean

Terrain: surface dominated by counterclockwise gyre (broad, circular system of currents) in the southern Indian Ocean; unique reversal of surface currents in the northern Indian Ocean; low atmospheric pressure over southwest Asia from hot, rising, summer air results in the southwest monsoon and southwest-to-northeast winds and currents, while high pressure over northern Asia from cold, falling, winter air results in the northeast monsoon and northeast-to-southwest winds and currents; ocean floor is dominated by the Mid-Indian Ocean Ridge and subdivided by the Southeast Indian Ocean Ridge, Southwest Indian Ocean Ridge, and Ninetyeast Ridge

Elevation extremes: *lowest point:* Java Trench -7,258 m

highest point: sea level 0 m

Natural resources: oil and gas fields, fish, shrimp, sand and gravel aggregates, placer deposits, polymetallic nodules

Natural hazards: occasional icebergs pose navigational hazard in southern reaches

Environment—current issues: endangered marine species include the dugong, seals, turtles, and whales; oil pollution in the Arabian Sea, Persian Gulf, and Red Sea

Geography—note: major chokepoints include Bab el Mandeb, Strait of

Hormuz, Strait of Malacca, southern access to the Suez Canal, and the Lombok Strait

ECONOMY

Economy—overview: The Indian Ocean provides major sea routes connecting the Middle East, Africa, and East Asia with Europe and the Americas. It carries a particularly heavy traffic of petroleum and petroleum products from the oilfields of the Persian Gulf and Indonesia. Its fish are of great and growing importance to the bordering countries for domestic consumption and export. Fishing fleets from Russia, Japan, South Korea, and Taiwan also exploit the Indian Ocean, mainly for shrimp and tuna. Large reserves of hydrocarbons are being tapped in the offshore areas of Saudi Arabia, Iran, India, and western Australia. An estimated 40% of the world's offshore oil production comes from the Indian Ocean. Beach sands rich in heavy minerals and offshore placer deposits are actively exploited by bordering countries, particularly India, South Africa, Indonesia, Sri Lanka, and Thailand.

TRANSPORTATION

Ports and terminals: *major seaport(s):* Chennai (Madras, India); Colombo (Sri Lanka); Durban (South Africa); Jakarta (Indonesia); Kolkata (Calcutta, India); Melbourne (Australia); Mumbai (Bombay, India); Richards Bay (South Africa)

Transportation—note: although the number of reported incidents of piracy have dropped dramatically in 2012, the International Maritime Bureau continues to report the territorial waters of littoral states and offshore waters as high risk for piracy and armed robbery against ships, particularly in the Gulf of Aden, along the east coast of Africa, the Bay of Bengal, and the Strait of Malacca; the presence of several naval task forces in the Gulf of Aden and additional anti-piracy measures on the part of ship operators, including the use of on-board armed security teams, have reduced incidents of piracy; in response, Somali-based pirates, using hijacked fishing trawlers as “mother ships” to extend their range, shifted operations as far south as the Mozambique Channel, eastward to the vicinity of the Maldives, and northeastward to the Strait of Hormuz

Disputes—international: some maritime disputes (see littoral states)

INDONESIA

INTRODUCTION

Background: The Dutch began to colonize Indonesia in the early 17th century; Japan occupied the islands from 1942 to 1945. Indonesia declared its independence shortly before Japan's surrender, but it required four years of sometimes brutal fighting, intermittent negotiations, and UN mediation before the Netherlands agreed to transfer sovereignty in 1949. A period of sometimes unruly parliamentary democracy ended in 1957 when President SOEKARNO declared martial law and instituted "Guided Democracy." After an abortive coup in 1965 by alleged communist sympathizers, SOEKARNO was gradually eased from power. From 1967 until 1988, President SUHARTO ruled Indonesia with his "New Order" government. After rioting toppled Suharto in 1998, free and fair legislative elections took place in 1999. Indonesia is now the world's third most populous democracy, the world's largest archipelagic state, and the world's largest Muslim-majority nation. Current issues include: alleviating poverty, improving education, preventing terrorism, consolidating democracy after four decades of authoritarianism, implementing economic and financial reforms, stemming corruption, reforming the criminal justice system, holding the military and police accountable for human rights violations, addressing climate change, and controlling infectious diseases, particularly those of

global and regional importance. In 2005, Indonesia reached a historic peace agreement with armed separatists in Aceh, which led to democratic elections in Aceh in December 2006. Indonesia continues to face low intensity armed resistance in Papua by the separatist Free Papua Movement.

GEOGRAPHY

Location: Southeastern Asia, archipelago between the Indian Ocean and the Pacific Ocean

ECONOMY

Economy—overview: Indonesia, a vast polyglot nation, has grown strongly since 2010. During the global financial crisis, Indonesia outperformed its regional neighbors and joined China and India as the only G20 members posting growth. The government has promoted fiscally conservative policies, resulting in a debt-to-GDP ratio of less than 25% and historically low rates of inflation. Fitch and Moody's upgraded Indonesia's credit rating to investment grade in December 2011. Indonesia still struggles with poverty and unemployment, inadequate infrastructure, corruption, a complex regulatory environment, and unequal resource distribution among regions. The government also faces the challenges of quelling labor unrest and reducing fuel subsidies in the face of high oil prices.

TRANSNATIONAL ISSUES

Disputes—international: Indonesia has a stated foreign policy objective of establishing stable fixed land and maritime boundaries with all of its neighbors; three stretches of land borders with Timor-Leste have yet to be delimited, two of which are in the Oecussi exclave area, and no maritime or Exclusive Economic Zone (EEZ) boundaries have been established between the countries; many refugees from Timor-Leste who left in 2003 still reside in Indonesia and refuse repatriation; all borders between Indonesia and Australia have been agreed upon bilaterally, but a 1997 treaty that would settle the last of their maritime and EEZ boundary has yet to be ratified by

Indonesia's legislature; Indonesian groups challenge Australia's claim to Ashmore Reef; Australia has closed parts of the Ashmore and Cartier Reserve to Indonesian traditional fishing and placed restrictions on certain catches; land and maritime negotiations with Malaysia are ongoing, and disputed areas include the controversial Tanjung Datu and Camar Wulan border area in Borneo and the maritime boundary in the Ambalat oil block in the Celebes Sea; Indonesia and Singapore continue to work on finalizing their 1973 maritime boundary agreement by defining unresolved areas north of Indonesia's Batam Island; Indonesian secessionists, squatters, and illegal migrants create repatriation problems for Papua New Guinea; maritime delimitation talks continue with Palau; EEZ negotiations with Vietnam are ongoing, and the two countries in Fall 2011 agreed to work together to reduce illegal fishing along their maritime boundary

Refugees and internally displaced persons:

IDPs: 180,000 (government offensives against rebels in Aceh; most IDPs in Aceh, Central Kalimantan, Central Sulawesi Provinces, and Maluku) (2011)

Illicit drugs: illicit producer of cannabis largely for domestic use; producer of methamphetamine and ecstasy

IRAN

INTRODUCTION

Background: Known as Persia until 1935, Iran became an Islamic republic in 1979 after the ruling monarchy was overthrown and Shah Mohammad Reza PAHLAVI was forced into exile. Conservative clerical forces led by Ayatollah Ruhollah KHOMEINI established a theocratic system of government with ultimate political authority vested in a learned religious scholar referred to commonly as the Supreme Leader who, according to the constitution, is accountable only to the Assembly of Experts—a popularly elected 86-member body of clerics. US-Iranian relations became strained when a group of Iranian students seized the US Embassy in Tehran in November 1979 and held embassy personnel hostages until mid-January 1981. The US cut off diplomatic relations with Iran in April 1980. During

the period 1980-88, Iran fought a bloody, indecisive war with Iraq that eventually expanded into the Persian Gulf and led to clashes between US Navy and Iranian military forces. Iran has been designated a state sponsor of terrorism for its activities in Lebanon and elsewhere in the world and remains subject to US, UN, and EU economic sanctions and export controls because of its continued involvement in terrorism and concerns over possible military dimensions of its nuclear program. Following the election of reformer Hojjat ol-Eslam Mohammad KHATAMI as president in 1997 and a reformist Majles (legislature) in 2000, a campaign to foster political reform in response to popular dissatisfaction was initiated. The movement floundered as conservative politicians, supported by the Supreme Leader, unelected institutions of authority like the Council of Guardians, and the security services reversed and blocked reform measures while increasing security repression. Starting with nationwide municipal elections in 2003 and continuing through Majles elections in 2004, conservatives reestablished control over Iran's elected government institutions, which culminated with the August 2005 inauguration of hardliner Mahmud AHMADI-NEJAD as president. His controversial reelection in June 2009 sparked nationwide protests over allegations of electoral fraud. These protests were quickly suppressed, and the political opposition that arose as a consequence of AHMADI-NEJAD's election was repressed. Deteriorating economic conditions due primarily to government mismanagement and international sanctions prompted at least two major economically based protests in July and October 2012, but Iran's internal security situation remained stable. President AHMADI-NEJAD's independent streak angered regime establishment figures, including the Supreme Leader, leading to conservative opposition to his agenda for the last year of his presidency, and an alienation of his political supporters. In June 2013 Iranians elected a moderate conservative cleric, Dr. Hasan Fereidun RUHANI to the presidency. He is a long-time senior member in the regime, but has made promises of reforming society and Iran's foreign policy. The UN Security Council has passed a number of resolutions calling for Iran to suspend its uranium enrichment and reprocessing activities and comply with its IAEA obligations and responsibilities, but in November 2013 the five permanent members, plus Germany, (P5+1) signed a joint plan with Iran to provide the country with incremental relief from international pressure for positive steps toward transparency of their nuclear program.

Executive branch: *chief of state:* Supreme Leader Ali Hoseini-KHAMENEI (since 4 June 1989)

head of government: President Hasan Fereidun RUHANI (since 3 August 2013); First Vice President Eshaq JAHANGIRI (since 5 August 2013)

cabinet: Council of Ministers selected by the president with legislative approval; the Supreme Leader has some control over appointments to the more sensitive ministries (For more information visit the World Leaders website)

note: also considered part of the Executive branch of government are three oversight bodies: 1) Council of Guardians of the Constitution or Council of Guardians or Guardians Council (Shora-ye Negban-e Qanon-e Asasi) determines whether proposed legislation is both constitutional and faithful to Islamic law, vets candidates in popular elections for suitability, and supervises national elections; 2) Assembly of Experts (Majles-e Khoebregan), an elected consultative body of senior clerics constitutionally mandated to select, appoint, supervise, and dismiss the Supreme Leader; 3) Expediency Council or the Council for the Discernment of Expediency (Majma-ye- Tashkhis-e -Maslahat-e- Nezam) resolves legislative issues when the Majles and the Council of Guardians disagree and since 1989 has been used to advise national religious leaders on matters of national policy; in 2005 the Council's powers were expanded to act as a supervisory body for the government

elections: supreme leader appointed for life by the Assembly of Experts; president elected by popular vote for a four-year term (eligible for a second term and additional nonconsecutive term); election last held on 14 June 2013 (next presidential election to be held in June 2017)

subordinate courts: Penal Courts I and II; Islamic Revolutionary Courts; Courts of Peace; Special Clerical Court (functions outside the judicial

system and handles cases involving clerics); military courts

Political parties and leaders:

note: formal political parties are a relatively new phenomenon in Iran and most conservatives still prefer to work through political pressure groups rather than parties; often political parties or coalitions are formed prior to elections and disbanded soon thereafter; a loose pro-reform coalition called the 2nd Khordad Front, which includes political parties as well as less formal groups and organizations, achieved considerable success in elections for the sixth Majles in early 2000; groups in the coalition included the Islamic Iran Participation Front (IIPF), Executives of Construction Party (Kargozaran), Solidarity Party, Islamic Labor Party, Mardom Salari, Mojahedin of the Islamic Revolution Organization (MIRO), and Militant Clerics Society (MCS; Ruhaniyun); the coalition participated in the seventh Majles elections in early 2004 but boycotted them after 80 incumbent reformists were disqualified; following his defeat in the 2005 presidential elections, former MCS Secretary General and sixth Majles Speaker Mehdi KARUBI formed the National Trust Party; a new conservative group, Islamic Iran Developers Coalition (Abadgaran), took a leading position in the new Majles after winning a majority of the seats in February 2004; ahead of the 2008 Majles elections, traditional and hardline conservatives attempted to close ranks under the United Front of Principlists and the Broad Popular Coalition of Principlists; several reformist groups, such as the MIRO and the IIPF, also came together as a reformist coalition in advance of the 2008 Majles elections; the IIPF has repeatedly complained that the overwhelming majority of its candidates were unfairly disqualified from the 2008 elections

Political pressure groups and leaders: *groups that generally support the Islamic Republic:* Ansar-e Hizballah; Followers of the Line of the Imam and the Leader; Islamic Coalition Party (Motalefeh); Islamic Engineers Society; Tehran Militant Clergy Association (MCA; Ruhaniyat)

active pro-reform student group: Office of Strengthening Unity (OSU)

ECONOMY

Economy—overview: Iran’s economy is marked by statist policies, an inefficient state sector, and reliance on oil, a major source of government revenues. Price controls, subsidies, and other distortions weigh down the economy, undermining the potential for private-sector-led growth. Private sector activity is typically limited to small-scale workshops, farming, some manufacturing, and services. Significant informal market activity flourishes

and corruption is widespread. New fiscal and monetary constraints on Tehran, following the expansion of international sanctions in 2012 against Iran's Central Bank and oil exports, significantly reduced Iran's oil revenue, forced government spending cuts, and fueled a 60% currency depreciation. Economic growth turned negative in 2012 and 2013, for the first time in two decades. Iran continues to suffer from double-digit unemployment and underemployment. Lack of job opportunities has convinced many educated Iranian youth to seek jobs overseas, resulting in a significant "brain drain." However, the election of President Hasan RUHANI in June 2013 brought about widespread expectations of economic improvements and greater international engagement among the Iranian public, and early in Ruhani's term the country saw a strengthened national currency and a historic boost to market values at the Tehran Stock Exchange.

refugees (country of origin): 42,500 (Iraq) (2013); 2.4 million (1 million registered, 1.4 million undocumented) (Afghanistan) (2014)

Trafficking in persons: *current situation:* Iran is a presumed source, transit, and destination country for men, women, and children subjected to sex trafficking and forced labor; Iranian and Afghan boys and girls are forced into prostitution domestically; Iranian women are subjected to sex trafficking in Iran, Pakistan, the Persian Gulf, and Europe; Azerbaijani women and children are also sexually exploited in Iran; Afghan migrants and refugees and Pakistani men and women are subjected to conditions of forced labor in Iran; NGO reports indicate that criminal organizations play a significant role in human trafficking in Iran

tier rating: Tier 3—Iran does not comply with the minimum standards for the elimination of trafficking, and is not making significant efforts to do so; the government does not share information on its anti-trafficking efforts, making it difficult to assess the country's human trafficking problem or the government's attempts to curb it; NGOs report that laws against human trafficking, forced labor, and debt bondage remain unenforced because of a lack of political will and widespread political corruption; there is no evidence that the government has a process to identify trafficking victims, refers victims to protective services, or has made efforts to prevent human trafficking (2013)

Illicit drugs: despite substantial interdiction efforts and considerable control measures along the border with Afghanistan, Iran remains one of the primary transshipment routes for Southwest Asian heroin to Europe; suffers one of the highest opiate addiction rates in the world, and has an increasing problem with synthetic drugs; lacks anti-money laundering laws; has reached out to neighboring countries to share counter-drug intelligence

IRAQ

INTRODUCTION

Background: Formerly part of the Ottoman Empire, Iraq was occupied by Britain during the course of World War I; in 1920, it was declared a League of Nations mandate under UK administration. In stages over the next dozen years, Iraq attained its independence as a kingdom in 1932. A “republic” was proclaimed in 1958, but in actuality a series of strongmen ruled the country until 2003. The last was SADDAM Husayn. Territorial disputes with Iran led to an inconclusive and costly eight-year war (1980-88). In August 1990, Iraq seized Kuwait but was expelled by US-led, UN coalition forces during the Gulf War of January-February 1991. Following Kuwait’s liberation, the UN Security Council (UNSC) required Iraq to scrap all weapons of mass destruction and long-range missiles and to allow UN

verification inspections. Continued Iraqi noncompliance with UNSC resolutions over a period of 12 years led to the US-led invasion of Iraq in March 2003 and the ouster of the SADDAM Husayn regime. US forces remained in Iraq under a UNSC mandate through 2009 and under a bilateral security agreement thereafter, helping to provide security and to train and mentor Iraqi security forces. In October 2005, Iraqis approved a constitution in a national referendum and, pursuant to this document, elected a 275-member Council of Representatives (COR) in December 2005. The COR approved most cabinet ministers in May 2006, marking the transition to Iraq's first constitutional government in nearly a half century. In January 2009, Iraq held elections for provincial councils in all governorates except for the three governorates comprising the Kurdistan Regional Government and Kirkuk Governorate. Iraq held a national legislative election in March 2010—choosing 325 legislators in an expanded COR—and, after nine months of deadlock the COR approved the new government in December 2010. Nearly nine years after the start of the Second Gulf War in Iraq, US military operations there ended in mid-December 2011.

GEOGRAPHY

Location: Middle East, bordering the Persian Gulf, between Iran and Kuwait

Geographic coordinates: 33 00 N, 44 00 E

Map references: Middle East

Area: *total:* 438,317 sq km

country comparison to the world: 59

land: 437,367 sq km

Maritime claims: *territorial sea:* 12 nm

continental shelf: not specified

Climate: mostly desert; mild to cool winters with dry, hot, cloudless summers; northern mountainous regions along Iranian and Turkish borders experience cold winters with occasionally heavy snows that melt in early spring, sometimes causing extensive flooding in central and southern Iraq

Terrain: mostly broad plains; reedy marshes along Iranian border in south with large flooded areas;
mountains along borders with Iran and Turkey

Elevation extremes: *lowest point:* Persian Gulf 0 m
highest point: unnamed peak; 3,611 m; note—this peak is neither Gundah Zhur 3,607 m nor Kuh-e Hajji-Ebrahim 3,595 m

Natural hazards: dust storms; sandstorms; floods

Environment—current issues: government water control projects have drained most of the inhabited marsh areas east of An Nasiriyah by drying up or diverting the feeder streams and rivers; a once sizable population of Marsh Arabs, who inhabited these areas for thousands of years, has been displaced; furthermore, the destruction of the natural habitat poses serious threats to the area's wildlife populations; inadequate supplies of potable water; development of the Tigris and Euphrates rivers system contingent upon agreements with upstream riparian Turkey; air and water pollution; soil degradation (salination) and erosion; desertification

Environment—international agreements:
party to: Biodiversity, Law of the Sea, Ozone Layer Protection
signed, but not ratified: Environmental Modification

Geography—note: strategic location on Shatt al Arab waterway and at the

lyrics/music: Ibrahim TOUQAN/Mohammad FLAYFEL

note: adopted 2004; following the ousting of Saddam HUSSEIN, Iraq adopted “Mawtini,” a popular folk song throughout the Arab world, which also serves as an unofficial anthem of the Palestinian people

ECONOMY

Economy—overview: An improving security environment and foreign investment are helping to spur economic activity, particularly in the energy, construction, and retail sectors. Broader economic development, long-term fiscal health, and sustained improvements in the overall standard of living still depend on the central government passing major policy reforms. Iraq's largely state-run economy is dominated by the oil sector, which provides more than 90% of government revenue and 80% of foreign exchange earnings. Iraq in 2012 boosted oil exports to a 30-year high of 2.6 million barrels per day, a significant increase from Iraq's average of 2.2 million in 2011. Government revenues increased as global oil prices remained persistently high for much of 2012. Iraq's contracts with major oil companies have the potential to further expand oil exports and revenues, but Iraq will need to make significant upgrades to its oil processing, pipeline, and export infrastructure to enable these deals to reach their economic potential. The Iraqi Kurdistan Region's (IKR) autonomous Kurdistan Regional Government (KRG) passed its own oil law in 2007, and has directly signed about 50 contracts to develop IKR energy reserves. The federal government has disputed the legal authority of the KRG to conclude most of these contracts, some of which are also in areas with unresolved administrative boundaries in dispute between the federal and regional government. Iraq is making slow progress enacting laws and developing the institutions needed to implement economic policy, and political reforms are still needed to assuage investors' concerns regarding the uncertain business climate, which may have been harmed by the November 2012 standoff between Baghdad and Erbil and the removal of the Central Bank Governor in October 2012. The government of Iraq is eager to attract additional foreign direct investment, but it faces a number of obstacles including a tenuous political system and concerns about security and societal stability. Rampant corruption, outdated infrastructure, insufficient essential services, skilled labor shortages, and antiquated commercial laws stifle investment and continue to constrain growth of private, nonoil sectors. Iraq is considering a package of laws to establish a modern legal framework for the oil sector and a mechanism to equitably divide oil revenues within the nation, although these reforms are still under contentious and sporadic negotiation. Under the Iraqi Constitution, some competencies relevant to the overall investment climate are either shared by the federal government and the regions or are devolved entirely to the regions. Investment in the

IKR operates within the framework of the Kurdistan Region Investment Law (Law 4 of 2006) and the Kurdistan Board of Investment, which is designed to provide incentives to help economic development in areas under the authority of the KRG. Inflation has remained under control since 2006 as security improved. However, Iraqi leaders remain hard pressed to translate macroeconomic gains into an improved standard of living for the Iraqi populace. Unemployment remains a problem throughout the country despite a bloated public sector. Encouraging private enterprise through deregulation would make it easier for Iraqi citizens and foreign investors to start new businesses. Rooting out corruption and implementing reforms—such as restructuring banks and developing the private sector—would be important steps in this direction.

Telephone system: *general assessment:* the 2003 liberation of Iraq severely disrupted telecommunications throughout Iraq including international connections; widespread government efforts to rebuild domestic and international communications through fiber optic links are in progress; the mobile cellular market has expanded rapidly to some 27 million subscribers by the end of 2012

domestic: repairs to switches and lines destroyed during 2003 continue; additional switching capacity is improving access; 3 GSM operators since 2007 have expanded beyond their regional roots and offer near country-wide access to second-generation services; third-generation mobile services are not available nationwide; wireless local loop is available in some metropolitan areas and additional licenses have been issued with the hope of overcoming the lack of fixed-line infrastructure

international: country code—964; satellite earth stations—4 (2 Intelsat—1 Atlantic Ocean and 1 Indian Ocean, 1 Intersputnik—Atlantic Ocean region, and 1 Arabsat (inoperative)); local microwave radio relay connects border regions to Jordan, Kuwait, Syria, and Turkey; international terrestrial fiber-optic connections have been established with Saudi Arabia, Turkey, Kuwait, Jordan, and Iran; links to the Fiber-Optic Link Around the Globe (FLAG) and the Gulf Bridge International (GBI) submarine fiber-optic cables have been established (2011)

Broadcast media: the number of private radio and TV stations has increased rapidly since 2003; government-owned TV and radio stations are operated by the publicly funded Iraqi Public Broadcasting Service; private broadcast media are mostly linked to political, ethnic, or religious groups; satellite TV is available to an estimated 70% of viewers and many of the broadcasters are based abroad; transmissions of multiple international radio broadcasters are accessible (2007)

TRANSNATIONAL ISSUES

Disputes—international: approximately two million Iraqis have fled the conflict in Iraq, with the majority taking refuge in Syria and Jordan, and lesser numbers to Egypt, Lebanon, Iran, and Turkey; Iraq's lack of a maritime boundary with Iran prompts jurisdiction disputes beyond the mouth of the Shatt al Arab in the Persian Gulf; Turkey has expressed concern over the autonomous status of Kurds in Iraq

Refugees and internally displaced persons:

refugees (country of origin): 15,496 (Turkey); 11,467 (West Bank and Gaza Strip); 8,259 (Iran)

(2012); 183,195 (Syria) (2013)

IDPs: 1.1 million (since 2006 from ethno-sectarian violence) (2013)

stateless persons: 120,000 (2012); note—in the 1970s and 1980s under Saddam Hussein's administration, thousands of Iraq's Faili Kurds, followers of Shia Islam, were stripped of their Iraqi citizenship, had their property seized by the government, and many were deported; some Faili Kurds had

their citizenship reinstated under the 2006 Iraqi Nationality Law, but others lack the documentation to prove their Iraqi origins; some Palestinian refugees, who were also persecuted under the Saddam Hussein regime, still remain stateless in Iraq

IRELAND

INTRODUCTION

Background: Celtic tribes arrived on the island between 600 and 150 B.C. Invasions by Norsemen that began in the late 8th century were finally ended when King Brian BORU defeated the Danes in 1014. English invasions began in the 12th century and set off more than seven centuries of Anglo-Irish struggle marked by fierce rebellions and harsh repressions. A failed 1916 Easter Monday Rebellion touched off several years of guerrilla warfare that in 1921 resulted in independence from the UK for 26 southern counties; six northern (Ulster) counties remained part of the UK. In 1949, Ireland withdrew from the British Commonwealth; it joined the European Community in 1973. Irish governments have sought the peaceful unification of Ireland and have cooperated with Britain against terrorist

groups. A peace settlement for Northern Ireland is gradually being implemented despite some difficulties. In 2006, the Irish and British governments developed and began to implement the St. Andrews Agreement, building on the Good Friday Agreement approved in 1998. In 2010, the most recent phase of the peace process was implemented with the Hillsborough Castle Agreement, which paved the way for the devolution of justice and policing powers to the province.

Flag description: three equal vertical bands of green (hoist side), white, and orange; officially the flag colors have no meaning, but a common interpretation is that the green represents the Irish nationalist (Gaelic) tradition of Ireland; orange represents the Orange tradition (minority supporters of William of Orange); white symbolizes peace (or a lasting truce) between the green and the orange note: similar to the flag of Cote d'Ivoire, which is shorter and has the colors reversed—orange (hoist side),

white, and green; also similar to the flag of Italy, which is shorter and has colors of green (hoist side), white, and red

National symbol(s): harp, shamrock (trefoil)

National anthem: *name:* “Amhran na bhFiann” (The Soldier’s Song)

lyrics/music: Peadar KEARNEY [English], Liam O RINN [Irish]/Patrick HEENEY and Peadar KEARNEY

note: adopted 1926; instead of “Amhran na bhFiann,” the song “Ireland’s Call” is often used in athletic events where citizens of the Republic of Ireland and Northern Ireland compete as a unified team

ECONOMY

Economy—overview: Ireland is a small, modern, trade-dependent economy. Ireland was among the initial group of 12 EU nations that began circulating the euro on 1 January 2002. GDP growth averaged 6% in 1995-2007, but economic activity has dropped sharply since the onset of the world financial crisis. Ireland entered into a recession in 2008 for the first time in more than a decade, with the subsequent collapse of its domestic property market and construction industry. Property prices rose more rapidly in Ireland in the decade up to 2007 than in any other developed economy. Since their 2007 peak, average house prices have fallen 47%. In the wake of the collapse of the construction sector and the downturn in consumer spending and business investment, the export sector, dominated by foreign multinationals, has become an even more important component of Ireland’s economy. Agriculture, once the most important sector, is now dwarfed by industry and services. In 2008 the former COWEN government moved to guarantee all bank deposits, recapitalize the banking system, and establish partly-public venture capital funds in response to the country’s economic downturn. In 2009, in continued efforts to stabilize the banking sector, the Irish Government established the National Asset Management Agency (NAMA) to acquire problem commercial property and development loans from Irish banks. Faced with sharply reduced revenues and a burgeoning budget deficit, the Irish Government introduced the first in a series of draconian budgets in 2009. In addition to across-the-board cuts in spending, the 2009 budget included wage reductions for all public servants. These measures were not sufficient to stabilize Ireland’s public finances. In 2010, the budget deficit reached 32.4% of GDP—the world’s largest deficit, as a percentage of GDP—because of additional government support for the country’s deeply troubled banking sector. In late 2010, the

former COWEN government agreed to a \$92 billion loan package from the EU and IMF to help Dublin recapitalize Ireland's fragile banking sector and avoid defaulting on its sovereign debt. Since entering office in March 2011, the new KENNY government has intensified austerity measures to try to meet the deficit targets under Ireland's EU-IMF program. Ireland has grown slowly since 2011, but managed to reduce the budget deficit to 7.2% of GDP in 2013. In late 2013, Ireland formally exited its EU-IMF bailout program, benefiting from its strict adherence to deficit-reduction targets and success in refinancing a large amount of banking-related debt.

ISLE OF MAN

INTRODUCTION

Background: Part of the Norwegian Kingdom of the Hebrides until the 13th century when it was ceded to Scotland, the isle came under the British crown in 1765. Current concerns include reviving the almost extinct Manx Gaelic language. Isle of Man is a British crown dependency but is not part of the UK or of the European Union. However, the UK Government remains constitutionally responsible for its defense and international representation.

ECONOMY

Economy—overview: Offshore banking, manufacturing, and tourism are key sectors of the economy. The government offers low taxes and other incentives to high-technology companies and financial institutions to locate on the island; this has paid off in expanding employment opportunities in high-income industries. As a result, agriculture and fishing, once the mainstays of the economy, have declined in their contributions to GDP. The Isle of Man also attracts online gambling sites and the film industry. Trade is mostly with the UK. In January 2013, the Isle of Man signed a tax agreement with Guernsey and Jersey, in order to enable the islands' authorities to end tax avoidance and evasion. The Isle of Man enjoys free access to EU markets.

ISRAEL

INTRODUCTION

Background: Following World War II, the British withdrew from their mandate of Palestine, and the UN proposed partitioning the area into Arab and Jewish states, an arrangement rejected by the Arabs. Subsequently, the Israelis defeated the Arabs in a series of wars without ending the deep tensions between the two sides. (The territories Israel occupied since the 1967 war are not included in the Israel country profile, unless otherwise noted.) On 25 April 1982, Israel withdrew from the Sinai pursuant to the 1979 Israel-Egypt Peace Treaty. In keeping with the framework established at the Madrid Conference in October 1991, bilateral negotiations were conducted between Israel and Palestinian representatives and Syria to achieve a permanent settlement. Israel and Palestinian officials signed on 13 September 1993 a Declaration of Principles (also known as the “Oslo Accords”), enshrining the idea of a two-state solution to their conflict and guiding an interim period of Palestinian self-rule. Outstanding territorial and other disputes with Jordan were resolved in the 26 October 1994 Israel-Jordan Treaty of Peace. Progress toward a permanent status agreement with the Palestinians was undermined by Israeli-Palestinian violence between 2001 and February 2005. Israel in 2005 unilaterally disengaged from the Gaza Strip, evacuating settlers and its military while retaining control over most points of entry into the Gaza Strip. The election of HAMAS to head the Palestinian Legislative Council in 2006 froze relations between Israel and the Palestinian Authority (PA). In 2006 Israel engaged in a 34-day conflict with Hizballah in Lebanon in June-August 2006 and a 23-day conflict with HAMAS in the Gaza Strip during December 2008 and January 2009. Direct talks with the Palestinians launched in September 2010 collapsed following the expiration of Israel’s 10-month partial settlement construction moratorium in the West Bank. In November 2012, Israel engaged in a seven-day conflict with HAMAS in the Gaza Strip. Prime Minister Binyamin NETANYAHU formed a coalition government in March 2013 following general elections in January 2013. Direct talks with the Palestinians resumed in July 2013 and are ongoing.

Flag description: white with a blue hexagram (six-pointed linear star) known as the Magen David (Star of David or Shield of David) centered between two equal horizontal blue bands near the top and bottom edges of the flag; the basic design resembles a traditional Jewish prayer shawl (tallit), which is white with blue stripes; the hexagram as a Jewish symbol dates back to medieval times

National symbol(s): Star of David (Magen David)

National anthem: *name:* “Hatikvah” (The Hope)

lyrics/music: Naftali Herz IMBER/traditional, arranged by Samuel COHEN

note: adopted 2004, unofficial since 1948; used as the anthem of the Zionist movement since 1897; the 1888 arrangement by Samuel COHEN is thought to be based on the Romanian folk song “Carul cu boi” (The Ox Driven Cart)

ECONOMY

Economy—overview: Israel has a technologically advanced market economy. Cut diamonds, high-technology equipment, and pharmaceuticals are among the leading exports. Its major imports include crude oil, grains, raw materials, and military equipment. Israel usually posts sizable trade deficits, which are covered by tourism and other service exports, as well as significant foreign investment inflows. Between 2004 and 2011, growth averaged nearly 5% per year, led by exports. The global financial crisis of 2008-09 spurred a brief recession in Israel, but the country entered the crisis

with solid fundamentals, following years of prudent fiscal policy and a resilient banking sector. In 2010, Israel formally acceded to the OECD. Israel's economy also has weathered the Arab Spring because strong trade ties outside the Middle East have insulated the economy from spillover effects. The economy has recovered better than most advanced, comparably sized economies, but slowing demand domestically and internationally, and a strong shekel, have reduced forecasts for the next decade to the 3% level. Natural gas fields discovered off Israel's coast since 2009 have brightened Israel's energy security outlook. The Tamar and Leviathan fields were some of the world's largest offshore natural gas finds this past decade. The massive Leviathan field is not due to come online until 2018, but production from Tamar provided a one percentage point boost to Israel's GDP in 2013 and is expected to contribute 0.5% growth in 2014. In mid-2011, public protests arose around income inequality and rising housing and commodity prices. Israel's income inequality and poverty rates are among the highest of OECD countries and there is a broad perception among the public that a small number of "tycoons" have a cartel-like grip over the major parts of the economy. The government formed committees to address some of the grievances but has maintained that it will not engage in deficit spending to satisfy populist demands. In May 2013 the Israeli government, in a politically difficult process, passed an austerity budget to reign in the deficit and restore confidence in the government's fiscal position. Over the long term, Israel faces structural issues, including low labor participation rates for its fastest growing social segments—the ultra-orthodox and Arab-Israeli communities. Also, Israel's progressive, globally competitive, knowledge-based technology sector employs only 9% of the workforce, with the rest employed in manufacturing and services—sectors which face downward wage pressures from global competition.

TRANSNATIONAL ISSUES

Disputes—international: West Bank and Gaza Strip are Israeli-occupied with current status subject to the Israeli-Palestinian Interim Agreement—permanent status to be determined through further negotiation; Israel continues construction of a “seam line” separation barrier along parts of the Green Line and within the West Bank; Israel withdrew its settlers and military from the Gaza Strip and from four settlements in the West Bank in August 2005; Golan Heights is Israeli-occupied (Lebanon claims the Shab’a Farms area of Golan Heights); since 1948, about 350 peacekeepers from the UN Truce Supervision Organization headquartered in Jerusalem monitor ceasefires, supervise armistice agreements, prevent isolated incidents from escalating, and assist other UN personnel in the region

Refugees and internally displaced persons:

refugees (country of origin): 37,347 (Eritrea); 10,743 (Sudan) (2012)

stateless persons: 14 (2012)

Illicit drugs: increasingly concerned about ecstasy, cocaine, and heroin

abuse; drugs arrive in country from Lebanon and, increasingly, from Jordan; money-laundering center

ITALY

INTRODUCTION

Background: Italy became a nation-state in 1861 when the regional states of the peninsula, along with Sardinia and Sicily, were united under King Victor EMMANUEL II. An era of parliamentary government came to a close in the early 1920s when Benito MUSSOLINI established a Fascist dictatorship. His alliance with Nazi Germany led to Italy's defeat in World War II. A democratic republic replaced the monarchy in 1946 and economic revival followed. Italy is a charter member of NATO and the European Economic Community (EEC). It has been at the forefront of European economic and political unification, joining the Economic and Monetary Union in 1999. Persistent problems include sluggish economic growth, high youth and female unemployment, organized crime, corruption, and

economic disparities between southern Italy and the more prosperous north.

GEOGRAPHY

Location: Southern Europe, a peninsula extending into the central Mediterranean Sea, northeast of Tunisia

Geographic coordinates: 42 50 N, 12 50 E

Map references: Europe

Area: *total:* 301,340 sq km

country comparison to the world: 72

land: 294,140 sq km

water: 7,200 sq km

note: includes Sardinia and Sicily

Area—comparative: almost twice the size of Georgia; slightly larger than Arizona

Land boundaries: *total:* 1,899.2 km

border countries: Austria 430 km, France 488 km, Holy See (Vatican City) 3.2 km, San Marino 39 km, Slovenia 199 km, Switzerland 740 km

Coastline: 7,600 km

Maritime claims: territorial sea: 12 nm

continental shelf: 200 m depth or to the depth of exploitation

Climate: predominantly Mediterranean; Alpine in far north; hot, dry in south

Terrain: mostly rugged and mountainous; some plains, coastal lowlands

Elevation extremes: *lowest point:* Mediterranean Sea 0 m

highest point: Mont Blanc (Monte Bianco) de Courmayeur 4,748 m (a secondary peak of Mont Blanc)

Natural resources: coal, mercury, zinc, potash, marble, barite, asbestos, pumice, fluorspar, feldspar, pyrite (sulfur), natural gas and crude oil reserves, fish, arable land

Land use: *arable land:* 22.57%

permanent crops: 8.37%

Flag description: three equal vertical bands of green (hoist side), white, and red; design inspired by the French flag brought to Italy by Napoleon in 1797; colors are those of Milan (red and white) combined with the green uniform color of the Milanese civic guard note: similar to the flag of Mexico, which is longer, uses darker shades of red and green, and has its coat of arms centered on the white band; Ireland, which is longer and is green (hoist side), white, and orange; also similar to the flag of the Cote d'Ivoire, which has the colors reversed—orange (hoist side), white, and

green

National symbol(s): white, five-pointed star (Stella d'Italia)

National anthem: *name:* "Il Canto degli Italiani" (The Song of the Italians)

lyrics/music: Goffredo MAMELI/Michele NOVARO

note: adopted 1946; the anthem, originally written in 1847, is also known as "L'Inno di Mameli" (Mameli's Hymn), and "Fratelli D'Italia" (Brothers of Italy)

ECONOMY

Economy—overview: Italy has a diversified industrial economy, which is divided into a developed industrial north, dominated by private companies, and a less-developed, highly subsidized, agricultural south, where unemployment is higher. The Italian economy is driven in large part by the manufacture of high-quality consumer goods produced by small and medium-sized enterprises, many of them family-owned. Italy also has a sizable underground economy, which by some estimates accounts for as much as 17% of GDP. These activities are most common within the agriculture, construction, and service sectors. Italy is the third-largest economy in the euro-zone, but its exceptionally high public debt and structural impediments to growth have rendered it vulnerable to scrutiny by financial markets. Public debt has increased steadily since 2007, topping 133% of GDP in 2013, but investor concerns about Italy and the broader euro-zone crisis eased in 2013, bringing down Italy's borrowing costs on sovereign government debt from euro-era records. The government still faces pressure from investors and European partners to sustain its efforts to address Italy's long-standing structural impediments to growth, such as labor market inefficiencies and widespread tax evasion. In 2013 economic growth and labor market conditions deteriorated, with growth at -1.8% and unemployment rising to 12.4%, with youth unemployment around 40%. Italy's GDP is now 8% below its 2007 pre-crisis level.

Illicit drugs: important gateway for and consumer of Latin American cocaine and Southwest Asian heroin entering the European market; money laundering by organized crime and from smuggling

Background: The island—discovered by Christopher COLUMBUS in 1494—was settled by the Spanish early in the 16th century. The native Taino, who had inhabited Jamaica for centuries, were gradually exterminated and replaced by African slaves. England seized the island in 1655 and established a plantation economy based on sugar, cocoa, and coffee. The abolition of slavery in 1834 freed a quarter million slaves, many of whom became small farmers. Jamaica gradually increased its independence from Britain. In 1958 it joined other British Caribbean colonies in forming the Federation of the West Indies. Jamaica gained full independence when it withdrew from the Federation in 1962. Deteriorating economic conditions during the 1970s led to recurrent violence as rival gangs affiliated with the major political parties evolved into powerful organized crime networks involved in international drug smuggling and

money laundering. Violent crime, drug trafficking, and poverty pose significant challenges to the government today. Nonetheless, many rural and resort areas remain relatively safe and contribute substantially to the economy.

ECONOMY

Economy—overview: The Jamaican economy is heavily dependent on services, which accounted for more than 60% of GDP in 2013. The country continues to derive most of its foreign exchange from tourism, remittances, and bauxite/alumina. Remittances account for nearly 15% of GDP and exports of bauxite and alumina make up roughly 5%. The bauxite/alumina sector was most affected by the global downturn while the tourism industry was resilient. Tourism revenues account for roughly 5% of GDP in 2011. Jamaica's economy faces many challenges to growth: high crime and corruption, large-scale unemployment and underemployment, and a debt-to-GDP ratio of nearly 125%. Jamaica's onerous public debt burden is the result of government bailouts to ailing sectors of the economy, most notably to the financial sector. In early 2010, the Jamaican Government created the Jamaica Debt Exchange in order to retire high-priced domestic bonds and significantly reduce annual debt servicing. Despite the improvement, debt servicing costs still hinder the government's ability to spend on infrastructure and social programs, particularly as job losses rise in a shrinking economy. Jamaica was hard hit by the effects of the global economic crisis and growth remains low. The SIMPSON-MILLER administration faces the difficult prospect of having to achieve fiscal discipline in order to maintain debt payments, while simultaneously attacking a serious crime problem that is hampering economic growth.

High unemployment exacerbates the crime problem, including gang violence that is fueled by the drug trade. The SIMPSON-MILLER government negotiated a new IMF Stand-by agreement to gain access to additional funds in 2013, although the deal will require the government to raise taxes and decrease public sector wages.

JAN MAYEN

INTRODUCTION

Background: This desolate, arctic, mountainous island was named after a Dutch whaling captain who indisputably discovered it in 1614 (earlier claims are inconclusive). Visited only occasionally by seal hunters and trappers over the following centuries, the island came under Norwegian sovereignty in 1929. The long dormant Beerenberg volcano, the northernmost active volcano on earth, resumed activity in 1970 and the most recent eruption occurred in 1985.

GEOGRAPHY

Location: Northern Europe, island between the Greenland Sea and the

Norwegian Sea, northeast of Iceland

Geographic coordinates: 71 00 N, 8 00 W

Map references: Europe

Area: *total:* 377 sq km

country comparison to the world: 205

Maritime claims: *territorial sea:* 4 nm

contiguous zone: 10 nm

exclusive economic zone: 200 nm

continental shelf: 200 m depth or to the depth of exploitation

Climate: arctic maritime with frequent storms and persistent fog

Terrain: volcanic island, partly covered by glaciers

Elevation extremes: *lowest point:* Norwegian Sea 0 m

highest point: Haakon VII Toppen on Beerenberg 2,277 m

note: Beerenberg volcano has numerous peaks; the highest point on the volcano rim is named Haakon VII Toppen, after Norway's first king following the reestablishment of Norwegian independence in 1905

Irrigated land: 0 sq km (2011)

Natural hazards: dominated by the volcano Beerenberg

volcanism: Beerenberg (elev. 2,227 m) is Norway's only active volcano; volcanic activity resumed in 1970; the most recent eruption occurred in 1985

Environment—current issues: NA

Geography—note: barren volcanic island with some moss and grass

PEOPLE AND SOCIETY

Population: no indigenous inhabitants

note: personnel operate the Long Range Navigation (Loran-C) base and the weather and coastal services radio station

GOVERNMENT

Country name: *conventional long form:* none

conventional short form: Jan Mayen

Dependency status: territory of Norway; since August 1994, administered from Oslo through the county governor (fylkesmann) of Nordland; however, authority has been delegated to a station commander of the Norwegian Defense Communication Service

Legal system: the laws of Norway, where applicable, apply

Flag description: the flag of Norway is used

ECONOMY

Economy—overview: Jan Mayen is a volcanic island with no exploitable natural resources, although surrounding waters contain substantial fish stocks and potential untapped petroleum resources. Economic activity is limited to providing services for employees of Norway's radio and meteorological stations on the island.

COMMUNICATIONS

Broadcast media: a coastal radio station has been remotely operated since 1994 (2008)

JAPAN

INTRODUCTION

Background: In 1603, after decades of civil warfare, the Tokugawa shogunate (a military-led, dynastic government) ushered in a long period of relative political stability and isolation from foreign influence. For more than two centuries this policy enabled Japan to enjoy a flowering of its indigenous culture. Japan opened its ports after signing the Treaty of Kanagawa with the US in 1854 and began to intensively modernize and industrialize. During the late 19th and early 20th centuries, Japan became a regional power that was able to defeat the forces of both China and Russia. It occupied Korea, Formosa (Taiwan), and southern Sakhalin Island. In 1931-32 Japan occupied Manchuria, and in 1937 it launched a full-scale invasion of China. Japan attacked US forces in 1941—triggering America's entry into World War II—and soon occupied much of East and Southeast Asia. After its defeat in World War II, Japan recovered to become an economic power and an ally of the US. While the emperor retains his throne as a symbol of national unity, elected politicians hold actual decision-making power. Following three decades of unprecedented growth, Japan's economy experienced a major slowdown starting in the 1990s, but the country remains a major economic power. In March 2011, Japan's strongest-ever earthquake, and an accompanying tsunami, devastated the northeast part of Honshu island, killing thousands and damaging several nuclear power plants. The catastrophe hobbled the country's economy and its energy infrastructure, and tested its ability to deal with humanitarian disasters.

GEOGRAPHY

Location: Eastern Asia, island chain between the North Pacific Ocean and the Sea of Japan, east of the Korean Peninsula

Geographic coordinates: 36 00 N, 138 00 E

Map references: Asia

Area: total: 377,915 sq km

country comparison to the world: 62

land: 364,485 sq km

water: 13,430 sq km

note: includes Bonin Islands (Ogasawara-gunto), Daito-shoto, Minami-jima, Okino-tori-shima, Ryukyu Islands (Nansei-shoto), and Volcano Islands (Kazan-retto)

Area—comparative: slightly smaller than California

Land boundaries: 0 km

Coastline: 29,751 km

Maritime claims: territorial sea: 12 nm; between 3 nm and 12 nm in the international straits—La Perouse or Soya, Tsugaru, Osumi, and Eastern and Western Channels of the Korea or Tsushima Strait

contiguous zone: 24 nm

exclusive economic zone: 200 nm

Climate: varies from tropical in south to cool temperate in north

Terrain: mostly rugged and mountainous

Elevation extremes: *lowest point:* Hachiro-gata -4 m

highest point: Fujiyama 3,776 m

Natural resources: negligible mineral resources, fish

note: with virtually no energy natural resources, Japan is the world's largest importer of coal and liquefied natural gas, as well as the second largest importer of oil

Land use: *arable land:* 11.26%

permanent crops: 0.81%

other: 87.93% (2011)

Freshwater withdrawal (domestic/industrial/agricultural): *total:*

90.04 cu km/yr (20%/18%/62%)

per capita: 714.3 cu m/yr (2007)

Natural hazards: many dormant and some active volcanoes; about 1,500 seismic occurrences (mostly tremors but occasional severe earthquakes) every year; tsunamis; typhoons

volcanism: both Unzen (elev. 1,500 m) and Sakura-jima (elev. 1,117 m), which lies near the densely populated city of Kagoshima, have been deemed Decade Volcanoes by the International Association of Volcanology and Chemistry of the Earth's Interior, worthy of study due to their explosive history and close proximity to human populations; other notable historically active volcanoes include Asama, Honshu Island's most active volcano, Aso, Bandai, Fuji, Iwo-Jima, Kikai, Kirishima, Komaga-take, Oshima, Suwanosejima, Tokachi, Yake-dake, and Usu

Environment—current issues: air pollution from power plant emissions results in acid rain; acidification of lakes and reservoirs degrading water quality and threatening aquatic life; Japan is one of the largest consumers of

fish and tropical timber,
contributing to the depletion of these resources in Asia and elsewhere

Environment—international agreements:

party to: Antarctic-Environmental Protocol, Antarctic-Marine Living Resources, Antarctic Seals, Antarctic Treaty, Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Endangered Species, Environmental Modification, Hazardous Wastes, Law of the Sea, Marine Dumping, Ozone Layer Protection, Ship Pollution, Tropical Timber 83, Tropical Timber 94, Wetlands, Whaling

ECONOMY

Economy—overview: In the years following World War II, government-industry cooperation, a strong work ethic, mastery of high technology, and a comparatively small defense allocation (1% of GDP) helped Japan develop a technologically advanced economy. Two notable characteristics of the

post-war economy were the close interlocking structures of manufacturers, suppliers, and distributors, known as keiretsu, and the guarantee of lifetime employment for a substantial portion of the urban labor force. Both features are now eroding under the dual pressures of global competition and domestic demographic change. Japan's industrial sector is heavily dependent on imported raw materials and fuels. A small agricultural sector is highly subsidized and protected, with crop yields among the highest in the world. While self-sufficient in rice production, Japan imports about 60% of its food on a caloric basis. For three decades, overall real economic growth had been spectacular—a 10% average in the 1960s, a 5% average in the 1970s, and a 4% average in the 1980s. Growth slowed markedly in the 1990s, averaging just 1.7%, largely because of the after effects of inefficient investment and an asset price bubble in the late 1980s that required a protracted period of time for firms to reduce excess debt, capital, and labor. Modest economic growth continued after 2000, but the economy has fallen into recession three times since 2008. A sharp downturn in business investment and global demand for Japan's exports in late 2008 pushed Japan into recession. Government stimulus spending helped the economy recover in late 2009 and 2010, but the economy contracted again in 2011 as the massive 9.0 magnitude earthquake and the ensuing tsunami in March disrupted manufacturing. The economy has largely recovered in the two years since the disaster, but reconstruction in the Tohoku region has been uneven. Prime Minister Shinzo ABE has declared the economy his government's top priority; he has overturned his predecessor's plan to permanently close nuclear power plants and is pursuing an economic revitalization agenda of fiscal stimulus, monetary easing, and structural reform. Japan joined the Trans Pacific Partnership negotiations in 2013, a pact that would open Japan's economy to increased foreign competition and create new export opportunities for Japanese businesses. Measured on a purchasing power parity (PPP) basis that adjusts for price differences, Japan in 2013 stood as the fourth-largest economy in the world after second-place China, which surpassed Japan in 2001, and third-place India, which edged out Japan in 2012. The new government will continue a longstanding debate on restructuring the economy and reining in Japan's huge government debt, which is exceeding 230% of GDP. To help raise government revenue and reduce public debt, Japan decided in 2013 to gradually increase the consumption tax to a total of 10% by the year 2015. Japan is making progress on ending deflation due to a weaker yen and higher energy costs, but reliance on exports to drive growth and an aging, shrinking population pose other major long-term challenges for the economy.

TRANSNATIONAL ISSUES

Disputes—international: the sovereignty dispute over the islands of Etorofu, Kunashiri, and Shikotan, and the Habomai group, known in Japan as the “Northern Territories” and in Russia as the “Southern Kuril Islands,” occupied by the Soviet Union in 1945, now administered by Russia and claimed by Japan, remains the primary sticking point to signing a peace treaty formally ending World War II hostilities; Japan and South Korea claim Liancourt Rocks (Take-shima/Tok-do) occupied by South Korea since 1954; China and Taiwan dispute both Japan’s claims to the uninhabited islands of the Senkaku-shoto (Diaoyu Tai) and Japan’s unilaterally declared exclusive economic zone in the East China Sea, the site of intensive hydrocarbon prospecting

JERSEY

INTRODUCTION

Background: Jersey and the other Channel Islands represent the last remnants of the medieval Dukedom of Normandy that held sway in both France and England. These islands were the only British soil occupied by German troops in World War II. Jersey is a British crown dependency but is not part of the UK or of the European Union. However, the UK Government is constitutionally responsible for its defense and international representation.

Flag description: white with a diagonal red cross extending to the corners of the flag; in the upper quadrant, surmounted by a yellow crown, a red shield with three lions in yellow; according to tradition, the ships of Jersey—in an attempt to differentiate themselves from English ships flying the horizontal cross of St. George—rotated the cross to the “X” (saltire) configuration; because this arrangement still resembled the Irish cross of St. Patrick, the yellow Plantagenet crown and Jersey coat of arms were added

National symbol(s): Jersey cow

National anthem: *name:* “Isle de Siez Nous” (Island Home)

lyrics/music: Gerard LE FEUVRE

note: adopted 2008; serves as a local anthem; as a British crown dependency, “God Save the Queen” is official (see United Kingdom)

ECONOMY

Economy—overview: Jersey's economy is based on international financial services, agriculture, and tourism. In 2010 the financial services sector accounted for about 50% of the island's output. Potatoes, cauliflower, tomatoes, and especially flowers are important export crops, shipped mostly to the UK. The Jersey breed of dairy cattle is known worldwide and represents an important export income earner. Milk products go to the UK and other EU countries. Tourism accounts for one-quarter of GDP. In recent years, the government has encouraged light industry to locate in Jersey with the result that an electronics industry has developed, displacing more traditional industries. All raw material and energy requirements are imported as well as a large share of Jersey's food needs. Light taxes and death duties make the island a popular tax haven. In January 2013, Jersey signed a tax agreement with Guernsey and the Isle of Man, in order to enable the islands' authorities to end tax avoidance and evasion. Living standards come close to those of the UK.

JORDAN

INTRODUCTION

Background: Following World War I and the dissolution of the Ottoman Empire, the League of Nations awarded Britain the mandate to govern much of the Middle East. Britain demarcated a semi-autonomous region of Transjordan from Palestine in the early 1920s. The area gained its independence in 1946 and thereafter became The Hashemite Kingdom of Jordan. The country's long-time ruler, King HUSSEIN (1953-99), successfully navigated competing pressures from the major powers (US, USSR, and UK), various Arab states, Israel, and a large internal Palestinian population. Jordan lost the West Bank to Israel in the 1967 Six-Day War. King HUSSEIN in 1988 permanently relinquished Jordanian claims to the West Bank; in 1994 he signed a peace treaty with Israel. King ABDALLAH

II, King HUSSEIN's eldest son, assumed the throne following his father's death in 1999. He implemented modest political and economic reforms, but in the wake of the "Arab Revolution" across the Middle East, Jordanians continue to press for further political liberalization, government reforms, and economic improvements. In January 2014, Jordan assumed a nonpermanent seat on the UN Security Council for the 2014-15 term.

ECONOMY

Economy—overview: Jordan’s economy is among the smallest in the Middle East, with insufficient supplies of water, oil, and other natural

resources underlying the government's heavy reliance on foreign assistance. Other economic challenges for the government include chronic high rates of poverty, unemployment, inflation, and a large budget deficit. Since assuming the throne in 1999, King ABDALLAH has implemented significant economic reforms, such as opening the trade regime, privatizing state-owned companies, and eliminating some fuel subsidies, which in the last decade spurred economic growth by attracting foreign investment and creating some jobs. The global economic slowdown and regional turmoil, however, have depressed Jordan's GDP growth, impacting export-oriented sectors, construction, and tourism. In 2011 and 2012, the government approved two economic relief packages and a budgetary supplement, meant to improve the living conditions for the middle and poor classes. Jordan's finances have also been strained by a series of natural gas pipeline attacks in Egypt, causing Jordan to substitute more expensive diesel imports, primarily from Saudi Arabia, to generate electricity. Jordan is currently exploring nuclear power generation in addition to the exploitation of abundant oil shale reserves and renewable technologies to forestall energy shortfalls. In 2012, to correct budgetary and balance of payments imbalances, Jordan entered into a \$2.1 billion, multiple year International Monetary Fund Stand-By Arrangement. Jordan's financial sector has been relatively isolated from the international financial crisis because of its limited exposure to overseas capital markets. In 2013, Jordan depended heavily on foreign assistance to finance the budget deficit, as the influx of about 600,000 Syrian refugees put additional pressure on expenditures.

KAZAKHSTAN

INTRODUCTION

Background: Ethnic Kazakhs, a mix of Turkic and Mongol nomadic tribes who migrated to the region by the 13th century, were rarely united as a single nation. The area was conquered by Russia in the 18th century, and Kazakhstan became a Soviet Republic in 1936. During the 1950s and 1960s agricultural “Virgin Lands” program, Soviet citizens were encouraged to help cultivate Kazakhstan’s northern pastures. This influx of immigrants (mostly Russians, but also some other deported nationalities) skewed the ethnic mixture and enabled non-ethnic Kazakhs to outnumber natives. Non-Muslim ethnic minorities departed Kazakhstan in large numbers from the mid-1990s through the mid-2000s and a national program has repatriated about a million ethnic Kazakhs back to Kazakhstan. These trends have allowed Kazakhs to become the titular majority again. This dramatic demographic shift has also undermined the previous religious

diversity and made the country more than 70 percent Muslim. Kazakhstan's economy is larger than those of all the other Central Asian states largely due to the country's vast natural resources. Current issues include: developing a cohesive national identity; managing Islamic revivalism; expanding the development of the country's vast energy resources and exporting them to world markets; diversifying the economy outside the oil, gas, and mining sectors; enhancing Kazakhstan's economic competitiveness; developing a multiparty parliament and advancing political and social reform; and strengthening relations with neighboring states and other foreign powers.

GEOGRAPHY

Location: Central Asia, northwest of China; a small portion west of the Ural (Zhayyq) River in eastern-most Europe

Geographic coordinates: 48 00 N, 68 00 E

Map references: Asia

Area: *total:* 2,724,900 sq km

country comparison to the world: 9

land: 2,699,700 sq km

water: 25,200 sq km

Area—comparative: slightly less than four times the size of Texas

Land boundaries: *total:* 12,185 km

border countries: China 1,533 km, Kyrgyzstan 1,224 km, Russia 6,846 km, Turkmenistan 379 km, Uzbekistan 2,203 km

Coastline: 0 km (landlocked); note—Kazakhstan borders the Aral Sea, now split into two bodies of water (1,070 km), and the Caspian Sea (1,894 km)

Maritime claims: none (landlocked)

Climate: continental, cold winters and hot summers, arid and semiarid

Terrain: vast flat steppe extending from the Volga in the west to the Altai Mountains in the east and from the plains of western Siberia in the north to oases and deserts of Central Asia in the south

Elevation extremes: *lowest point:* Vpadina Kaundy—132 m

highest point: Khan Tangiri Shyngy (Pik Khan-Tengri) 6,995 m

Natural resources: major deposits of petroleum, natural gas, coal, iron ore, manganese, chrome ore, nickel, cobalt, copper, molybdenum, lead, zinc, bauxite, gold, uranium

Land use: *arable land:* 8.82%

permanent crops: 0.03%

other: 91.15% (2011)

Irrigated land: 20,660 sq km (2010)

Total renewable water resources: 107.5 cu km (2011)

Freshwater withdrawal (domestic/industrial/agricultural): *total:* 21.14 cu km/yr (4%/30%/66%)

per capita: 1,304 cu m/yr (2010)

Natural hazards: earthquakes in the south; mudslides around Almaty

Environment—current issues: radioactive or toxic chemical sites associated with former defense industries and test ranges scattered throughout the country pose health risks for humans and animals; industrial pollution is severe in some cities; because the two main rivers that flowed into the Aral Sea have been diverted for irrigation, it is drying up and leaving behind a harmful layer of chemical pesticides and natural salts; these substances are then picked up by the wind and blown into noxious dust storms; pollution in the Caspian Sea; soil pollution from overuse of agricultural chemicals and salination from poor infrastructure and wasteful irrigation practices

Environment—international agreements:

party to: Air Pollution, Biodiversity, Climate Change, Desertification, Endangered Species, Environmental Modification, Hazardous Wastes, Ozone Layer Protection, Ship Pollution, Wetlands

signed, but not ratified: Climate Change-Kyoto Protocol

Geography—note: landlocked; Russia leases approximately 6,000 sq km of territory enclosing the Baykonur Cosmodrome; in January 2004, Kazakhstan and Russia extended the lease to 2050

Flag description: a gold sun with 32 rays above a soaring golden steppe eagle, both centered on a sky blue background; the hoist side displays a national ornamental pattern "koshkar-muiz" (the horns of the ram) in gold; the blue color is of religious significance to the Turkic peoples of the country, and so symbolizes cultural and ethnic unity; it also represents the endless sky as well as water; the sun, a source of life and energy, exemplifies wealth and plenitude; the sun's rays are shaped like grain, which is the basis of abundance and prosperity; the eagle has appeared on the flags of Kazakh tribes for centuries and represents freedom, power, and the flight to the future

National symbol(s): golden eagle

National anthem: *name:* “Menin Qazaqstanım” (My Kazakhstan)

lyrics/music: Zhumeken NAZHIMEDENOV and Nursultan NAZARBAYEV/Shamshi KALDAYAKOV

note: adopted 2006; President Nursultan NAZARBAYEV played a role in revising the lyrics

Economy

Economy—overview: Kazakhstan, geographically the largest of the former Soviet republics, excluding Russia, possesses enormous fossil fuel reserves and plentiful supplies of other minerals and metals, such as uranium, copper, and zinc. It also has a large agricultural sector featuring livestock and grain. In 2002 Kazakhstan became the first country in the former Soviet Union to receive an investment-grade credit rating. Extractive industries have been and will continue to be the engine of Kazakhstan's growth, although the country is aggressively pursuing diversification strategies. Landlocked, with restricted access to the high seas, Kazakhstan relies on its neighbors to export its products, especially oil and grain. Although its Caspian Sea ports, pipelines, and rail lines carrying oil have been upgraded, civil aviation and roadways continue to need attention. Telecoms are improving, but require considerable investment, as does the information technology base. Supply and distribution of electricity can be erratic because of regional dependencies, but the country is moving forward with plans to improve reliability of electricity and gas supply to its population. At the end of 2007, global financial markets froze up and the loss of capital inflows to Kazakhstani banks caused a credit crunch. The subsequent and sharp fall of oil and commodity prices in 2008 aggravated the economic situation, and Kazakhstan plunged into recession. While the global financial crisis took a significant toll on Kazakhstan's economy, it has rebounded well, helped by prudent government measures. Rising commodity prices have helped the recovery. Despite solid macroeconomic indicators, the government realizes that its economy suffers from an overreliance on oil and extractive industries, the so-called “Dutch disease.” In response, Kazakhstan has embarked on an ambitious diversification program, aimed at developing targeted sectors like transport, pharmaceuticals, telecommunications, petrochemicals and food processing. In 2010 Kazakhstan joined the Belarus-Kazakhstan-Russia Customs Union in an effort to boost foreign investment and improve trade relationships.

KENYA

INTRODUCTION

Background: Founding president and liberation struggle icon Jomo KENYATTA led Kenya from independence in 1963 until his death in 1978, when President Daniel MOI took power in a constitutional succession. The country was a de facto one-party state from 1969 until 1982 when the ruling Kenya African National Union (KANU) made itself the sole legal party in Kenya. MOI acceded to internal and external pressure for political liberalization in late 1991. The ethnically fractured opposition failed to dislodge KANU from power in elections in 1992 and 1997, which were marred by violence and fraud, but were viewed as having generally reflected the will of the Kenyan people. President MOI stepped down in December 2002 following fair and peaceful elections. Mwai KIBAKI, running as the candidate of the multiethnic, united opposition group, the National

Rainbow Coalition (NARC), defeated KANU candidate Uhuru KENYATTA and assumed the presidency following a campaign centered on an anticorruption platform. KIBAKI's NARC coalition splintered in 2005 over a constitutional review process. Government defectors joined with KANU to form a new opposition coalition, the Orange Democratic Movement (ODM), which defeated the government's draft constitution in a popular referendum in November 2005. KIBAKI's reelection in December 2007 brought charges of vote rigging from ODM candidate Raila ODINGA and unleashed two months of violence in which as many as 1,500 people died. African Union-sponsored mediation led by former UN Secretary General Kofi ANNAN in late February 2008 resulted in a power-sharing accord bringing ODINGA into the government in the restored position of prime minister. The power sharing accord included a broad reform agenda, the centerpiece of which was constitutional reform. In August 2010, Kenyans overwhelmingly adopted a new constitution in a national referendum. The new constitution introduced additional checks and balances to executive power and significant devolution of power and resources to 47 newly created counties. It also eliminated the position of prime minister following the first presidential election under the new constitution, which occurred on 4 March 2013. Uhuru KENYATTA, the son of founding president Jomo KENYATTA, won the March elections in the first round by a close margin and was sworn into office on 9 April 2013.

note: adopted 1963; the anthem is based on a traditional Kenyan folk song

ECONOMY

Economy—overview: Kenya hKenya has been hampered by corruption and by reliance upon several primary goods whose prices have remained low. Low infrastructure investment threatens Kenya's long-term position as the largest East African economy, although the Kenyatta administration has prioritized infrastructure development. International financial lenders and donors remain important to Kenya's economic growth and development. Unemployment is high at around 40%. The country has chronic budget deficits. Inflationary pressures and sharp currency depreciation peaked in early 2012 but have since abated following low global food and fuel prices and monetary interventions by the Central Bank. Recent terrorism in Kenya and the surrounding region threatens Kenya's important tourism industry. Kenya, in conjunction with neighboring Ethiopia and South Sudan, intends to begin construction on a transport corridor and oil pipeline into the port of Lamu in 2014.

Transnational Issues

Disputes—international: Kenya served as an important mediator in brokering Sudan's north-south separation in February 2005; Kenya provides shelter to almost a quarter million refugees, including Ugandans who flee across the border periodically to seek protection from Lord's Resistance Army rebels; Kenya works hard to prevent the clan and militia fighting in Somalia from spreading across the border, which has long been open to nomadic pastoralists; the boundary that separates Kenya's and Sudan's sovereignty is unclear in the "Ilemi Triangle," which Kenya has administered since colonial times

Refugees and internally displaced persons:

refugees (country of origin): 430,513 (Somalia); 34,301 (South Sudan); 30,251 (Ethiopia); 14,490 (Democratic Republic of Congo); 7,961 (Sudan); 5,457 (Burundi) (2014)

IDPs: at least 300,000 (2007-08 post-election violence; the status of the estimated 300,000 IDPs from the 2007-08 post-election violence who found refuge in host communities rather than camps—and IDPs displaced through natural disasters, drought, development and environmental projects, land disputes, cattle rustling, and inter-communal violence—is not captured in Kenya's national database; in 2012, inter-communal violence displaced approximately 118,000 people and floods displaced an estimated 100,000) (2012)

stateless persons: 20,000 (2012); note—the stateless population is composed of Nubians, Kenyan Somalis, and coastal Arabs; the Nubians are descendants of Sudanese soldiers recruited by the British to fight for them in East Africa more than a century ago; they did not receive Kenyan citizenship when the country became independent in 1963; only recently have Nubians become a formally recognized tribe and had less trouble obtaining national IDs; Galjeel and other Somalis who have lived in Kenya for decades are lumped in

with more recent Somali refugees and denied ID cards

Trafficking in persons: current situation: Kenya is a source, transit, and

destination country for adults and children subjected to forced labor and sex trafficking; Kenyan children are forced to work in domestic service, agriculture, fishing, cattle herding, street vending, begging, and prostitution; Kenyan economic migrants to other East African countries, South Sudan, Europe, the US, and the Middle East are at times exploited in domestic servitude, massage parlors or brothels, or forced manual labor; children from Burundi, Ethiopia, Somalia, South Sudan, Tanzania, and Uganda are subjected to forced labor and prostitution in Kenya; Somali refugees living in the Dadaab complex may be forced into prostitution or work on tobacco farms

tier rating: Tier 2 Watch List—Kenya does not fully comply with the minimum standards for the elimination of trafficking; the government enacted the Counter-Trafficking in Persons Act in October 2012 but has not launched and implemented its national plan of action, convened the Counter-Trafficking in Persons Advisory Committee, taken tangible action against trafficking complicity among law enforcement officials, provided shelter and other protective services for adult victims, monitor the work of overseas labor recruitment agencies, or provide wide-scale anti-trafficking training to its officials; efforts to assist and care for child victims remain strong; corruption among officials continue to hamper efforts to bring traffickers to justice (2013)

Illicit drugs: widespread harvesting of small plots of marijuana; transit country for South Asian heroin destined for Europe and North America; Indian methaqualone also transits on way to South Africa; significant potential for money-laundering activity given the country's status as a regional financial center; massive corruption, and relatively high levels of narcotics-associated activities

KIRIBATI

INTRODUCTION

Background: The Gilbert Islands became a British protectorate in 1892 and a colony in 1915; they were captured by the Japanese in the Pacific War in 1941. The islands of Makin and Tarawa were the sites of major US amphibious victories over entrenched Japanese garrisons in 1943. The Gilbert Islands were granted self-rule by the UK in 1971 and complete independence in 1979 under the new name of Kiribati. The US relinquished all claims to the sparsely inhabited Phoenix and Line Island groups in a 1979 treaty of friendship with Kiribati.

GEOGRAPHY

Location: Oceania, group of 33 coral atolls in the Pacific Ocean, straddling the Equator; the capital Tarawa is about half way between Hawaii and Australia

Geographic coordinates: 1 25 N, 173 00 E

Map references: Oceania

Area: *total:* 811 sq km
country comparison to the world: 187

land: 811 sq km

water: 0 sq km

note: includes three island groups—Gilbert Islands, Line Islands, Phoenix Islands

Area—comparative: four times the size of Washington, DC

Land boundaries: 0 km

Coastline: 1,143 km

Maritime claims: *territorial sea*: 12 nm

exclusive economic zone: 200 nm

Climate: tropical; marine, hot and humid, moderated by trade winds

Terrain: mostly low-lying coral atolls surrounded by extensive reefs

Elevation extremes: *lowest point*: Pacific Ocean 0 m

highest point: unnamed elevation on Banaba 81 m

Natural resources: phosphate (production discontinued in 1979)

Land use: *arable land*: 2.47%

permanent crops: 39.51%

other: 58.02% (2011)

Irrigated land: NA

Natural hazards: typhoons can occur any time, but usually November to March; occasional tornadoes; low level of some of the islands make them sensitive to changes in sea level

Environment—current issues: heavy pollution in lagoon of south Tarawa atoll due to heavy migration mixed with traditional practices such as lagoon latrines and open-pit dumping; ground water at risk

Environment—international agreements:

party to: Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Hazardous Wastes, Law of the Sea, Marine Dumping, Ozone Layer Protection, Whaling

signed, but not ratified: none of the selected agreements

Geography—note: 21 of the 33 islands are inhabited; Banaba (Ocean Island) in Kiribati is one of the three great phosphate rock islands in the Pacific Ocean—the others are Makatea in French Polynesia, and Nauru; Kiribati is the only country in the world to fall into all four hemispheres

(northern, southern, eastern, and western)

ECONOMY

Economy—overview: A remote country of 33 scattered coral atolls, Kiribati has few natural resources and is one of the least developed Pacific Islands. Commercially viable phosphate deposits were exhausted at the time of independence from the UK in 1979. Copra and fish now represent the bulk of production and exports. The economy has fluctuated widely in recent years. Economic development is constrained by a shortage of skilled workers, weak infrastructure, and remoteness from international markets. Tourism provides more than one-fifth of GDP. Private sector initiatives and a financial sector are in the early stages of development. Foreign financial aid from the EU, UK, US, Japan, Australia, New Zealand, Canada, UN agencies, and Taiwan accounts for 20-25% of GDP. Remittances from seamen on merchant ships abroad account for more than \$5 million each year. Kiribati receives around \$15 million annually for the government budget from an Australian trust fund.

KOREA, NORTH

INTRODUCTION

Background: An independent kingdom for much of its long history, Korea was occupied by Japan beginning in 1905 following the Russo-Japanese War. Five years later, Japan formally annexed the entire peninsula. Following World War II, Korea was split with the northern half coming under Soviet-sponsored communist control. After failing in the Korean War (1950-53) to conquer the US-backed Republic of Korea (ROK) in the southern portion by force, North Korea (DPRK), under its founder President KIM Il Sung, adopted a policy of ostensible diplomatic and economic “self-reliance” as a check against outside influence. The DPRK demonized the US as the ultimate threat to its social system through state-funded propaganda, and molded political, economic, and military policies

around the core ideological objective of eventual unification of Korea under Pyongyang's control. KIM Il Sung's son, KIM Jong Il, was officially designated as his father's successor in 1980, assuming a growing political and managerial role until the elder KIM's death in 1994. KIM Jong Un was publicly unveiled as his father's successor in September 2010. Following KIM Jong Il's death in December 2011, the regime began to take actions to transfer power to KIM Jong Un and KIM has now assumed many of his father's former titles and duties. After decades of economic mismanagement and resource misallocation, the DPRK since the mid-1990s has relied heavily on international aid to feed its population. The DPRK began to ease restrictions to allow semi-private markets, starting in 2002, but then sought to roll back the scale of economic reforms in 2005 and 2009. North Korea's history of regional military provocations; proliferation of military-related items; long-range missile development; WMD programs including tests of nuclear devices in 2006, 2009, and 2013; and massive conventional armed forces are of major concern to the international community. The regime in 2013 announced a new policy calling for the simultaneous development of the North's nuclear weapons program and its economy.

ECONOMY

Economy—overview: North Korea, one of the world’s most centrally directed and least open economies, faces chronic economic problems. Industrial capital stock is nearly beyond repair as a result of years of underinvestment, shortages of spare parts, and poor maintenance. Large-scale military spending draws off resources needed for investment and civilian consumption. Industrial and power output have stagnated for years at a fraction of pre-1990 levels. Frequent weather-related crop failures aggravated chronic food shortages caused by on-going systemic problems, including a lack of arable land, collective farming practices, poor soil quality, insufficient fertilization, and persistent shortages of tractors and fuel. Large-scale international food aid deliveries have allowed the people of North Korea to escape widespread starvation since famine threatened in 1995, but the population continues to suffer from prolonged malnutrition and poor living conditions. Since 2002, the government has allowed private “farmers’ markets” to begin selling a wider range of goods. It also permitted some private farming—on an experimental basis—in an effort to boost agricultural output. In December 2009, North Korea carried out a redenomination of its currency, capping the amount of North Korean won that could be exchanged for the new notes, and limiting the exchange to a one-week window. A concurrent crackdown on markets and foreign currency use yielded severe shortages and inflation, forcing Pyongyang to ease the restrictions by February 2010. In response to the sinking of the South Korean warship Cheonan and the shelling of Yeonpyeong Island, South Korea’s government cut off most aid, trade, and bilateral cooperation activities, with the exception of operations at the Kaesong Industrial Complex. In preparation for the 100th anniversary of KIM Il-sung’s birthday in 2012, North Korea continued efforts to develop special economic zones with China and expressed willingness to permit construction of a trilateral gas pipeline that would carry Russian natural gas to South Korea. The North Korean government often highlights its goal of becoming a “strong and prosperous” nation and attracting foreign

investment, a key factor for improving the overall standard of living. In this regard, in 2013 the regime rolled out 14 new Special Economic Zones set up for foreign investors, though the initiative remains in its infancy. Nevertheless, firm political control remains the government's overriding concern, which likely will inhibit changes to North Korea's current economic system.

TRANSNATIONAL ISSUES

Disputes—international: risking arrest, imprisonment, and deportation, tens of thousands of North Koreans cross into China to escape famine, economic privation, and political oppression; North Korea and China dispute the sovereignty of certain islands in Yalu and Tumen rivers; Military Demarcation Line within the 4-km-wide Demilitarized Zone has separated North from South Korea since 1953; periodic incidents in the Yellow Sea with South Korea which claims the Northern Limiting Line as a maritime boundary; North Korea supports South Korea in rejecting Japan's claim to Liancourt Rocks (Tok-do/Take-shima)

Refugees and internally displaced persons:

IDPs: undetermined (periodic flooding and famine during mid-1990s) (2007)

Trafficking in persons: *current situation:* North Korea is a source country for men, women, and children who are subjected to forced labor, forced marriage, and sex trafficking; in the recent past, many North Korean women and girls lured by promises of food, jobs, and freedom migrated to

China illegally to escape poor social and economic conditions only to be forced into prostitution, marriage, or exploitative labor arrangements; North Koreans do not have a choice in the work the government assigns them and are not free to change jobs at will; many North Korean workers recruited to work abroad under bilateral contracts with foreign governments are subjected to forced labor and reportedly face government reprisals if they try to escape or complain to outsiders; thousands of North Koreans, including children, are subjected to forced labor in prison camps

tier rating: Tier 3—North Korea does not fully comply with minimum standards for the elimination of trafficking and is not making significant efforts to do so; the government has conducted no known investigations, prosecutions, or convictions of trafficking offenders or officials complicit in forced labor or forced prostitution; the government also has reported no efforts to identify or assist trafficking victims and continues to deny human trafficking is a problem; authorities provide no discernible protection services to trafficking victims and does not permit NGOs to assist victims (2013)

Illicit drugs: for years, from the 1970s into the 2000s, citizens of the Democratic People's Republic of (North) Korea (DPRK), many of them diplomatic employees of the government, were apprehended abroad while trafficking in narcotics, including two in Turkey in December 2004; police investigations in Taiwan and Japan in recent years have linked North Korea to large illicit shipments of heroin and methamphetamine, including an attempt by the North Korean merchant ship Pong Su to deliver 150 kg of heroin to Australia in April 2003

KOREA, SOUTH

INTRODUCTION

Background: An independent kingdom for much of its long history, Korea was occupied by Japan beginning in 1905 following the Russo-Japanese War. In 1910, Tokyo formally annexed the entire Peninsula. Korea regained its independence following Japan's surrender to the United States in 1945. After World War II, a democratic-based government (Republic of Korea, ROK) was set up in the southern half of the Korean Peninsula while a communist-style government was installed in the north (Democratic People's Republic of Korea, DPRK). During the Korean War (1950-53), US troops and UN forces fought alongside ROK soldiers to defend South Korea from a DPRK invasion supported by China and the Soviet Union. A 1953 armistice split the peninsula along a demilitarized zone at about the 38th

parallel. PARK Chung-hee took over leadership of the country in a 1961 coup. During his regime, from 1961 to 1979, South Korea achieved rapid economic growth, with per capita income rising to roughly 17 times the level of North Korea. South Korea held its first free presidential election under a revised democratic constitution in 1987, with former ROK Army general ROH Tae-woo winning a close race. In 1993, KIM Young-sam (1993-98) became the first civilian president of South Korea's new democratic era. President KIM Dae-jung (1998-2003) won the Nobel Peace Prize in 2000 for his contributions to South Korean democracy and his "Sunshine" policy of engagement with North Korea. President PARK Geun-hye, daughter of former ROK President PARK Chung-hee, took office in February 2013 and is South Korea's first female leader. South Korea holds a non-permanent seat (2013-14) on the UN Security Council and will host the 2018 Winter Olympic Games. Serious tensions with North Korea have punctuated inter-Korean relations in recent years, including the North's attacks on a South Korean ship and island in 2010, nuclear and missile tests, and its temporary closure of the inter-Korean Kaesong Industrial Complex in 2013.

lyrics/music: YUN Ch'i-Ho or AN Ch'ang-Ho/AHN Eaktay

note: adopted 1948, well-known by 1910; both North Korea and South Korea's anthems share the same name and have a vaguely similar melody but have different lyrics

ECONOMY

Economy—overview: South Korea over the past four decades has demonstrated incredible growth and global integration to become a high-tech industrialized economy. In the 1960s, GDP per capita was comparable with levels in the poorer countries of Africa and Asia. In 2004, South Korea joined the trillion-dollar club of world economies, and is currently the world's 12th largest economy. Initially, a system of close government and business ties, including directed credit and import restrictions, made this success possible. The government promoted the import of raw materials and technology at the expense of consumer goods, and encouraged savings and investment over consumption. The Asian financial crisis of 1997-98 exposed longstanding weaknesses in South Korea's development model including high debt/equity ratios and massive short-term foreign borrowing. GDP plunged by 6.9% in 1998, and then recovered by 9% in 1999-2000. South Korea adopted numerous economic reforms following the crisis, including greater openness to foreign investment and imports. Growth moderated to about 4% annually between 2003 and 2007. South Korea's export focused economy was hit hard by the 2008 global economic downturn, but quickly rebounded in subsequent years, reaching 6.3% growth in 2010. The US-Korea Free Trade Agreement was ratified by both governments in 2011 and went into effect in March 2012. Throughout 2012 and 2013 the economy experienced sluggish growth because of market slowdowns in the United States, China, and the Eurozone. The administration in 2014 is likely to face

the challenge of balancing heavy reliance on exports with developing domestic-oriented sectors, such as services. The South Korean economy's long term challenges include a rapidly aging population, inflexible labor market, dominance of large conglomerates (chaebols), and heavy reliance on exports, which comprise about half of GDP.

KOSOVO

INTRODUCTION

Background: The central Balkans were part of the Roman and Byzantine Empires before ethnic Serbs migrated to the territories of modern Kosovo in the 7th century. During the medieval period, Kosovo became the center of a Serbian Empire and saw the construction of many important Serb religious sites, including many architecturally significant Serbian Orthodox monasteries. The defeat of Serbian forces at the Battle of Kosovo in 1389 led to five centuries of Ottoman rule during which large numbers of Turks and Albanians moved to Kosovo. By the end of the 19th century, Albanians replaced the Serbs as the dominant ethnic group in Kosovo. Serbia reacquired control over Kosovo from the Ottoman Empire during the First Balkan War of 1912. After World War II, Kosovo became an autonomous province of Serbia in the Socialist Federal Republic of Yugoslavia (S.F.R.Y.) with status almost equivalent to that of a republic under the 1974 S.F.R.Y. constitution. Despite legislative concessions, Albanian nationalism increased in the 1980s, which led to riots and calls for Kosovo's independence. At the same time, Serb nationalist leaders, such as Slobodan MILOSEVIC, exploited Kosovo Serb claims of maltreatment to secure votes from supporters, many of whom viewed Kosovo as their cultural heartland. Under MILOSEVIC's leadership, Serbia instituted a new constitution in 1989 that revoked Kosovo's status as an autonomous province of Serbia. Kosovo's Albanian leaders responded in 1991 by organizing a referendum that declared Kosovo independent. Under MILOSEVIC, Serbia carried out repressive measures against the Kosovar Albanians in the early 1990s as the unofficial Kosovo government, led by Ibrahim RUGOVA, used passive resistance in an attempt to try to gain international assistance and recognition of an independent Kosovo. Albanians dissatisfied with RUGOVA's passive strategy in the 1990s created the Kosovo Liberation Army and launched an insurgency. Starting in 1998, Serbian military, police, and paramilitary forces under MILOSEVIC conducted a brutal counterinsurgency campaign that resulted in massacres and massive expulsions of ethnic Albanians. Approximately 800,000 ethnic Albanians were forced from their homes in Kosovo during this time. International attempts to mediate the conflict failed, and MILOSEVIC's rejection of a proposed settlement led to a three-month NATO military operation against

Serbia beginning in March 1999 that forced Serbia to agree to withdraw its military and police forces from Kosovo. UN Security Council Resolution 1244 (1999) placed Kosovo under a transitional administration, the UN Interim Administration Mission in Kosovo (UNMIK), pending a determination of Kosovo's future status. A UN-led process began in late 2005 to determine Kosovo's final status. The negotiations ran in stages between 2006 and 2007, but ended without agreement between Belgrade and Pristina. On 17 February 2008, the Kosovo Assembly declared Kosovo independent. Since then, over 100 countries have recognized Kosovo, and it has joined the International Monetary Fund, World Bank, European Bank for Reconstruction and Development, the Council of Europe Development Bank, and signed a framework agreement with the European Investment Bank (EIB). In October 2008, Serbia sought an advisory opinion from the International Court of Justice (ICJ) on the legality under international law of Kosovo's declaration of independence. The ICJ released the advisory opinion in July 2010 affirming that Kosovo's declaration of independence did not violate general principles of international law, UN Security Council Resolution 1244, or the Constitutive Framework. The opinion was closely tailored to Kosovo's unique history and circumstances. Serbia continues to reject Kosovo's independence, but the two countries reached an agreement to normalize their relations in April 2013 through EU-facilitated talks and are currently engaged in the implementation process.

ECONOMY

Economy—overview: Kosovo's economy has shown significant progress in transitioning to a market-based system and maintaining macroeconomic

stability, but it is still highly dependent on the international community and the diaspora for financial and technical assistance. Kosovo's citizens are the poorest in Europe with a per capita GDP (PPP) of \$7,600 in 2013. An unemployment rate of 45% encourages emigration and fuels a significant informal, unreported economy. Remittances from the diaspora—located mainly in Germany, Switzerland, and the Nordic countries—are estimated to account for about 15% of GDP, and donor-financed activities and aid for approximately 10%. Most of Kosovo's population lives in rural towns outside of the capital, Pristina. Inefficient, near-subsistence farming is common—the result of small plots, limited mechanization, and lack of technical expertise. With international assistance, Kosovo has been able to privatize a majority of its state-owned-enterprises. Minerals and metals—including lignite, lead, zinc, nickel, chrome, aluminum, magnesium, and a wide variety of construction materials—once formed the backbone of industry, but output has declined because of ageing equipment and insufficient investment. A limited and unreliable electricity supply due to technical and financial problems is a major impediment to economic development, but Kosovo has received technical assistance to help improve accounting and controls and, in 2012, privatized its distribution network. The US Government is cooperating with the Ministry for Energy and Mines and the World Bank to prepare commercial tenders for the construction of a new power plant, rehabilitation of an old plant, and the development of a coal mine that could supply both. In July 2008, Kosovo received pledges of \$1.9 billion from 37 countries in support of its reform priorities, but the global financial crisis has limited this assistance and also negatively affected remittance inflows. In June 2009, Kosovo joined the World Bank and International Monetary Fund, and Kosovo began servicing its share of the former Yugoslavia's debt. In order to help integrate Kosovo into regional economic structures, UNMIK signed (on behalf of Kosovo) its accession to the Central Europe Free Trade Area (CEFTA) in 2006. Serbia and Bosnia previously had refused to recognize Kosovo's customs stamp or extend reduced tariff privileges for Kosovo products under CEFTA, but both countries resumed trade with Kosovo in 2011. The official currency of Kosovo is the euro, but the Serbian dinar is also used illegally in Serb enclaves. Kosovo's tie to the euro has helped keep core inflation low. Kosovo maintained a budget surplus until 2011, when government expenditures climbed sharply. In 2013 Kosovo signed a Free Trade Agreement with Turkey and is negotiating liberalization of trade with EU as part of a Stabilization and Association Agreement.

KUWAIT

INTRODUCTION

Background: Britain oversaw foreign relations and defense for the ruling Kuwaiti AL-SABAH dynasty from 1899 until independence in 1961. Kuwait was attacked and overrun by Iraq on 2 August 1990. Following several weeks of aerial bombardment, a US-led, UN coalition began a ground assault on 23 February 1991 that liberated Kuwait in four days. Kuwait spent more than \$5 billion to repair oil infrastructure damaged during 1990-91. The AL-SABAH family has ruled since returning to power in 1991 and reestablished an elected legislature that in recent years has become increasingly assertive. The country witnessed the historic election in 2009 of four women to its National Assembly. Amid the 2010-11 uprisings and protests across the Arab world, stateless Arabs, known as bidun, staged small protests in February and March 2011 demanding citizenship, jobs,

and other benefits available to Kuwaiti nationals. Youth activist groups—supported by opposition legislators—rallied repeatedly in 2011 for the prime minister’s dismissal amid allegations of widespread government corruption. Demonstrators forced the prime minister to resign in late 2011. In late 2012, Kuwait witnessed unprecedented protests in response to the Amir’s changes to the electoral law by decree reducing the number of votes per person from four to one. The opposition, led by a coalition of Sunni Islamists, tribalists, some liberals, and myriad youth groups, largely boycotted legislative elections in 2012 and 2013 ushering in legislatures more amenable to the government’s agenda. Since 2006, the Amir has dissolved the National Assembly on five occasions (the Constitutional Court annulled the Assembly in June 2012 and again in June 2013) and shuffled the cabinet over a dozen times, usually citing political stagnation and gridlock between the legislature and the government.

ECONOMY

Economy—overview: Kuwait has a geographically small, but wealthy, relatively open economy with crude oil reserves of about 102 billion barrels—more than 6% of world reserves. Petroleum accounts for nearly half of GDP, 95% of export revenues, and 95% of government income. Kuwaiti officials have committed to increasing oil production to 4 million barrels per day by 2020. Budget surpluses have stayed around 30% of GDP, which has led to higher budget expenditures, particularly wage hikes for many public sector employees, as well as increased allotments to Kuwait’s Future Generations Fund. Kuwait has done little to diversify its economy, in part, because of this positive fiscal situation, and, in part, due to the poor business climate and the historically acrimonious relationship between the National Assembly and the executive branch, which has stymied most movement on economic reforms. In 2010, Kuwait passed an economic development plan that pledges to spend up to \$130 billion over five years to diversify the economy away from oil, attract more investment, and boost private sector participation in the economy, though much of these funds have yet to be allocated.

TRANSNATIONAL ISSUES

Disputes—international: Kuwait and Saudi Arabia continue negotiating a joint maritime boundary with Iran; no maritime boundary exists with Iraq in the Persian Gulf

Refugees and internally displaced persons: *stateless persons:* 93,000 (2012); note—Kuwait's 1959 Nationality Law defined citizens as persons who settled in the country before 1920 and who had maintained normal residence since then; one-third of the population, descendants of Bedouin tribes, missed the window of opportunity to register for nationality rights after Kuwait became independent in 1961 and were classified as bidun (meaning without); since the 1980s Kuwait's bidun have progressively lost their rights, including opportunities for employment and education, amid official claims that they are nationals of other countries who have destroyed their identification documents in hopes of gaining Kuwaiti citizenship; Kuwaiti authorities have delayed processing citizenship applications and labeled biduns as "illegal residents," denying them access to civil documentation, such as birth and marriage certificates; 2011 bidun demonstrations for the recognition of their Kuwaiti nationality led to several arrests

Trafficking in persons: *current situation:* Kuwait is a destination country for men and women subjected to forced labor and, to a lesser degree, forced prostitution; men and women migrate from India, Egypt, Bangladesh, Syria, Pakistan, the Philippines, Sri Lanka, Indonesia, Nepal, Iran, Jordan, Ethiopia, and Iraq to work in Kuwait, most of them in the domestic service, construction, and sanitation sectors; although most of these migrants enter Kuwait voluntarily, upon arrival some are subjected to conditions of forced labor by their sponsors and labor agents, including nonpayment of wages, long working hours without rest, deprivation of food, threats, physical or sexual abuse, and restrictions on movement, such as the withholding of passports or confinement to the workplace

tier rating: Tier 3—Kuwait does not fully comply with the minimum standards for the elimination of trafficking and is not making sufficient

efforts to do so; the government enacted comprehensive anti-trafficking legislation in 2013 but did not report any arrests, prosecutions, convictions, or sentences of traffickers for either forced labor or sex trafficking in the last year; Kuwait's victim protection measures remain weak, particularly due to its lack of proactive victim identification procedures and continued reliance on the sponsorship system, which causes victims of trafficking to be punished for immigration violations rather than protected (2013)

KYRGYZSTAN

INTRODUCTION

Background: A Central Asian country of incredible natural beauty and proud nomadic traditions, most of Kyrgyzstan was formally annexed to Russia in 1876. The Kyrgyz staged a major revolt against the Tsarist Empire in 1916 in which almost one-sixth of the Kyrgyz population was killed. Kyrgyzstan became a Soviet republic in 1936 and achieved independence in 1991 when the USSR dissolved. Nationwide demonstrations in the spring of 2005 resulted in the ouster of President Askar AKAEV, who had run the country since 1990. Former prime minister Kurmanbek BAKIEV overwhelmingly won the presidential election in the summer of 2005. Over the next few years, he manipulated the parliament to accrue new powers for the presidency. In July 2009, after months of harassment against his opponents and media critics, BAKIEV won re-election in a presidential campaign that the international community deemed flawed. In April 2010, violent protests in Bishkek led to the collapse of the BAKIEV regime and his eventual fleeing to Minsk, Belarus. His successor, Roza OTUNBAEVA, served as transitional president until Almazbek ATAMBAEV was inaugurated in December 2011, marking the first peaceful transfer of presidential power in independent Kyrgyzstan's history. Continuing concerns include: the trajectory of democratization, endemic corruption,

poor interethnic relations, and terrorism.

ECONOMY

Economy—overview: Kyrgyzstan is a poor, mountainous country with a dominant agricultural sector. Cotton, tobacco, wool, and meat are the main agricultural products, although only tobacco and cotton are exported in any quantity. Industrial exports include gold, mercury, uranium, natural gas, and electricity. The economy depends heavily on gold exports—mainly from output at the Kumtor gold mine - and on remittances from Kyrgyzstani migrant workers primarily in Russia. Following independence, Kyrgyzstan was progressive in carrying out market reforms, such as an improved regulatory system and land reform. Kyrgyzstan was the first Commonwealth of Independent States (CIS) country to be accepted into the World Trade Organization. Much of the government’s stock in enterprises has been sold. Drops in production had been severe after the breakup of the Soviet Union in December 1991, but by mid-1995, production began to recover and exports began to increase. The overthrow of President BAKIEV

in April 2010 and subsequent ethnic clashes left hundreds dead and damaged infrastructure. Under President ATAMBAYEV, Kyrgyzstan has developed a plan for economic development in coordination with international donors, and has also expressed its intent to join the Customs Union of Russia, Belarus, and Kazakhstan. Progress in fighting corruption, improving transparency in licensing, business permits and taxations, restructuring domestic industry, and attracting foreign aid and investment are key to future growth.

LAOS

INTRODUCTION

Background: Modern-day Laos has its roots in the ancient Lao kingdom of Lan Xang, established in the 14th century under King FA NGUM. For 300 years Lan Xang had influence reaching into present-day Cambodia and Thailand, as well as over all of what is now Laos. After centuries of gradual

decline, Laos came under the domination of Siam (Thailand) from the late 18th century until the late 19th century when it became part of French Indochina. The Franco-Siamese Treaty of 1907 defined the current Lao border with Thailand. In 1975, the communist Pathet Lao took control of the government ending a six-century-old monarchy and instituting a strict socialist regime closely aligned to Vietnam. A gradual, limited return to private enterprise and the liberalization of foreign investment laws began in 1988. Laos became a member of ASEAN in 1997 and the WTO in 2013.

ECONOMY

Economy—overview: The government of Laos, one of the few remaining one-party communist states, began decentralizing control and encouraging private enterprise in 1986. The results, starting from an extremely low base, were striking—growth averaged 6% per year from 1988-2008 except during the short-lived drop caused by the Asian financial crisis that began in 1997. Laos' growth exceeded 7% per year during 2008-13. Despite this high growth rate, Laos remains a country with an underdeveloped infrastructure, particularly in rural areas. It has a basic, but improving, road system, and limited external and internal land-line telecommunications. Electricity is available in 83 % of the country. Laos' economy is heavily dependent on capital-intensive natural resource exports. The labor force, however, still relies on agriculture, dominated by rice cultivation in lowland areas, which accounts for about 25% of GDP and 73% of total employment. Economic growth has reduced official poverty rates from 46% in 1992 to 26% in 2010. The economy also has benefited from high-profile foreign direct investment in hydropower, copper and gold mining, logging, and construction though some projects in these industries have drawn criticism for their environmental impacts. Laos gained Normal Trade Relations status with the US in 2004 and applied for Generalized System of Preferences trade benefits in 2013 after being admitted to the World Trade Organization earlier in the year. Laos is in the process of implementing a value-added tax system. Simplified investment procedures and expanded bank credits for small farmers and small entrepreneurs will improve Laos' economic prospects. The government appears committed to raising the country's profile among investors, but suffered through a fiscal crisis in 2013 brought about by public sector wage increases, fiscal mismanagement, and revenue shortfalls. The World Bank has declared that Laos' goal of graduating from the UN Development Program's list of least-developed countries by 2020 is achievable, and the country is preparing to enter the ASEAN Economic Community in 2015.

0.23% of GDP (2011)

NA% (2010)

Military—note: serving one of the world's least developed countries, the Lao People's Armed Forces (LPAF) is small, poorly funded, and ineffectively resourced; its mission focus is border and internal security, primarily in countering ethnic Hmong insurgent groups; together with the Lao People's Revolutionary Party and the government, the Lao People's Army (LPA) is the third pillar of state machinery, and as such is expected to suppress political and civil unrest and similar national emergencies, but the LPA also has upgraded skills to respond to avian influenza outbreaks; there is no perceived external threat to the state and the LPA maintains strong ties with the neighboring Vietnamese military (2008)

TRANSNATIONAL ISSUES

Disputes—international: southeast Asian states have enhanced border surveillance to check the spread of avian flu; talks continue on completion of demarcation with Thailand but disputes remain over islands in the Mekong River; concern among Mekong River Commission members that China's construction of dams on the Mekong River and its tributaries will affect water levels; Cambodia and Vietnam are concerned about Laos' extensive upstream dam construction

Illicit drugs: estimated opium poppy cultivation in 2008 was 1,900 hectares, about a 73% increase from 2007; estimated potential opium production in 2008 more than tripled to 17 metric tons; unsubstantiated reports of domestic methamphetamine production; growing domestic methamphetamine problem (2007)

LATVIA

INTRODUCTION

Background: The name “Latvia” originates from the ancient Latgalians, one of four eastern Baltic tribes that formed the ethnic core of the Latvian people (ca. 8th-12th centuries A.D.). The region subsequently came under the control of Germans, Poles, Swedes, and finally, Russians. A Latvian republic emerged following World War I, but it was annexed by the USSR in 1940—an action never recognized by the US and many other countries. Latvia reestablished its independence in 1991 following the breakup of the Soviet Union. Although the last Russian troops left in 1994, the status of the Russian minority (some 28% of the population) remains of concern to Moscow. Latvia acceded to both NATO and the EU in the spring of 2004; it joined the eurozone in 2014.

GEOGRAPHY

ECONOMY

Economy—overview: Latvia is a small, open economy with exports contributing nearly a third of GDP. Due to its geographical location, transit services are highly-developed, along with timber and wood-processing, agriculture and food products, and manufacturing of machinery and electronics industries. Corruption continues to be an impediment to attracting foreign direct investment and Latvia's low birth rate and decreasing population are major challenges to its long-term economic vitality. Latvia's economy experienced GDP growth of more than 10% per year during 2006-07, but entered a severe recession in 2008 as a result of an unsustainable current account deficit and large debt exposure amid the softening world economy. Triggered by the collapse of the second largest bank, GDP plunged 18% in 2009. The economy has not returned to pre-crisis levels despite strong growth, especially in the export sector in 2011-12. The IMF, EU, and other international donors provided substantial financial assistance to Latvia as part of an agreement to defend the currency's peg to the euro in exchange for the government's commitment to stringent austerity measures. The IMF/EU program successfully concluded in December 2011. The government of Prime Minister Valdis DOMBROVSKIS remains committed to fiscal prudence and reducing the fiscal deficit. The majority of companies, banks, and real estate have been privatized, although the state still holds sizable stakes in a few large enterprises, including 99.8% ownership of the Latvian national airline. Latvia officially joined the World Trade Organization in February 1999 and the EU in May 2004. Latvia intends to join the euro zone in 2014.

TRANSNATIONAL ISSUES

Disputes—international: Russia demands better Latvian treatment of ethnic Russians in Latvia; boundary demarcated with Latvia and Lithuania; the Latvian parliament has not ratified its 1998 maritime boundary treaty with Lithuania, primarily due to concerns over oil exploration rights; as a member state that forms part of the EU's external border, Latvia has implemented the strict Schengen border rules with Russia

Refugees and internally displaced persons: *stateless persons:* 280,759 (2012); note—individuals who were Latvian citizens prior to the 1940 Soviet occupation and their descendants were recognized as Latvian citizens when the country's independence was restored in 1991; citizens of the former Soviet Union residing in Latvia who have neither Latvian nor other citizenship are considered non-citizens (officially there is no statelessness in Latvia) and are entitled to non-citizen passports; children born after Latvian independence to stateless parents are entitled to Latvian citizenship upon

their parents' request; non-citizens cannot vote or hold certain government jobs and are exempt from military service but can travel visa-free in the EU under the Schengen accord like Latvian citizens; non-citizens can obtain naturalization if they have been permanent residents of Latvia for at least five years, pass tests in Latvian language and history, and know the words of the Latvian national anthem

Illicit drugs: transshipment and destination point for cocaine, synthetic drugs, opiates, and cannabis from Southwest Asia, Western Europe, Latin America, and neighboring Balkan countries; despite improved legislation, vulnerable to money laundering due to nascent enforcement capabilities and comparatively weak regulation of offshore companies and the gaming industry; CIS organized crime (including counterfeiting, corruption, extortion, stolen cars, and prostitution) accounts for most laundered proceeds

LEBANON

INTRODUCTION

Background: Following World War I, France acquired a mandate over the northern portion of the former Ottoman Empire province of Syria. The French demarcated the region of Lebanon in 1920 and granted this area independence in 1943. Since independence the country has been marked by periods of political turmoil interspersed with prosperity built on its position as a regional center for finance and trade. The country's 1975-90 civil war that resulted in an estimated 120,000 fatalities, was followed by years of social and political instability. Sectarianism is a key element of Lebanese political life. Neighboring Syria has long influenced Lebanon's foreign policy and internal policies, and its military occupied Lebanon from 1976 until 2005. The Lebanon-based Hizballah militia and Israel continued attacks and counterattacks against each other after Syria's withdrawal, and fought a brief war in 2006. Lebanon's borders with Syria and Israel remain unresolved.

ECONOMY

Economy—overview: Lebanon has a free-market economy and a strong laissez-faire commercial tradition. The government does not restrict foreign investment; however, the investment climate suffers from red tape, corruption, arbitrary licensing decisions, complex customs procedures, high

taxes, tariffs, and fees, archaic legislation, and weak intellectual property rights. The Lebanese economy is service-oriented; main growth sectors include banking and tourism. The 1975-90 civil war seriously damaged Lebanon's economic infrastructure, cut national output by half, and derailed Lebanon's position as a Middle Eastern entrepot and banking hub. Following the civil war, Lebanon rebuilt much of its war-torn physical and financial infrastructure by borrowing heavily, mostly from domestic banks, which saddled the government with a huge debt burden. Pledges of economic and financial reforms made at separate international donor conferences during the 2000s have mostly gone unfulfilled, including those made during the Paris III Donor Conference in 2007 following the July 2006 war. The collapse of the MIKATI government in early 2011 over its backing of the Special Tribunal for Lebanon and the conflict in neighboring Syria slowed economic growth to the 1-2% range in 2011-13, after four years of 8% average growth. In September 2011 the Cabinet endorsed a bill that would provide \$1.2 billion in funding to improve Lebanon's downtrodden electricity sector, but fiscal limitations will test the government's ability to invest in other areas, such as water.

TRANSNATIONAL ISSUES

Disputes—international: lacking a treaty or other documentation

describing the boundary, portions of the Lebanon-Syria boundary are unclear with several sections in dispute; since 2000, Lebanon has claimed Shab'a Farms area in the Israeli-occupied Golan Heights; the roughly 2,000-strong UN Interim Force in Lebanon has been in place since 1978

Refugees and internally displaced persons: *refugees (country of origin):* 6,516 (Iraq) (2012); 444,480 (Palestinian refugees (UNRWA)) (2013); 1,029,473 (Syria) (2014)

IDPs: at least 47,000 (1975-90 civil war, 2007 Lebanese security forces' destruction of Palestinian refugee camp) (2011)

Trafficking in persons: *current situation:* Lebanon is a source, transit, and destination country for women and children subjected to forced labor and sex trafficking; Eastern European women and children are transported through Lebanon for sexual exploitation in other Middle Eastern countries; women from Sri Lanka, the Philippines, Ethiopia, Kenya, Bangladesh, Nepal, Madagascar, Congo, Togo, Cameroon, and Nigeria are recruited by agencies to work in domestic service but are often subject to conditions indicative of forced labor, including the withholding of passports, nonpayment of wages, restricted movement, threats, and abuse; Lebanon's artiste visa program enabling women to work as dancers for three months in the adult entertainment industry sustains a significant sex trade; anecdotal information indicates some Lebanese children are victims of forced labor, such as street begging and commercial sexual exploitation; Syrian refugee women and children in Lebanon are at increased risk of sex trafficking

tier rating: Tier 2 Watch List—Lebanon does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; the government conducts investigations of human trafficking and possibly some prosecutions but for another year did not report convicting any trafficking offenders or officials complicit in human trafficking; the government continues to lack a formal system for identifying victims and does not have a policy to protect victims from being punished for crimes committed as a direct result of being trafficked; NGOs, rather than the government, provide victim assistance and protection (2013)

Illicit drugs: cannabis cultivation dramatically reduced to 2,500 hectares in 2002 despite continued significant cannabis consumption; opium poppy cultivation minimal; small amounts of Latin American cocaine and Southwest Asian heroin transit country on way to European markets and

for Middle Eastern consumption; money laundering of drug proceeds fuels concern that extremists are benefiting from drug trafficking

LESOTHO

INTRODUCTION

Background: Basutoland was renamed the Kingdom of Lesotho upon independence from the UK in 1966. The Basuto National Party ruled the country during its first two decades. King MOSHOESHOE was exiled in 1990, but returned to Lesotho in 1992 and was reinstated in 1995 and subsequently succeeded by his son, King LETSIE III, in 1996. Constitutional government was restored in 1993 after seven years of military rule. In 1998, violent protests and a military mutiny following a contentious election prompted a brief but bloody intervention by South African and Botswana military forces under the aegis of the Southern African Development Community. Subsequent constitutional reforms restored relative political stability. Peaceful parliamentary elections were held in 2002, but the

National Assembly elections of February 2007 were hotly contested and aggrieved parties disputed how the electoral law was applied to award proportional seats in the Assembly. In May 2012, competitive elections involving 18 parties saw Prime Minister Motsoahae Thomas THABANE form a coalition government—the first in the country’s history—that ousted the 14-year incumbent, Pakalitha MOSISILI, who peacefully transferred power the following month.

ECONOMY

Economy—overview: Small, mountainous, and completely landlocked by South Africa, Lesotho is a least developed country in which about three-fourths of the people live in rural areas and engage in subsistence agriculture. Lesotho produces less than 20% of the nation's demand for food. Rain-fed agriculture is vulnerable to weather and climate variability; an estimated 725,500 people will require food assistance in 2012/13. The distribution of income in Lesotho remains inequitable. Lesotho relies on South Africa for much of its economic activity. Lesotho imports 90% of the goods it consumes from South Africa, including most agricultural inputs. Households depend heavily on remittances from family members working in South Africa, in mines, on farms and as domestic workers, though mining employment has declined substantially since the 1990s. Government revenue depends heavily on transfers from South Africa. Customs duties from the Southern Africa Customs Union accounted for 44% of government revenue in 2012. The South African Government also pays royalties for water transferred to South Africa from a dam and reservoir system in Lesotho. However, the government continues to strengthen its tax system to reduce dependency on customs duties and

other transfers. Access to credit remains a problem for the private sector. The government maintains a large presence in the economy—government consumption accounted for 39% of GDP in 2013 and the government remains Lesotho's largest employer. Lesotho's largest private employer is the textile and garment industry—approximately 36,000 Basotho, mainly women, work in factories producing garments for export to South Africa and the US. Diamond mining in Lesotho has grown in recent years and may contribute 8.5% to GDP by 2015, according to current forecasts. Lesotho's \$362.5 million Millennium Challenge Account Compact, which focused on strengthening the healthcare system, developing the private sector, and providing access to improved water supplies and sanitation facilities, will end in September 2013. Despite the 2008/09 global economic crisis, the economy has had strong, but declining growth since 2010.

1.94% of GDP (2010)

Military—note: Lesotho's declared policy is maintenance of its independent sovereignty and preservation of internal security; in practice, external security is guaranteed by South Africa; restructuring of the Lesotho

Defense Force (LDF) and Ministry of Defense and Public Service over the past five years has focused on subordinating the defense apparatus to civilian control and restoring the LDF's cohesion; the restructuring has considerably improved capabilities and professionalism, but the LDF is disproportionately large for a small, poor country; the government has outlined a reduction to a planned 1,500-man strength, but these plans have met with vociferous resistance from the political opposition and from inside the LDF (2008)

TRANSNATIONAL ISSUES

Disputes—international: South Africa has placed military units to assist police operations along the border of Lesotho, Zimbabwe, and Mozambique to control smuggling, poaching, and illegal migration

Trafficking in persons: *current situation:* Lesotho is a source, transit, and destination country for women and children subjected to forced labor and sex trafficking and for men subjected to forced labor; Basotho women and children are subjected to domestic servitude and children, to a lesser extent, commercial sexual exploitation within Lesotho and South Africa; some Basotho women willingly migrate to South Africa seeking work in domestic service only to be forced into prostitution; some Basotho men who voluntarily migrate to South Africa for work become victims of forced labor in agriculture and mining or are coerced into committing crimes

tier rating: Tier 2 Watch List—Lesotho does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; the government has decreased its anti-trafficking law enforcement and victim protection efforts during 2012; authorities have initiated fewer prosecutions, ceased arresting suspected trafficking offenders due to a backlog of prosecutions, and stopped referring victims to NGO centers for care; the government has not implemented key portions of the 2011 anti-trafficking act, including failing to develop formal referral procedures, establish victim care centers, and complete a national action plan (2013)

LIBERIA

INTRODUCTION

Background: Settlement of freed slaves from the US in what is today Liberia began in 1822; by 1847, the Americo-Liberians were able to establish a republic. William TUBMAN, president from 1944-71, did much to promote foreign investment and to bridge the economic, social, and political gaps between the descendants of the original settlers and the inhabitants of the interior. In 1980, a military coup led by Samuel DOE ushered in a decade of authoritarian rule. In December 1989, Charles TAYLOR launched a rebellion against DOE's regime that led to a prolonged civil war in which DOE was killed. A period of relative peace in 1997 allowed for elections that brought TAYLOR to power, but major fighting resumed in 2000. An August 2003 peace agreement ended the war and

prompted the resignation of former president Charles TAYLOR, who faces war crimes charges in The Hague related to his involvement in Sierra Leone's civil war. After two years of rule by a transitional government, democratic elections in late 2005 brought President Ellen JOHNSON SIRLEAF to power. She subsequently won reelection in 2011 in a second round vote that was boycotted by the opposition and remains challenged to build Liberia's economy and reconcile a nation still recovering from 14 years of fighting. The United Nations Security Council in September 2012 passed Resolution 2066 which calls for a reduction of UN troops in Liberia by half by 2015, bringing the troop total down to fewer than 4000, and challenging Liberia's security sector to fill the gaps.

ECONOMY

Economy—overview: Liberia is a low income country that relies heavily on foreign assistance. Civil war and government mismanagement destroyed much of Liberia’s economy, especially the infrastructure in and around the capital, Monrovia. Many businesses fled the country, taking capital and

expertise with them, but with the conclusion of fighting and the installation of a democratically elected government in 2006, several have returned. Liberia is richly endowed with water, mineral resources, forests, and a climate favorable to agriculture, and iron ore and rubber have driven growth in recent years. Liberia is also reviving its raw timber sector and is encouraging oil exploration. President JOHNSON SIRLEAF, a Harvard-educated banker and administrator, has taken steps to reduce corruption, build support from international donors, and encourage private investment. Rebuilding infrastructure and raising incomes will depend on financial and technical assistance from donor countries and foreign investment in key sectors, such as infrastructure and power generation. The country achieved high growth during 2010-13 due to favorable world prices for its commodities. In the future, growth will depend on global commodity prices, on sustained foreign aid, trade, investment, and remittances, on the development of infrastructure and institutions, but mostly on maintaining political stability and security.

TRANSNATIONAL ISSUES

Disputes—international: although civil unrest continues to abate with the assistance of 18,000 UN Mission in Liberia peacekeepers, as of January 2007, Liberian refugees still remain in Guinea, Cote d'Ivoire, Sierra Leone, and Ghana; Liberia, in turn, shelters refugees fleeing turmoil in Cote d'Ivoire; despite the presence of over 9,000 UN forces in Cote d'Ivoire since 2004, ethnic conflict continues to spread into neighboring states who can no longer send their migrant workers to Ivorian cocoa plantations; UN sanctions ban Liberia from exporting diamonds and timber

Refugees and internally displaced persons: *refugees (country of origin):* 43,618 (Cote d'Ivoire) (2014)

IDPs: undetermined (civil war from 1990-2004; post-election violence in March and April 2011; unclear how many have found durable solutions; many dwell in slums in Monrovia) (2012)

Trafficking in persons: *current situation:* Liberia is a source, transit, and destination country for men, women, and children subjected to forced labor and sex trafficking; most victims are Liberian and are exploited within the country, where they are forced into domestic servitude, begging, prostitution, street vending, agricultural work, and diamond mining; a small number of Liberian men, women, and children are trafficked to Cote d'Ivoire, Guinea, Sierra Leone, Nigeria, and the US, while trafficking victims

are brought to Liberia from neighboring West African countries, including Sierra Leone, Guinea, Cote d'Ivoire, and Nigeria

tier rating: Tier 2 Watch List—Liberia does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; the government has increased its anti-trafficking law enforcement efforts and achieved its first conviction under its 2005 anti-trafficking law; the government has failed to make adequate efforts to identify and protect trafficking victims and has not adopted or implemented the standard operating procedures for assisting victims finalized by the anti-trafficking secretariat in 2012; the referral of victims to NGOs for protective services is inconsistent (2013)

Illicit drugs: transshipment point for Southeast and Southwest Asian heroin and South American cocaine for the European and US markets; corruption, criminal activity, arms-dealing, and diamond trade provide significant potential for money laundering, but the lack of well-developed financial system limits the country's utility as a major money-laundering center

LIBYA

INTRODUCTION

Background: The Italians supplanted the Ottoman Turks in the area around Tripoli in 1911 and did not relinquish their hold until 1943 when defeated in World War II. Libya then passed to UN administration and achieved independence in 1951. Following a 1969 military coup, Col. Muammar al-QADHAFI assumed leadership and began to espouse his political system at home, which was a combination of socialism and Islam. During the 1970s, QADHAFI used oil revenues to promote his ideology outside Libya, supporting subversive and terrorist activities that included the downing of two airliners—one over Scotland, another in Northern Africa—and a discotheque bombing in Berlin. UN sanctions in 1992 isolated QADHAFI politically and economically following the attacks;

sanctions were lifted in 2003 following Libyan acceptance of responsibility for the bombings and agreement to claimant compensation. QADHAFI also agreed to end Libya's program to develop weapons of mass destruction, and he made significant strides in normalizing relations with Western nations. Unrest that began in several Middle Eastern and North African countries in late 2010 erupted in Libyan cities in early 2011. QADHAFI's brutal crackdown on protesters spawned a civil war that triggered UN authorization of air and naval intervention by the international community. After months of seesaw fighting between government and opposition forces, the QADHAFI regime was toppled in mid-2011 and replaced by a transitional government. Libya in 2012 formed a new parliament and elected a new prime minister.

Flag description: three horizontal bands of red (top), black (double width), and green with a white crescent and star centered on the black stripe; the National Transitional Council reintroduced this flag design of the former Kingdom of Libya (1951-1969) on 27 February 2011; it replaced the former all-green banner promulgated by the QADHAFI regime in 1977; the

colors represent the three major regions of the country: red stands for Fezzan, black symbolizes Cyrenaica, and green denotes Tripolitania; the crescent and star represent Islam, the main religion of the country

National symbol(s): star and crescent; hawk

National anthem: *name:* “Allahu Akbar” (God Is Greatest)

lyrics/music: Mahmoud el-SHERIF/Abdalla Shams el-DIN

note: adopted 1969; the anthem was originally a battle song for the Egyptian Army in the 1956 Suez War

ECONOMY

Economy—overview: Libya’s economy is structured primarily around the nation’s energy sector, which generates about 95% of export earnings, 80% of GDP, and 99% of government income. Substantial revenue from the energy sector coupled with a small population give Libya one of the highest per capita GDPs in Africa, but Tripoli largely has not used its significant financial resources to develop national infrastructure or the economy, leaving many citizens poor. In the final five years of QADHAFI’s rule, Libya made some progress on economic reform as part of a broader campaign to reintegrate the country into the international fold. This effort picked up steam after UN sanctions were lifted in September 2003 and after Libya announced in December 2003 that it would abandon programs to build weapons of mass destruction. The process of lifting US unilateral sanctions began in the spring of 2004; all sanctions were removed by June 2006, helping Libya attract greater foreign direct investment, especially in the energy and banking sectors. Libyan oil and gas licensing rounds drew high international interest, but new rounds are unlikely to be successful until Libya establishes a more permanent government and is able to offer more attractive financial terms on contracts and increase security. Libya faces a long road ahead in liberalizing its primarily socialist economy, but the revolution has unleashed previously restrained entrepreneurial activity and increased the potential for the evolution of a more market-based economy. The service and construction sectors expanded over the past five years and could become a larger share of GDP if Tripoli prioritizes capital spending on development projects once political and security uncertainty subside. Climatic conditions and poor soils severely limit agricultural output, and Libya imports about 80% of its food. Libya’s primary agricultural water source is the Great Manmade River Project.

TRANSNATIONAL ISSUES

Disputes—international: dormant disputes include Libyan claims of about 32,000 sq km still reflected on its maps of southeastern Algeria and the FLN's assertions of a claim to Chirac Pastures in southeastern Morocco; various Chadian rebels from the Aozou region reside in southern Libya

Refugees and internally displaced persons: *IDPs: 74,000* (conflict between pro-Qadhafi and anti-Qadhafi forces; figure does not include displaced third-country nationals) (2012)

Trafficking in persons: *current situation:* Libya is a destination and transit country for men and women from sub-Saharan Africa and Asia subjected to forced labor and forced prostitution; migrants who seek employment in Libya as laborers and domestic workers or transit Libya en route to Europe may be subject to forced labor; private employers also recruit migrants from detention centers as forced laborers on farms and construction sites; some sub-Saharan women are reportedly forced to work in Libyan brothels

tier rating: Tier 3—the Libyan Government does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; the government has failed to demonstrate significant efforts to investigate and prosecute trafficking offenders or to protect trafficking victims; policies and practices with respect to undocumented migrant workers has resulted in Libyan authorities detaining and punishing trafficking victims for unlawful acts that were committed as a result of being trafficked; no public anti-trafficking awareness campaigns are conducted; officials receive no training on trafficking issues (2013)

LIECHTENSTEIN

INTRODUCTION

Background: The Principality of Liechtenstein was established within the Holy Roman Empire in 1719. Occupied by both French and Russian troops during the Napoleonic Wars, it became a sovereign state in 1806 and joined the Germanic Confederation in 1815. Liechtenstein became fully independent in 1866 when the Confederation dissolved. Until the end of World War I, it was closely tied to Austria, but the economic devastation caused by that conflict forced Liechtenstein to enter into a customs and monetary union with Switzerland. Since World War II (in which Liechtenstein remained neutral), the country's low taxes have spurred outstanding economic growth. In 2000, shortcomings in banking regulatory oversight resulted in concerns about the use of financial institutions for

money laundering. However, Liechtenstein implemented anti-money laundering legislation and a Mutual Legal Assistance Treaty with the US that went into effect in 2003.

ECONOMY

Economy—overview: Despite its small size and limited natural resources, Liechtenstein has developed into a prosperous, highly industrialized, free-enterprise economy with a vital financial service sector and likely the second highest per capita income in the world. The Liechtenstein economy is widely diversified with a large number of small businesses. Low business taxes—the maximum tax rate is 20%—and easy incorporation rules have induced many holding companies to establish nominal offices in Liechtenstein providing 30% of state revenues. The country participates in a customs union with Switzerland and uses the Swiss franc as its national currency. It imports more than 90% of its energy requirements. Liechtenstein has been a member of the European Economic Area (an organization serving as a bridge between the European Free Trade Association (EFTA) and the EU) since May 1995. The government is working to harmonize its economic policies with those of an integrated Europe. Since 2008, Liechtenstein has faced renewed international pressure—particularly from Germany—to improve transparency in its banking and tax systems. In December 2008, Liechtenstein signed a Tax Information Exchange Agreement with the US. Upon Liechtenstein’s conclusion of 12 bilateral information-sharing agreements, the OECD in October 2009 removed the principality from its “grey list” of countries that had yet to implement the organization’s Model Tax Convention. By the end of 2010,

Liechtenstein had signed 25 Tax Information Exchange Agreements or Double Tax Agreements. In 2011 Liechtenstein joined the Schengen area, which allows passport-free travel across 26 European countries.

LITHUANIA

INTRODUCTION

Background: Lithuanian lands were united under MINDAUGAS in 1236; over the next century, through alliances and conquest, Lithuania extended its territory to include most of present-day Belarus and Ukraine. By the end of the 14th century Lithuania was the largest state in Europe. An alliance with Poland in 1386 led the two countries into a union through the person of a common ruler. In 1569, Lithuania and Poland formally united into a single dual state, the Polish-Lithuanian Commonwealth. This entity survived until 1795 when its remnants were partitioned by surrounding countries. Lithuania regained its independence following World War I but was annexed by the USSR in 1940—an action never recognized by the US and many other countries. On 11 March 1990, Lithuania became the first of

the Soviet republics to declare its independence, but Moscow did not recognize this proclamation until September of 1991 (following the abortive coup in Moscow). The last Russian troops withdrew in 1993. Lithuania subsequently restructured its economy for integration into Western European institutions; it joined both NATO and the EU in the spring of 2004. In January 2014, Lithuania assumed a nonpermanent seat on the UN Security Council for the 2014-15 term.

ECONOMY

Economy—overview: Lithuania gained membership in the World Trade Organization and joined the EU in May 2004. Despite its EU accession,

Lithuania's trade with its Central and Eastern European neighbors, and Russia in particular, accounts for a significant share of total trade. Foreign investment and business support have helped in the transition from the old command economy to a market economy. The three former Soviet Baltic republics were among the hardest hit by the 2008-09 financial crisis. The government's efforts to attract foreign investment, to develop export markets, and to pursue broad economic reforms has been key to Lithuania's quick recovery from a deep recession, making Lithuania one of the fastest growing economies in the EU. Lithuania is committed to meeting the Maastricht criteria to join the euro zone, which the government expects to achieve by 2015. Under the Conservative Party's leadership, Lithuania raised the monthly minimum wage in January 2012 nearly 25% over 2011. In January 2013, the new Social Democrat-led government increased the minimum wage another 25% over January 2012. Despite government efforts, unemployment remains high.

LUXEMBOURG

INTRODUCTION

Background: Founded in 963, Luxembourg became a grand duchy in 1815 and an independent state under the Netherlands. It lost more than half of its territory to Belgium in 1839 but gained a larger measure of autonomy. Full independence was attained in 1867. Overrun by Germany in both world wars, it ended its neutrality in 1948 when it entered into the Benelux Customs Union and when it joined NATO the following year. In 1957, Luxembourg became one of the six founding countries of the European Economic Community (later the European Union), and in 1999 it joined the euro currency area. In January 2013, Luxembourg assumed a nonpermanent seat on the UN Security Council for the 2013-14 term.

ECONOMY

Economy—overview: This small, stable, high-income economy—benefiting from its proximity to France, Belgium, and Germany - has historically featured solid growth, low inflation, and low unemployment. The industrial sector, initially dominated by steel, has become increasingly diversified to include chemicals, rubber, and other products. Growth in the financial sector, which now accounts for about 27% of GDP, has more than compensated for the decline in steel. Most banks are foreign-owned and have extensive foreign dealings, but Luxembourg has lost some of its advantages as a favorable tax location because of OECD and EU pressure. The economy depends on foreign and cross-border workers for about 40% of its labor force. Luxembourg, like all EU members, suffered from the global economic crisis that began in late 2008, but unemployment has trended below the EU average. Following strong expansion from 2004 to 2007, Luxembourg's economy contracted 3.6% in 2009, but rebounded in 2010-11 before slowing again in 2012. The country continues to enjoy an extraordinarily high standard of living—GDP per capita ranks among the highest in the world, and is the highest in the euro zone. Turmoil in the world financial markets and lower global demand during 2008-09 prompted the government to inject capital into the banking sector and implement stimulus measures to boost the economy. Government stimulus measures and support for the banking sector, however, led to a 5% government budget deficit in 2009. Nevertheless, the deficit was cut to 1.1% in 2011 and 0.9% in 2012. Even during the financial crisis and recovery, Luxembourg retained the highest current account surplus as a share of GDP in the euro

zone, owing largely to their strength in financial services. Public debt remains among the lowest of the region although it has more than doubled since 2007 as percentage of GDP. Luxembourg's economy, while stable, grew slowly in 2012 due to ongoing weak growth in the euro area. Authorities have strengthened supervision of domestic banks because of their exposure to the activities of foreign banks.

MACAU

INTRODUCTION

Background: Colonized by the Portuguese in the 16th century, Macau was the first European settlement in the Far East. Pursuant to an agreement signed by China and Portugal on 13 April 1987, Macau became the Macau Special Administrative Region (SAR) of the People's Republic of China on 20 December 1999. In this agreement, China promised that, under its “one

country, two systems” formula, China’s political and economic system would not be imposed on Macau, and that Macau would enjoy a “high degree of autonomy” in all matters except foreign affairs and defense for the subsequent 50 years.

ECONOMY

Economy—overview: Since opening up its locally-controlled casino industry to foreign competition in 2001, Macau has attracted tens of billions of dollars in foreign investment, transforming the territory into one of the world's largest gaming centers. Macau's gaming and tourism businesses were fueled by China's decision to relax travel restrictions on Chinese citizens wishing to visit Macau.—In 2013, Macau's gaming-related taxes accounted

for more than 85% of total government revenue. Macau's economy slowed dramatically in 2009 as a result of the global economic slowdown, but strong growth resumed in 2010-13, largely on the back of tourism from mainland China and the gaming sectors. In 2013, this city of 607,500 hosted nearly 29.3 million visitors. Almost 64% came from mainland China. Macau's traditional manufacturing industry has slowed greatly since the termination of the Multi-Fiber Agreement in 2005. China is Macau's second largest goods export market, behind Hong Kong, and followed by the United States. In 2013, exports were US\$1.1 billion, while gaming receipts were US\$45.2 billion, an 18.6% increase over 2012. Macau's economy expanded by 11.9% in 2013; although impressive, it was a slower growth rate than in previous years. Macau continues to face the challenges of managing its growing casino industry, money-laundering, and the need to diversify the economy away from heavy dependence on gaming revenues. Macau's currency, the pataca, is closely tied to the Hong Kong dollar, which is also freely accepted in the territory.

MACEDONIA

INTRODUCTION

Background: Macedonia gained its independence peacefully from Yugoslavia in 1991. Greece's objection to the new state's use of what it considered a Hellenic name and symbols delayed international recognition, which occurred under the provisional designation of "the Former Yugoslav Republic of Macedonia." In 1995, Greece lifted a 20-month trade embargo and the two countries agreed to normalize relations, but the issue of the name remained unresolved and negotiations for a solution are ongoing. Since 2004, the US and over 130 other nations have recognized Macedonia by its constitutional name, Republic of Macedonia. Ethnic Albanian grievances over perceived political and economic inequities escalated into an insurgency in 2001 that eventually led to the internationally brokered

Ohrid Framework Agreement, which ended the fighting and established guidelines for constitutional amendments and the creation of new laws that enhanced the rights of minorities. Although Macedonia became an EU candidate in 2005, the country still faces challenges, including fully implementing the Framework Agreement, improving relations with Bulgaria, carrying out democratic reforms, and stimulating economic growth and development. Macedonia's membership in NATO was blocked by Greece at the Alliance's Summit of Bucharest in 2008.

ECONOMY

Economy—overview: Since its independence in 1991, Macedonia has made

significant progress in liberalizing its economy and improving its business environment, but has lagged the Balkan region in attracting foreign investment. Unemployment has remained consistently high at more than 30% since 2008, but may be overstated based on the existence of an extensive gray market, estimated to be between 20% and 45% of GDP, that is not captured by official statistics. Macedonia's economy is closely linked to Europe as a customer for exports and source of investment, and has suffered as a result of prolonged weakness in the euro zone. Macedonia maintained macroeconomic stability through the global financial crisis by conducting prudent monetary policy, which keeps the domestic currency pegged against the euro, and by limiting fiscal deficits. The government has been loosening fiscal policy, however, and the budget deficit expanded to 4.2% of GDP in 2013. Macedonia achieved modest GDP growth in 2013 after a small contraction in 2012; inflation is under control.

MADAGASCAR

INTRODUCTION

Background: Formerly an independent kingdom, Madagascar became a French colony in 1896 but regained independence in 1960. During 1992-93, free presidential and National Assembly elections were held ending 17 years of single-party rule. In 1997, in the second presidential race, Didier RATSIRAKA, the leader during the 1970s and 1980s, was returned to the presidency. The 2001 presidential election was contested between the followers of Didier RATSIRAKA and Marc RAVALOMANANA, nearly causing secession of half of the country. In April 2002, the High Constitutional Court announced RAVALOMANANA the winner. RAVALOMANANA achieved a second term following a landslide victory in the generally free and fair presidential elections of 2006. In early 2009, protests over increasing restrictions on opposition press and activities resulted in RAVALOMANANA handing over power to the military, which then conferred the presidency on the mayor of Antananarivo, Andry RAJOELINA, in what amounted to a coup d'état. Following a lengthy mediation process led by the Southern African Development Community (SADC), Madagascar held UN-supported presidential and parliamentary elections in 2013. Former de facto finance minister Hery RAJAONARIMAMPINANINA defeated RAVALOMANANA's favored candidate Jean-Louis ROBINSON in a presidential runoff and was inaugurated in January 2014. Most international observers, while noting some irregularities, declared polls to be a credible reflection of the Malagasy public's will.

ECONOMY

Economy—overview: After discarding socialist economic policies in the mid-1990s, Madagascar followed a World Bank- and IMF-led policy of privatization and liberalization that has been undermined since the start of the political crisis. This strategy placed the country on a slow and steady growth path from an extremely low level. Agriculture, including fishing and forestry, is a mainstay of the economy, accounting for more than one-fourth of GDP and employing 80% of the population. Exports of apparel boomed in recent years primarily due to duty-free access to the US; however, Madagascar's failure to comply with the requirements of the African Growth and Opportunity Act (AGOA) led to the termination of the country's duty-free access in January 2010 and a sharp fall in textile production. Deforestation and erosion, aggravated by the use of firewood as the primary source of fuel, are serious concerns. The current political crisis, which began in early 2009, has dealt additional blows to the economy. Tourism dropped more than 50% in 2009 compared with the previous year, and many investors are wary of entering the uncertain investment environment. Growth was slow during 2010 to 2013 although expansion in mining and agricultural sectors is expected to contribute to more growth in

2014. International organizations and foreign donors are expected to resume development aid to Madagascar once RAJAONARIMAMPIANINA appoints a new government.

TRANSNATIONAL ISSUES

Disputes—international: claims Bassas da India, Europa Island, Glorioso Islands, and Juan de Nova Island (all administered by France); the vegetated drying cays of Banc du Geyser, which were claimed by Madagascar in 1976, also fall within the EEZ claims of the Comoros and France (Glorioso Islands, part of the French Southern and Antarctic Lands)

Trafficking in persons: *current situation:* Madagascar is a source country

for men, women, and children subjected to forced labor and women and children subjected to sex trafficking; poor Malagasy women hired as domestic workers in Lebanon and Kuwait are vulnerable to abuse by recruitment agencies and employers; an increasing number of Malagasy men were victimized by labor trafficking abroad in 2012; Malagasy children are subjected to domestic servitude, prostitution, forced begging, and forced labor within the country, often with the complicity of family members; coastal cities have child sex tourism trades, with Malagasy men being the main clients

tier rating: Tier 2 Watch List—Madagascar does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; law enforcement authorities have made a significant increase in efforts in 2012, resulting in 30 trafficking-related prosecutions and two convictions; public officials complicity in human trafficking, however, remains a significant problem; the government has failed to identify and refer victims to protective services and has not supported NGO-run care facilities; the government also has not engaged any Middle Eastern governments regarding the protection of and legal remedies for Malagasy workers exploited abroad (2013)

Illicit drugs: illicit producer of cannabis (cultivated and wild varieties) used mostly for domestic consumption; transshipment point for heroin

MALAWI

INTRODUCTION

Background: Established in 1891, the British protectorate of Nyasaland became the independent nation of Malawi in 1964. After three decades of one-party rule under President Hastings Kamuzu BANDA the country held multiparty elections in 1994, under a provisional constitution that came into full effect the following year. President Bingu wa MUTHARIKA, elected in May 2004 after a failed attempt by the previous president to amend the constitution to permit another term, struggled to assert his authority against his predecessor and subsequently started his own party, the Democratic Progressive Party (DPP) in 2005. MUTHARIKA was reelected to a second term in May 2009. He oversaw some economic improvement in his first term, but was accused of economic mismanagement and poor governance in his second term. He died abruptly in April 2012 and was succeeded by his vice president, Joyce BANDA, who had earlier started her own party, the People's Party (PP). Population growth, increasing pressure on agricultural lands, corruption, and the scourge of HIV/AIDS pose major problems for Malawi.

ECONOMY

Economy—overview: Landlocked Malawi ranks among the world’s most densely populated and least developed countries. The economy is

predominately agricultural with about 80% of the population living in rural areas. Agriculture, which has benefited from fertilizer subsidies since 2006, accounts for one-third of GDP and 90% of export revenues. The performance of the tobacco sector is key to short-term growth as tobacco accounts for more than half of exports. The economy depends on substantial inflows of economic assistance from the IMF, the World Bank, and individual donor nations. In 2006, Malawi was approved for relief under the Heavily Indebted Poor Countries (HIPC) program. In December 2007, the US granted Malawi eligibility status to receive financial support within the Millennium Challenge Corporation (MCC) initiative. The government faces many challenges including developing a market economy, improving educational facilities, facing up to environmental problems, dealing with the rapidly growing problem of HIV/AIDS, and satisfying foreign donors that fiscal discipline is being tightened. Between 2005 and 2009 President BANDA'S government exhibited improved financial discipline under the guidance of Finance Minister Goodall GONDWE and signed a three year IMF Poverty Reduction and Growth Facility (PRGF) worth \$56 million. The government announced infrastructure projects that could yield improvements, such as a new oil pipeline for better fuel access, and the potential for a waterway link through Mozambican rivers to the ocean for better transportation options. Since 2009, however, Malawi has experienced some setbacks, including a general shortage of foreign exchange, which has damaged its ability to pay for imports, and fuel shortages that hinder transportation and productivity. Investment has fallen continuously for several years and in 2013 amounted to just 13% of GDP. The government has failed to address barriers to investment such as unreliable power, water shortages, poor telecommunications infrastructure, and the high costs of services. Donors, who provided an average of 36% of government revenue in the past five years, suspended general budget support for Malawi in 2011 due to a negative IMF review and governance issues.

MALAYSIA

INTRODUCTION

Background: During the late 18th and 19th centuries, Great Britain established colonies and protectorates in the area of current Malaysia; these were occupied by Japan from 1942 to 1945. In 1948, the British-ruled territories on the Malay Peninsula except Singapore formed the Federation of Malaya, which became independent in 1957. Malaysia was formed in 1963 when the former British colonies of Singapore, as well as Sabah and Sarawak on the northern coast of Borneo, joined the Federation. The first several years of the country's independence were marred by a communist insurgency, Indonesian confrontation with Malaysia, Philippine claims to Sabah, and Singapore's withdrawal in 1965. During the 22-year term of Prime Minister MAHATHIR bin Mohamad (1981-2003), Malaysia was successful in diversifying its economy from dependence on exports of raw materials to the development of manufacturing, services, and tourism. Prime Minister Mohamed NAJIB bin Abdul Razak (in office since April 2009) has continued these pro-business policies and has introduced some civil reforms.

lyrics/music: collective, led by Tunku ABDUL RAHMAN/Pierre Jean DE BERANGER

note: adopted 1957; the full version is only performed in the presence of the king; the tune, which was adopted from a popular French melody titled “La Rosalie,” was originally the anthem of the state of Perak

ECONOMY

Economy—overview: Malaysia, a middle-income country, has transformed itself since the 1970s from a producer of raw materials into an emerging multi-sector economy. Under current Prime Minister NAJIB, Malaysia is attempting to achieve high-income status by 2020 and to move farther up the value-added production chain by attracting investments in Islamic finance, high technology industries, biotechnology, and services. NAJIB’s Economic Transformation Program (ETP) is a series of projects and policy measures intended to accelerate the country’s economic growth. The government has also taken steps to liberalize some services sub-sectors. The NAJIB administration also is continuing efforts to boost domestic demand and reduce the economy’s dependence on exports. Nevertheless, exports - particularly of electronics, oil and gas, palm oil and rubber—remain a significant driver of the economy. As an oil and gas exporter, Malaysia has profited from higher world energy prices, although the rising cost of domestic gasoline and diesel fuel, combined with sustained budget deficits, has forced Kuala Lumpur to begin to address fiscal shortfalls, through initial reductions in energy and sugar subsidies and the announcement of the 2015 implementation of a 6% goods and services tax. The government is also trying to lessen its dependence on state oil producer Petronas. The oil and gas sector supplies about 32% of government revenue in 2013. Bank Negara Malaysia (central bank) maintains healthy foreign exchange reserves, and a

well-developed regulatory regime has limited Malaysia's exposure to riskier financial instruments and the global financial crisis. Nevertheless, Malaysia could be vulnerable to a fall in commodity prices or a general slowdown in global economic activity because exports are a major component of GDP. In order to attract increased investment, NAJIB earlier raised possible revisions to the special economic and social preferences accorded to ethnic Malays under the New Economic Policy of 1970, but retreated in 2013 after he encountered significant opposition from Malay nationalists and other vested interests. In September 2013 NAJIB launched the new Bumiputra Economic Empowerment Program (BEEP), policies that favor and advance the economic condition of ethnic Malays.

TRANSNATIONAL ISSUES

Disputes—international: while the 2002 “Declaration on the Conduct of Parties in the South China Sea” has eased tensions over the Spratly Islands, it is not the legally binding “code of conduct” sought by some parties; Malaysia was not party to the March 2005 joint accord among the national oil companies of China, the Philippines, and Vietnam on conducting marine seismic activities in the Spratly Islands; disputes continue over deliveries of fresh water to Singapore, Singapore’s land reclamation, bridge construction, and maritime boundaries in the Johor and Singapore Straits; in 2008, ICJ awarded sovereignty of Pedra Branca (Pulau Batu Puteh/ Horsburgh Island) to Singapore, and Middle Rocks to Malaysia, but did not rule on maritime regimes, boundaries, or disposition of South Ledge; land and maritime negotiations with Indonesia are ongoing, and disputed areas include the controversial Tanjung Datu and Camar Wulan border area in Borneo and the maritime boundary in the Ambalat oil block in the Celebes Sea; separatist violence in Thailand’s predominantly Muslim southern

provinces prompts measures to close and monitor border with Malaysia to stem terrorist activities; Philippines retains a dormant claim to Malaysia's Sabah State in northern Borneo; per Letters of Exchange signed in 2009, Malaysia in 2010 ceded two hydrocarbon concession blocks to Brunei in exchange for Brunei's sultan dropping claims to the Limbang corridor, which divides Brunei; piracy remains a problem in the Malacca Strait

Refugees and internally displaced persons: *refugees (country of origin):* 84,671 (Burma) (2012)

stateless persons: 40,001 (2012); note—Malaysia's stateless population consists of Rohingya refugees from Burma, ethnic Indians, and the children of Filipino and Indonesian illegal migrants; Burma stripped the Rohingya of their nationality in 1982; Filipino and Indonesian children who have not have been registered for birth certificates by their parents or who received birth certificates stamped "foreigner" are not eligible to go to government schools; these children are vulnerable to statelessness should they not be able to apply to their parents' country of origin for a passport

Trafficking in persons: *current situation:* Malaysia is a destination and, to a lesser extent, a source and transit country for women and children subjected to conditions of forced labor and women and children subjected to sex trafficking; Malaysia is mainly a destination country for foreign workers who migrate willingly from countries including Indonesia, Nepal, India, Thailand, China, the Philippines, Burma, Cambodia, Laos, Bangladesh, Pakistan, and Vietnam but subsequently encounter forced labor or debt bondage at the hands of their employers in the domestic, agricultural, construction, plantation, and industrial sectors; a small number of Malaysian citizens were reportedly trafficked internally and abroad to Singapore, China, and Japan for commercial sexual exploitation; refugees are also vulnerable to trafficking; some officials are reportedly complicit in facilitating trafficking

tier rating: Tier 2 Watch List—Malaysia does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; the government has made no tangible improvements to its inadequate system for identifying and protecting trafficking victims, such as amending its laws to allow victims to reside in NGO shelters; trafficking victims identified by Malaysian authorities are forcibly detained in government facilities, where they are provided with limited, if any, access to legal or psychological assistance by the government or NGOs; increasing efforts are being made to investigate and prosecute trafficking offenders, notably in the area of labor trafficking, though

convictions of sex trafficking offenders has decreased; many front-line officials continue to lack the ability to recognize indicators of human trafficking, hindering the investigation of cases and the identification of victims; although the confiscation of passports by employers is illegal, the government has not prosecuted any employers who confiscated migrants' passports or travel documents or confined them to the workplace (2013)

Illicit drugs: drug trafficking prosecuted vigorously and carries severe penalties; heroin still primary drug of abuse, but synthetic drug demand remains strong; continued ecstasy and methamphetamine producer for domestic users and, to a lesser extent, the regional drug market

MALDIVES

INTRODUCTION

Background: A sultanate since the 12th century, the Maldives became a British protectorate in 1887. It became a republic in 1968, three years after independence. President Maumoon Abdul GAYOOM dominated the islands' political scene for 30 years, elected to six successive terms by single-party referendums. Following political demonstrations in the capital Male in August 2003, the president and his government pledged to embark upon a process of liberalization and democratic reforms, including a more representative political system and expanded political freedoms. Progress was sluggish, however, and many promised reforms were slow to be realized. Nonetheless, political parties were legalized in 2005. In June 2008, a constituent assembly - termed the "Special Majlis"—finalized a new

constitution, which was ratified by the president in August. The first-ever presidential elections under a multi-candidate, multi-party system were held in October 2008. GAYOOM was defeated in a runoff poll by Mohamed NASHEED, a political activist who had been jailed several years earlier by the former regime. President NASHEED faced a number of challenges including strengthening democracy and combating poverty and drug abuse. In early February 2012, after several weeks of street protests following his sacking of a top judge, NASHEED resigned the presidency and handed over power to Vice President Mohammed WAHEED Hassan Maniku. In mid-2012, a Commission of National Inquiry was set by the government to probe events leading up to NASHEED's resignation. Though the commission found no evidence of a coup, the report recommended the need to strengthen the country's democratic institutions to avert similar events in the future, and to further investigate alleged police misconduct during the crisis. Maldivian officials have played a prominent role in international climate change discussions (due to the islands' low elevation and the threat from sea-level rise) on the UN Human Rights Council and in other international forums, as well as in encouraging regional cooperation, especially between India and Pakistan.

ECONOMY

Economy—overview: Tourism, Maldives’ largest economic activity, accounts for nearly 30% of GDP and more than 60% of foreign exchange receipts. Fishing is the second leading sector, but the fish catch has dropped sharply in recent years. Agriculture and manufacturing continue to play a lesser role in the economy, constrained by the limited availability of cultivable land and the shortage of domestic labor. Lower than expected tourist arrivals and fish exports, combined with high government spending on social needs, subsidies, and civil servant salaries contributed to a balance of payments crisis, which was temporarily eased with a \$79.3 million IMF Stand-By agreement. However, after the first two disbursements, the IMF withheld subsequent disbursements due to concerns over Maldives’ growing budget deficit, and the government has been seeking other sources of budgetary support ever since. A new Goods and Services Tax (GST) on tourism introduced in January 2011, on general goods and services in October 2011, and a new Business Profit Tax introduced in July 2011 have provided a boost to revenue. In recent years, gross foreign reserves have hovered around \$300 million, sufficient to finance about two to three months of imports. Diversifying the economy beyond tourism and fishing,

reforming public finance, increasing employment opportunities, and combating corruption, cronyism, and a growing drug problem are other near-term challenges facing the government. Over the longer term Maldivian authorities worry about the impact of erosion and possible global warming on their low-lying country; 80% of the area is 1 meter or less above sea level.

TRANSNATIONAL ISSUES

Disputes—international: none

Trafficking in persons: *current situation:* Maldives is a destination country for men, women, and children subjected to forced labor and sex trafficking and a source country for Maldivian children subjected to human trafficking within the country; Bangladeshi and Indian migrants working both legally and illegally in the construction and service sectors face conditions of forced labor, including fraudulent recruitment, confiscation of identity and travel documents, nonpayment of wages, and debt bondage; a small number of women from Sri Lanka, Thailand, India, China, the Philippines, Bangladesh, Eastern Europe, and former Soviet states are trafficked to Maldives for sexual exploitation; some Maldivian children are transported to the capital for forced domestic service, where they may also be sexually abused

tier rating: Tier 2 Watch List—Maldives does not fully comply with the minimum standards for the elimination of trafficking; the government does not have laws prohibiting all human trafficking offenses but introduced an anti-trafficking law to the legislature in December 2012, approved an anti-trafficking plan for 2012-13, and formed an anti-trafficking steering committee in May 2012; the government reported that it prosecuted some sex trafficking cases but did not take concrete actions to protect trafficking victims and prevent trafficking; the government continues to lack systematic procedures for identifying trafficking victims among vulnerable populations and referring them to protective services; officials continue to confuse human trafficking with human smuggling and the presence of undocumented migrants (2013)

MALI

INTRODUCTION

Background: The Sudanese Republic and Senegal became independent of France in 1960 as the Mali Federation. When Senegal withdrew after only a few months, what formerly made up the Sudanese Republic was renamed Mali. Rule by dictatorship was brought to a close in 1991 by a military coup that ushered in a period of democratic rule. President Alpha KONARE won Mali's first two democratic presidential elections in 1992 and 1997. In keeping with Mali's two-term constitutional limit, he stepped down in 2002 and was succeeded by Amadou Toumani TOURE, who was elected to a second term in 2007 elections that were widely judged to be free and fair. Malian returnees from Libya in 2011 exacerbated tensions in northern Mali, and Tuareg ethnic militias started a rebellion in January 2012. Low- and

mid-level soldiers, frustrated with the poor handling of the rebellion overthrew TOURE on 22 March. Intensive mediation efforts led by the Economic Community of West African States (ECOWAS) returned power to a civilian administration in April with the appointment of interim President Dioncounda TRAORE. The post-coup chaos led to rebels expelling the Malian military from the three northern regions of the country and allowed Islamic militants to set up strongholds. Hundreds of thousands of northern Malians fled the violence to southern Mali and neighboring countries, exacerbating regional food insecurity in host communities. An international military intervention to retake the three northern regions began in January 2013 and within a month most of the north had been retaken. In a democratic presidential election conducted in July and August of 2013, Ibrahim Boubacar KEITA was elected president in the second round.

ECONOMY

Economy—overview: Among the 25 poorest countries in the world, Mali is a landlocked country that depends on gold mining and agricultural exports for revenue. Economic activity is largely confined to the riverine area irrigated by the Niger River and about 65% of its land area is desert or semidesert. About 10% of the population is nomadic and about 80% of the labor force is engaged in farming and fishing. Mali remains dependent on foreign aid. The country’s fiscal status fluctuates with gold and agricultural commodity prices and the harvest; cotton and gold exports make up around 80% of export earnings. Industrial activity is concentrated on processing

farm commodities. Mali is developing its iron ore extraction industry to diversify foreign exchange earnings away from gold. Mali has invested in tourism but security issues hurt the industry. Mali experienced economic growth of about 5% per year between 1996-2011, but the global recession, a military coup, and terrorist activity in the north of the country caused a decline in output in 2012; growth resumed at a slow pace in 2013. The main threat to Mali's economy is a return to physical insecurity. Other long term threats to the economy include high population growth, corruption, a weak infrastructure, and low levels of human capital.

IDPs: 187,000 (Tuareg rebellion since 2012) (2014)

Trafficking in persons: *current situation:* Mali is a source, transit, and destination country for men, women, and children subjected to forced labor and sex trafficking; women and girls are forced into domestic servitude, agricultural labor, and support roles in gold mines, as well as subjected to sex trafficking; Malian boys are found in conditions of forced labor in agricultural settings, gold mines, and the informal commercial sector, as well as forced begging both within Mali and neighboring countries; Malians and other Africans who travel through Mali to Mauritania, Algeria, or Libya in hopes of reaching Europe are particularly at risk of becoming victims of human trafficking; men and boys, primarily of Songhai ethnicity, are subjected to the longstanding practice of debt bondage in the salt mines of Taoudenni in northern Mali; some members of Mali's black Tamachek community are subjected to traditional slavery-related practices, and this involuntary servitude reportedly has extended to their children; reports indicate that non-governmental armed groups operating in northern Mali recruited children as combatants, cooks, porters, guards, spies, and sex slaves

tier rating: Tier 2 Watch List—Mali does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; although the government enacted a comprehensive anti-trafficking law in 2012, it did not demonstrate evidence of overall increasing efforts to address human trafficking over the previous year; the government has failed to prosecute or convict any trafficking offenders, has not provided any direct services to victims, and has not made any tangible prevention efforts; the government continues to cite a lack of personnel and resources as reasons for its inability to adequately identify and rescue child victims of forced labor in the mining industry (2013)

MALTA

INTRODUCTION

Background: Great Britain formally acquired possession of Malta in 1814. The island staunchly supported the UK through both world wars and remained in the Commonwealth when it became independent in 1964. A decade later Malta became a republic. Since about the mid-1980s, the island has transformed itself into a freight transshipment point, a financial center, and a tourist destination. Malta became an EU member in May 2004 and began using the euro as currency in 2008.

ECONOMY

Economy—overview: Malta—the smallest economy in the euro zone—produces only about 20% of its food needs, has limited fresh water supplies, and has few domestic energy sources. Malta’s geographic position between Europe and North Africa makes it a target for irregular migration, which has strained Malta’s political and economic resources. Malta’s fertility rate is below the EU average, and population growth in recent years has largely been from immigration, putting increasing pressure on the pension system. Malta adopted the euro on 1 January 2008. Malta’s economy is dependent on foreign trade, manufacturing, and tourism, and was hurt by the global economic downturn, but fared better than most other EU member states. Malta has low unemployment relative to other European countries, and growth has recovered since the 2009 recession. Malta’s financial services industry has grown in recent years and it has avoided contagion from the European financial crisis, largely because its debt is mostly held domestically and its banks have low exposure to the sovereign debt of peripheral European countries. The EU reopened an excessive deficit procedure against Malta in June 2013, having found that its forecasted deficit for the year was likely to exceed 3% of GDP.

MARSHALL ISLANDS

INTRODUCTION

Background: After almost four decades under US administration as the easternmost part of the UN Trust Territory of the Pacific Islands, the Marshall Islands attained independence in 1986 under a Compact of Free Association. Compensation claims continue as a result of US nuclear testing on some of the atolls between 1947 and 1962. The Marshall Islands hosts the US Army Kwajalein Atoll (USAKA) Reagan Missile Test Site, a key installation in the US missile defense network.

GEOGRAPHY

Location: Oceania, two archipelagic island chains of 29 atolls, each made

up of many small islets, and five single islands in the North Pacific Ocean, about half way between Hawaii and Australia

Geographic coordinates: 9 00 N, 168 00 E

Map references: Oceania

Area: *total:* 181 sq km

country comparison to the world: 217

land: 181 sq km

water: 0 sq km

note: the archipelago includes 11,673 sq km of lagoon waters and encompasses the atolls of Bikini, Eniwetok, Kwajalein, Majuro, Rongelap, and Utrik

Area—comparative: about the size of Washington, DC

Land boundaries: 0 km

Coastline: 370.4 km

Maritime claims: *territorial sea:* 12 nm

ECONOMY

Economy—overview: US assistance and lease payments for the use of Kwajalein Atoll as a US military base are the mainstay of this small island country. The Marshall Islands received roughly \$1 billion in aid from the US during 1986-2001 under the original Compact of Free Association (Compact). In 2002 and 2003, the US and the Marshall Islands renegotiated the Compact’s financial package for a 20-year period, from 2004 to 2024. Under the amended Compact, the Marshall Islands will receive roughly \$1.5 billion in direct US assistance. Agricultural production, primarily subsistence, is concentrated on small farms; the most important commercial crops are coconuts and breadfruit. Industry is limited to handicrafts, tuna processing, and copra. Tourism holds some potential. The islands and atolls have few natural resources, and imports exceed exports. Under the amended Compact, the US is also funding, jointly with the Marshall Islands, a Trust Fund for the people of the Marshall Islands that will provide an income stream beyond 2024 when direct Compact aid is to end.

Trafficking in persons: *current situation:* The Marshall Islands are a destination country for women from East Asia subjected to sex trafficking; foreign women are reportedly forced into prostitution in bars frequented by crew members of fishing vessels; some Chinese women are recruited to the Marshall Islands with promises of legitimate work and are subsequently forced into prostitution

tier rating: Tier 2 Watch List—The Marshall Islands do not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; the government has not identified any victims, investigated any trafficking cases, or prosecuted any offenders under the country's 2011 anti-trafficking law; the government also has no mechanism in place to ensure that trafficking victims receive access to legal, medical, or psychological services; no public awareness campaigns on the dangers of human trafficking have been undertaken (2013)

MAURITANIA

INTRODUCTION

Background: Independent from France in 1960, Mauritania annexed the southern third of the former Spanish Sahara (now Western Sahara) in 1976 but relinquished it after three years of raids by the Polisario guerrilla front seeking independence for the territory. Maaouya Ould Sid Ahmed TAYA seized power in a coup in 1984 and ruled Mauritania with a heavy hand for more than two decades. A series of presidential elections that he held were widely seen as flawed. A bloodless coup in August 2005 deposed President TAYA and ushered in a military council that oversaw a transition to democratic rule. Independent candidate Sidi Ould Cheikh ABDALLAHI was inaugurated in April 2007 as Mauritania's first freely and fairly elected president. His term ended prematurely in August 2008 when a military

junta led by General Mohamed Ould Abdel AZIZ deposed him and installed a military council government. AZIZ was subsequently elected president in July 2009 and sworn in the following month. AZIZ sustained injuries from an accidental shooting by his own troops in October 2012 but has continued to maintain his authority. The country continues to experience ethnic tensions among its black population (Afro-Mauritanians) and white and black Moor (Arab-Berber) communities, and confronts a terrorism threat by al-Qa'ida in the Islamic Maghreb (AQIM).

ECONOMY

Economy—overview: Mauritania’s economy is dominated by natural resources and agriculture. Half the population still depends on agriculture and livestock for a livelihood, even though many of the nomads and subsistence farmers were forced into the cities by recurrent droughts in the 1970s and 1980s. Mauritania’s extensive mineral resources include iron ore, gold, copper, gypsum, and phosphate rock and exploration is ongoing for uranium, crude oil, and natural gas. Extractive commodities make up 75% of Mauritania’s total exports. The nation’s coastal waters are among the richest fishing areas in the world, and fishing accounts for 20% of budget revenues, but overexploitation by foreigners threatens this key source of revenue. Risks to Mauritania’s economy include its recurring exposure to droughts, dependence on foreign aid and investment, and insecurity in neighboring Mali, as well as significant shortages of infrastructure, institutional capacity, and human capital.

refugees (country of origin): 26,000 (Western Saharan—Sahrawis) (2012); 57,406 (Mali) (2014)

Trafficking in persons: *current situation:* Mauritania is a source, transit, and destination country for men, women, and children subjected to conditions of forced labor and sex trafficking; adults and children from traditional slave castes are subjected to slavery-related practices rooted in ancestral master-slave relationships; Mauritanian boys called talibe are trafficked within the country by religious teachers for forced begging; Mauritanian girls, as well as girls from Mali, Senegal, The Gambia, and other West African countries are forced into domestic servitude; Mauritanian women and girls are forced into prostitution in the country or transported to countries in the Middle East for the same purpose

tier rating: Tier 3—Mauritania does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; after the previous year's unprecedented progress in prosecuting and convicting trafficking offenders, the government has not convicted any traffickers; the government has not provided adequate protective services to victims or ensure their referral to NGOs, which provide the majority of care to trafficking victims and generally do not receive government financial support; the absence of measures in place to identify trafficking victims among vulnerable populations may have led to victims being punished for acts committed as a result of being trafficked; the effectiveness of the 2007 anti-slavery law remains impaired because the slaves, many of whom are illiterate, are first required to file a legal complaint, and the government provides no programs to assist victims in lodging slavery complaints (2013)

MAURITIUS

INTRODUCTION

Background: Although known to Arab and Malay sailors as early as the 10th century, Mauritius was first explored by the Portuguese in the 16th century and subsequently settled by the Dutch—who named it in honor of Prince Maurits van NASSAU—in the 17th century. The French assumed control in 1715, developing the island into an important naval base overseeing Indian Ocean trade, and establishing a plantation economy of sugar cane. The British captured the island in 1810, during the Napoleonic Wars. Mauritius remained a strategically important British naval base, and later an air station, playing an important role during World War II for anti-submarine and convoy operations, as well as the collection of signals intelligence. Independence from the UK was attained in 1968. A stable

democracy with regular free elections and a positive human rights record, the country has attracted considerable foreign investment and has earned one of Africa's highest per capita incomes.

ECONOMY

Economy—overview: Since independence in 1968, Mauritius has developed from a low-income, agriculturally based economy to a middle-income diversified economy with growing industrial, financial, and tourist sectors. Mauritius has achieved steady and strong growth over the last several decades, resulting in more equitable income distribution, increased life expectancy, lowered infant mortality, and a much-improved infrastructure. The economy rests on sugar, tourism, textiles and apparel, and financial services, and is expanding into fish processing, information and communications technology, and hospitality and property development. Sugarcane is grown on about 90% of the cultivated land area and accounts for 15% of export earnings. The government’s development strategy centers on creating vertical and horizontal clusters of development in these sectors. Mauritius has attracted more than 32,000 offshore entities, many aimed at commerce in India, South Africa, and China. Investment in the banking sector alone has reached over \$1 billion. Mauritius, with its strong textile sector, has been well poised to take advantage of the Africa Growth and Opportunity Act (AGOA). Mauritius’ sound economic policies and prudent banking practices helped to mitigate negative effects of the global financial crisis in 2008-09. GDP grew in the 3-4% per year range in 2010-13, and the country continues to expand its trade and investment outreach around the globe.

TRANSNATIONAL ISSUES

Disputes—international: Mauritius and Seychelles claim the Chagos Islands; claims French-administered Tromelin Island

Illicit drugs: consumer and transshipment point for heroin from South Asia; small amounts of cannabis produced and consumed locally; significant offshore financial industry creates potential for money laundering, but corruption levels are relatively low and the government appears generally to be committed to regulating its banking industry

MEXICO

INTRODUCTION

Background: The site of several advanced Amerindian civilizations—including the Olmec, Toltec, Teotihuacan, Zapotec, Maya, and Aztec—Mexico was conquered and colonized by Spain in the early 16th century. Administered as the Viceroyalty of New Spain for three centuries, it achieved its independence early in the 19th century. The global financial crisis beginning in late 2008 caused a massive economic downturn the following year, although growth returned quickly in 2010. Ongoing economic and social concerns include low real wages, underemployment for a large segment of the population, inequitable income distribution, and few advancement opportunities for the largely indigenous population in the impoverished southern states. The elections held in 2000 marked the first time since the 1910 Mexican Revolution that an opposition candidate—Vicente FOX of the National Action Party (PAN)—defeated the party in government, the Institutional Revolutionary Party (PRI). He was succeeded in 2006 by another PAN candidate Felipe CALDERON, but the PRI regained the presidency in 2012. Since 2007, Mexico's powerful drug-trafficking organizations have engaged in bloody feuding, resulting in tens of thousands of drug-related homicides.

GEOGRAPHY

Flag description: three equal vertical bands of green (hoist side), white, and red; Mexico's coat of arms (an eagle with a snake in its beak perched on a cactus) is centered in the white band; green signifies hope, joy, and love; white represents peace and honesty; red stands for hardiness, bravery, strength, and valor; the coat of arms is derived from a legend that the wandering Aztec people were to settle at a location where they would see an eagle on a cactus eating a snake; the city they founded, Tenochtitlan, is now Mexico City

note: similar to the flag of Italy, which is shorter, uses lighter shades of red and green, and does not have anything in its white band

National symbol(s): golden eagle

National anthem: *name:* "Himno Nacional Mexicano" (National Anthem of Mexico)

lyrics/music: Francisco Gonzalez BOCANEGRA/Jaime Nuno ROCA

note: adopted 1943, in use since 1854; the anthem is also known as “Mexicanos, al grito de Guerra” (Mexicans, to the War Cry); according to tradition, Francisco Gonzalez BOCANEGRA, an accomplished poet, was uninterested in submitting lyrics to a national anthem contest; his fiancée locked him in a room and refused to release him until the lyrics were completed

ECONOMY

Economy—overview: Mexico has a free market economy in the trillion dollar class. It contains a mixture of modern and outmoded industry and agriculture, increasingly dominated by the private sector. Recent administrations have expanded competition in seaports, railroads, telecommunications, electricity generation, natural gas distribution, and airports. Per capita income is roughly one-third that of the US; income distribution remains highly unequal. Since the implementation of the North American Free Trade Agreement (NAFTA) in 1994, Mexico’s share of US imports has increased from 7% to 12%, and its share of Canadian imports has doubled to 5.5%. Mexico has free trade agreements with over 50 countries including Guatemala, Honduras, El Salvador, the European Free Trade Area, and Japan - putting more than 90% of trade under free trade agreements. In 2012 Mexico formally joined the Trans-Pacific Partnership negotiations and in July it formed the Pacific Alliance with Peru, Colombia and Chile. In 2007, during its first year in office, the Felipe CALDERON administration was able to garner support from the opposition to successfully pass pension and fiscal reforms. The administration passed an energy reform measure in 2008 and another fiscal reform in 2009. Mexico’s GDP plunged 6.2% in 2009 as world demand for exports dropped, asset prices tumbled, and remittances and investment declined. GDP recovered during 2010-13 with exports—particularly to the United States—leading the way. In November 2012, Mexico’s legislature passed a comprehensive labor reform which was signed into law by former President Felipe CALDERON. Mexico’s new PRI government, led by President Enrique PENA NIETO, has emphasized economic reforms during its first year in office, passing education, energy, financial, fiscal and telecommunications reform legislation. Nevertheless, administration estimates show GDP growth slowed in 2013 to just over 1%.

TRANSNATIONAL ISSUES

Disputes—international: abundant rainfall in recent years along much of the Mexico-US border region has ameliorated periodically strained water-sharing arrangements; the US has intensified security measures to monitor and control legal and illegal personnel, transport, and commodities across its border with Mexico; Mexico must deal with thousands of impoverished Guatemalans and other Central Americans who cross the porous border looking for work in Mexico and the United States; Belize and Mexico are

working to solve minor border demarcation discrepancies arising from inaccuracies in the 1898 border treaty

Refugees and internally displaced persons:

IDPs: 160,000 (government's quashing of Zapatista uprising in 1994 in eastern Chiapas Region; drug cartel violence and government's military response since 2007; violence between and within indigenous groups) (2011)

stateless persons: 7 (2012)

Illicit drugs: major drug-producing and transit nation; world's second largest opium poppy cultivator; opium poppy cultivation in 2009 rose 31% over 2008 to 19,500 hectares yielding a potential production of 50 metric tons of pure heroin, or 125 metric tons of "black tar" heroin, the dominant form of Mexican heroin in the western United States; marijuana cultivation increased 45% to 17,500 hectares in 2009; government conducts the largest independent illicit-crop eradication program in the world; continues as the primary transshipment country for US-bound cocaine from South America, with an estimated 95% of annual cocaine movements toward the US stopping in Mexico; major drug syndicates control the majority of drug trafficking throughout the country; producer and distributor of ecstasy; significant money-laundering center; major supplier of heroin and largest foreign supplier of marijuana and methamphetamine to the US market (2007)

FEDERATED STATES OF MICRONESIA

INTRODUCTION

Background: The Caroline Islands are a widely scattered archipelago in the western Pacific Ocean; they became part of a UN Trust Territory under US administration following World War II. The eastern four island groups adopted a constitution in 1979 and chose to become the Federated States of Micronesia. (The fifth, westernmost island group became Palau.) Independence came in 1986 under a Compact of Free Association with the US, which was amended and renewed in 2004. Present concerns include large-scale unemployment, overfishing, and overdependence on US aid.

note: adopted 1991; the anthem is also known as "Across All Micronesia;" the music is based on the 1820 German patriotic song "Ich hab mich ergeben," which was the West German national anthem from 1949-1950; variants of this tune are used in Johannes Brahms' "Festival Overture" and Gustav Mahler's "Third Symphony"

ECONOMY

Economy—overview: Economic activity consists of subsistence farming and fishing and government which is funded largely by Compact of Free Association (Compact) assistance provided by the US. The islands have few known mineral deposits worth commercial exploration. The potential for tourism is also limited by isolation, lack of adequate facilities, and limited air and water connections hinder development. Under the terms of the original Compact, the US provided \$1.3 billion in grants and aid in 1986-2001. The US and the Federated States of Micronesia (FSM) negotiated a second (amended) Compact agreement in 2002-2003 that took effect in 2004. The amended Compact runs for a 20-year period to 2024; during which the US will provide roughly \$2.1 billion to the FSM. The amended Compact also includes a Trust Fund for the people of the FSM which is to provide an income stream beyond 2024 when Compact grants are to end. The country's medium-term economic outlook appears fragile because of reduced US assistance and lackluster performance of its small and stagnant private sector.

TRANSNATIONAL ISSUES

Disputes—international: none

Trafficking in persons: *current situation:* Micronesia is a source, and to a limited extent, destination country for women subjected to sex trafficking;

Micronesian women are fraudulently recruited for jobs in the US and its territories only to be forced into prostitution or labor upon arrival; Micronesian and foreign women and children are also reportedly prostituted on fishing vessels in Micronesia or its territorial waters, as well as restaurants and clubs frequented by fishermen; complaints of nonpayment and inhuman treatment on fishing boats has led to investigations of labor trafficking

tier rating: Tier 2 Watch List—Micronesia does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; despite passage of implementing regulations for Micronesia's 2012 trafficking law, the government has not reported any investigations, prosecutions, or convictions for sex or labor trafficking; the government also makes no efforts to identify trafficking victims and refer them to protective services; no NGOs provide services to victims; limited efforts are made to increase the public's awareness of human trafficking (2013)

MOLDOVA

INTRODUCTION

Background: Part of Romania during the interwar period, Moldova was incorporated into the Soviet Union at the close of World War II. Although the country has been independent from the USSR since 1991, Russian forces have remained on Moldovan territory east of the Nistru River supporting the separatist region of Transnistria, composed of a Slavic majority population (mostly Ukrainians and Russians), but with a sizeable ethnic Moldovan minority. One of the poorest nations in Europe, Moldova became the first former Soviet state to elect a communist, Vladimir VORONIN, as its president in 2001. VORONIN served as Moldova's president until he resigned in September 2009, following the opposition's gain of a narrow majority in July parliamentary elections and the Communist Party's (PCRM) subsequent inability to attract the three-fifths of parliamentary votes required to elect a president and, by doing so, put into place a permanent government. Four Moldovan opposition parties formed a new coalition, the Alliance for European Integration (AEI), iterations of which have acted as Moldova's governing coalitions since. Moldova experienced significant political uncertainty between 2009 and early 2012, holding three general elections and numerous presidential ballots in parliament, all of which failed to secure a president. Following November 2010 parliamentary elections, a reconstituted AEI-coalition consisting of three of the four original AEI parties formed a government, and in March 2012 was finally able to elect an independent as president. As of late May 2013, the ruling coalition—comprised of two of the original AEI parties and a splinter group from a third—is called the Pro-European Coalition. In November 2013, the Moldovan Government initialed an Association Agreement with the European Union (EU), advancing the coalition's policy priority of EU integration.

ECONOMY

Economy—overview: Despite recent progress, Moldova remains one of the poorest countries in Europe. With a moderate climate and good farmland, Moldova's economy relies heavily on its agriculture sector, featuring fruits, vegetables, wine, and tobacco. Moldova also depends on annual remittances of about \$1.6 billion from the roughly one million Moldovans working in Europe, Russia, and other former Soviet Bloc countries. With few natural energy resources, Moldova imports almost all of its energy supplies from Russia and Ukraine. Moldova's dependence on Russian energy is underscored by a growing \$5 billion debt to Russian natural gas supplier Gazprom, largely the result of unreimbursed natural gas consumption in the separatist Transnistria region. In August 2013, work began on a new

pipeline between Moldova and Romania that may eventually break Russia's monopoly on Moldova's gas supplies. The government's goal of EU integration has resulted in some market-oriented progress. Moldova experienced better than expected economic growth in 2013 due to increased agriculture production, to economic policies adopted by the Moldovan government since 2009, and to the receipt of EU trade preferences. Moldova is poised to sign an Association Agreement and a Deep and Comprehensive Free Trade Agreement with the EU during fall 2014, connecting Moldovan products to the world's largest market. Still, growth has been hampered by high prices for Russian natural gas, a Russian import ban on Moldovan wine, increased foreign scrutiny of Moldovan agricultural products, and by Moldova's large external debt. Over the longer term, Moldova's economy remains vulnerable to political uncertainty, weak administrative capacity, vested bureaucratic interests, corruption, higher fuel prices, Russian pressure, and the illegal separatist regime in Moldova's Transnistria region.

MONACO

INTRODUCTION

Background: The Genoese built a fortress on the site of present day Monaco in 1215. The current ruling GRIMALDI family first seized temporary control in 1297, and again in 1331, but were not able to permanently secure their holding until 1419. Economic development was spurred in the late 19th century with a railroad linkup to France and the opening of a casino. Since then, the principality's mild climate, splendid scenery, and gambling facilities have made Monaco world famous as a tourist and recreation center.

ECONOMY

Economy—overview: Monaco, bordering France on the Mediterranean coast, is a popular resort, attracting tourists to its casino and pleasant climate. The principality also is a banking center and has successfully sought to diversify into services and small, high-value-added, nonpolluting industries. The state has no income tax and low business taxes and thrives as a tax haven both for individuals who have established residence and for foreign companies that have set up businesses and offices. Monaco, however, is not a tax-free shelter; it charges nearly 20% value-added tax, collects stamp duties, and companies face a 33% tax on profits unless they can show that three-quarters of profits are generated within the principality. Monaco's reliance on tourism and banking for its economic growth has left it vulnerable to a downturn in France and other European economies which are the principality's main trade partners. In 2009, Monaco's GDP fell by 11.5% as the euro-zone crisis precipitated a sharp drop in tourism and retail activity and home sales. A modest recovery ensued in 2010, but Monaco's economic prospects remain uncertain, and tied to future euro-zone growth. Weak economic growth also has deteriorated public finances as the principality recorded budget deficits in 2011-12. Monaco was formally removed from the OECD's "grey list" of uncooperative tax jurisdictions in late 2009, but continues to face international pressure to abandon its banking secrecy laws and help combat tax evasion. The state retains

monopolies in a number of sectors, including tobacco, the telephone network, and the postal service. Living standards are high, roughly comparable to those in prosperous French metropolitan areas.

MONGOLIA

INTROUCTION

Background: The Mongols gained fame in the 13th century when under Chinggis KHAAN they established a huge Eurasian empire through conquest. After his death the empire was divided into several powerful Mongol states, but these broke apart in the 14th century. The Mongols eventually retired to their original steppe homelands and in the late 17th century came under Chinese rule. Mongolia won its independence in 1921 with Soviet backing and a communist regime was installed in 1924. The modern country of Mongolia, however, represents only part of the Mongols' historical homeland; more ethnic Mongolians live in the Inner Mongolia Autonomous Region in the People's Republic of China than in Mongolia. Following a peaceful democratic revolution, the ex-communist Mongolian People's Revolutionary Party (MPRP) won elections in 1990 and 1992, but was defeated by the Democratic Union Coalition (DUC) in the 1996 parliamentary election. The MPRP won an overwhelming majority in the 2000 parliamentary election, but the party lost seats in the 2004 election and shared power with democratic coalition parties from 2004-08. The MPRP regained a solid majority in the 2008 parliamentary elections but nevertheless formed a coalition government with the Democratic Party that lasted until January 2012. In 2009, current President ELBEGDORJ of the

Democratic Party was elected to office and was re-elected for his second term in June 2013. In 2010, the MPRP voted to retake the name of the Mongolian People's Party (MPP), a name it used in the early 1920s. Shortly thereafter, a new party was formed by former president ENKHBAYAR, which adopted the MPRP name. In the 2012 Parliamentary elections, a coalition of four political parties led by the Democratic Party, gained control of the Parliament.

ECONOMY

Economy—overview: Mongolia’s extensive mineral deposits and attendant growth in mining-sector activities have transformed Mongolia’s economy, which traditionally has been dependent on herding and agriculture. Mongolia’s copper, gold, coal, molybdenum, fluorspar, uranium, tin, and tungsten deposits, among others, have attracted foreign direct investment. Soviet assistance, at its height one-third of GDP, disappeared almost overnight in 1990 and 1991 at the time of the dismantlement of the USSR. The following decade saw Mongolia endure both deep recession, because of political inaction and natural disasters, as well as economic growth, because of reform-embracing, free-market economics and extensive privatization of the formerly state-run economy. The country opened a fledgling stock exchange in 1991. Mongolia joined the World Trade Organization in 1997 and seeks to expand its participation in regional economic and trade regimes. Growth averaged nearly 9% per year in 2004-08 largely because of high copper prices globally and new gold production. By late 2008, Mongolia was hit hard by the global financial crisis. Slower global economic growth hurt the country’s exports, notably copper, and slashed government

revenues. As a result, Mongolia's real economy contracted 1.3% in 2009. In early 2009, the International Monetary Fund reached a \$236 million Stand-by Arrangement with Mongolia and the country has largely emerged from the crisis with better regulations and closer supervision. The banking sector strengthened but weaknesses remain. In October 2009, Mongolia passed long-awaited legislation on an investment agreement to develop the Oyu Tolgoi mine, considered to be among the world's largest untapped copper-gold deposits. Mongolia's ongoing dispute with a foreign investor over Oyu Tolgoi, however, has called into question the attractiveness of Mongolia as a destination for foreign direct investment. Negotiations to develop the massive Tavan Tolgoi coal field also have stalled. The economy has grown more than 10% per year since 2010, largely on the strength of commodity exports to nearby countries and high government spending domestically. Mongolia's economy, however, faces near-term economic risks from the government's loose fiscal and monetary policies, which are contributing to high inflation, and from uncertainties in foreign demand for Mongolian exports. Trade with China represents more than half of Mongolia's total external trade—China receives more than 90% of Mongolia's exports and is Mongolia's largest supplier. Mongolia has relied on Russia for energy supplies, leaving it vulnerable to price increases; in the first 11 months of 2013, Mongolia purchased 76% of its gasoline and diesel fuel and a substantial amount of electric power from Russia. A drop in foreign direct investment and a decrease in Chinese demand for Mongolia's mineral exports are putting pressure on Mongolia's balance of payments. Remittances from Mongolians working abroad, particularly in South Korea, are significant.

MONTENEGRO

INTRODUCTION

Background: The use of the name Crna Gora or Black Mountain (Montenegro) began in the 13th century in reference to a highland region in the Serbian province of Zeta. The later medieval state of Zeta maintained its existence until 1496 when Montenegro finally fell under Ottoman rule. Over subsequent centuries Montenegro managed to maintain a level of autonomy within the Ottoman Empire. From the 16th to 19th centuries, Montenegro was a theocracy ruled by a series of bishop princes; in 1852, it transformed into a secular principality. Montenegro was recognized as an independent sovereign principality at the Congress of Berlin in 1878. After World War I, during which Montenegro fought on the side of the Allies, Montenegro was absorbed by the Kingdom of Serbs, Croats, and Slovenes,

which became the Kingdom of Yugoslavia in 1929; at the conclusion of World War II, it became a constituent republic of the Socialist Federal Republic of Yugoslavia. When the latter dissolved in 1992, Montenegro federated with Serbia, creating the Federal Republic of Yugoslavia and, after 2003, shifting to a looser State Union of Serbia and Montenegro. In May 2006, Montenegro invoked its right under the Constitutional Charter of Serbia and Montenegro to hold a referendum on independence from the state union. The vote for severing ties with Serbia barely exceeded 55%—the threshold set by the EU—allowing Montenegro to formally restore its independence on 3 June 2006.

Flag description: a red field bordered by a narrow golden-yellow stripe with the Montenegrin coat of arms centered; the arms consist of a double-headed golden eagle—symbolizing the unity of church and state—surmounted by a crown; the eagle holds a golden scepter in its right claw and a blue orb in its left; the breast shield over the eagle shows a golden lion

passant on a green field in front of a blue sky; the lion is symbol of episcopal authority and harkens back to the three and a half centuries that Montenegro was ruled as a theocracy

National symbol(s): double-headed eagle

National anthem: *name:* “Oj, svijetla majska zoro” (Oh, Bright Dawn of May)

lyrics/music: Sekula DRLJEVIC/unknown, arranged by Zarko MIKOVIC

note: adopted 2004; the anthem’s music is based on a Montenegrin folk song

ECONOMY

Economy—overview: Montenegro’s economy is slowly transitioning to a market system, but the state sector remains large and additional institutional changes are needed. The economy relies heavily on foreign tourism and the export of refined metals. Unprofitable state-owned enterprises, especially the Podgorica Aluminum Combine, the country’s largest exporter, weigh heavily on public finances. During the MILOSEVIC era, Montenegro severed its economy from Serbia, maintained its own central bank, adopted the Deutsche Mark, then shifted to the euro—rather than the Yugoslav dinar—as official currency, collected customs tariffs, and managed its own budget. The 2006 dissolution of the loose political union between Serbia and Montenegro led to separate memberships in several international financial institutions, such as the European Bank for Reconstruction and Development. In January 2007, Montenegro joined the World Bank and IMF. Montenegro became the 156th member of World Trade Organization in December 2011. The European Council (EC) granted candidate country status to Montenegro at the December 2010 session. Montenegro began negotiations to join the EC in June, 2012, having met the conditions set down by the European Council, which called on Montenegro to take steps to fight corruption and organized crime. Unemployment and disparities in regional development, especially in the north, remain key political and economic problems. The global financial crisis had a significant negative impact on the economy, due to a credit crunch, a decline in the real estate sector, and a fall in aluminum exports. The Government of Montenegro increased value added tax (VAT) from 17% in 2012 to 19% in 2013 and raised income tax rates from 9% to 15% for those earning over €480 a month. In 2013, the government also retrenched by freezing pensions and limiting salary increases for public enterprises and members of the parliament.

MONTSERRAT

INTRODUCTION

Background: English and Irish colonists from St. Kitts first settled on Montserrat in 1632; the first African slaves arrived three decades later. The British and French fought for possession of the island for most of the 18th century, but it finally was confirmed as a British possession in 1783. The island's sugar plantation economy was converted to small farm landholdings in the mid 19th century. Much of this island was devastated and two-thirds of the population fled abroad because of the eruption of the Soufriere Hills Volcano that began on 18 July 1995. Montserrat has endured volcanic activity since, with the last eruption occurring in July 2003.

GEOGRAPHY

ECONOMY

Economy—overview: Severe volcanic activity, which began in July 1995, has put a damper on this small, open economy. A catastrophic eruption in June 1997 closed the airport and seaports, causing further economic and social dislocation. Two-thirds of the 12,000 inhabitants fled the island. Some began to return in 1998 but lack of housing limited the number. The agriculture sector continued to be affected by the lack of suitable land for farming and the destruction of crops. Prospects for the economy depend largely on developments in relation to the volcanic activity and on public sector construction activity. Half of the island remains uninhabitable. In January 2013, the EU announced the disbursement of a \$55.2 million aid package to Montserrat in order to boost the country's economic recovery, with a specific focus on public finance management, public sector reform, and prudent economic management.

MOROCCO

INTRODUCTION

Background: In 788, about a century after the Arab conquest of North Africa, a series of Moroccan Muslim dynasties began to rule in Morocco. In the 16th century, the Sa'di monarchy, particularly under Ahmad al-MANSUR (1578-1603), repelled foreign invaders and inaugurated a golden age. The Alaouite Dynasty, to which the current Moroccan royal family belongs, dates from the 17th century. In 1860, Spain occupied northern Morocco and ushered in a half century of trade rivalry among European powers that saw Morocco's sovereignty steadily erode; in 1912, the French imposed a protectorate over the country. A protracted independence struggle with France ended successfully in 1956. The internationalized city of Tangier and most Spanish possessions were turned over to the new

country that same year. Sultan MOHAMMED V, the current monarch's grandfather, organized the new state as a constitutional monarchy and in 1957 assumed the title of king. Although Morocco is not the UN-recognized Administering Power for the Western Sahara, it exercises de facto administrative control over 80% of the territory. The UN since 1991 has monitored a ceasefire between Morocco and the Polisario Front and leads ongoing negotiations over the status of the territory. King MOHAMMED VI in early 2011 responded to the spread of pro-democracy protests in the region by implementing a reform program that included a new constitution, passed by popular referendum in July 2011, under which some new powers were extended to parliament and the prime minister but ultimate authority remains in the hands of the monarch. In November 2012, the Justice and Development Party—a moderate Islamist party—won the largest number of seats in parliamentary elections, becoming the first Islamist party to lead the Moroccan Government.

ECONOMY

Economy—overview: Morocco has capitalized on its proximity to Europe and relatively low labor costs to build a diverse, open, market-oriented economy. In the 1980s Morocco was a heavily indebted country before pursuing austerity measures and pro-market reforms, overseen by the IMF. Since taking the throne in 1999, King MOHAMMED VI has presided over a stable economy marked by steady growth, low inflation, and gradually falling unemployment, although a poor harvest and economic difficulties in Europe contributed to an economic slowdown in 2012. Industrial development strategies and infrastructure improvements—most visibly illustrated by a new port and free trade zone near Tangier—are improving Morocco's competitiveness. Morocco also seeks to expand its renewable energy capacity with a goal of making renewable 40% of electricity output by 2020. Key sectors of the economy include agriculture, tourism, phosphates, textiles, apparel, and subcomponents. To boost exports, Morocco entered into a bilateral Free Trade Agreement with the United States in 2006 and an Advanced Status agreement with the European Union in 2008. Despite Morocco's economic progress, the country suffers from high unemployment, poverty, and illiteracy, particularly in rural areas. In 2011 and 2012, high prices on fuel—which is subsidized and almost entirely

imported—strained the government's budget and widened the country's current account deficit. In the fall of 2013, Morocco capped some of its fuel subsidies in an effort to gradually reduce the country's large budgetary deficit. Key economic challenges for Morocco include fighting corruption and reforming the education system, the judiciary, and the government's costly subsidy program.

TRANSNATIONAL ISSUES

Disputes—international: claims and administers Western Sahara whose sovereignty remains unresolved; Morocco protests Spain's control over the coastal enclaves of Ceuta, Melilla, and Penon de Velez de la Gomera, the islands of Penon de Alhucemas and Islas Chafarinas, and surrounding waters; both countries claim Isla Perejil (Leila Island); discussions have not progressed on a comprehensive maritime delimitation, setting limits on resource exploration and refugee interdiction, since Morocco's 2002 rejection of Spain's unilateral designation of a median line from the Canary Islands; Morocco serves as one of the primary launching areas of illegal migration into Spain from North Africa; Algeria's border with Morocco remains an irritant to bilateral relations, each nation accusing the other of

harboring militants and arms smuggling; the National Liberation Front's assertions of a claim to Chirac Pastures in southeastern Morocco is a dormant dispute

Trafficking in persons: *current situation:* Morocco is a source, destination, and transit country for men, women, and children who are subjected to forced labor and sex trafficking; Moroccan adults and children are exploited for forced labor and forced prostitution in the Middle East and Europe; some Moroccan girls recruited to work as maids experience conditions of forced labor, while some Moroccan boys are forced to work as apprentices in the artisan and construction industries and in mechanic shops; women and children from sub-Saharan Africa and South Asia who voluntarily enter Morocco are subsequently coerced into prostitution or, less frequently, domestic service; women and children from Cote d'Ivoire, the Democratic Republic of the Congo, and Nigeria are also vulnerable to sex trafficking and, to a lesser extent, forced labor in Morocco

tier rating: Tier 2 Watch List—Morocco does not comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; the government does not demonstrate progress in investigating, prosecuting, convicting, and adequately punishing trafficking offenders and has failed to provide law enforcement data; it has not developed or employed systematic procedures to proactively identify trafficking victims among vulnerable groups, particularly the sub-Saharan migrant community, but has made some efforts to offer protective services to Moroccan women and child trafficking victims; Morocco continues to lack a single comprehensive anti-trafficking law (2013)

Illicit drugs: one of the world's largest producers of illicit hashish; shipments of hashish mostly directed to Western Europe; transit point for cocaine from South America destined for Western Europe; significant consumer of cannabis

MOZAMBIQUE

INTRODUCTION

Background: Almost five centuries as a Portuguese colony came to a close with independence in 1975. Large-scale emigration, economic dependence on South Africa, a severe drought, and a prolonged civil war hindered the country's development until the mid 1990s. The ruling Front for the Liberation of Mozambique (Frelimo) party formally abandoned Marxism in 1989, and a new constitution the following year provided for multiparty elections and a free market economy. A UN-negotiated peace agreement between Frelimo and rebel Mozambique National Resistance (Renamo) forces ended the fighting in 1992. In December 2004, Mozambique underwent a delicate transition as Joaquim CHISSANO stepped down after 18 years in office. His elected successor, Armando Emilio GUEBUZA, promised to continue the sound economic policies that have encouraged foreign investment. President GUEBUZA was reelected to a second term in October 2009. However, the elections were flawed by voter fraud, questionable disqualification of candidates, and Frelimo use of government resources during the campaign. As a result, Freedom House removed Mozambique from its list of electoral democracies.

ECONOMY

Economy—overview: At independence in 1975, Mozambique was one of the world's poorest countries. Socialist mismanagement and a brutal civil war from 1977-92 exacerbated the situation. In 1987, the government embarked on a series of macroeconomic reforms designed to stabilize the economy. These steps, combined with donor assistance and with political stability since the multi-party elections in 1994, have led to dramatic

improvements in the country's growth rate. Fiscal reforms, including the introduction of a value-added tax and reform of the customs service, have improved the government's revenue collection abilities. In spite of these gains, Mozambique remained dependent upon foreign assistance for 40% of its 2012 annual budget and over half the population remained below the poverty line. Subsistence agriculture continues to employ the vast majority of the country's work force and smallholder agricultural productivity and productivity growth is weak. A substantial trade imbalance persists although aluminum production from the Mozal smelter has significantly boosted export earnings in recent years. In 2012, The Mozambican government took over Portugal's last remaining share in the Cahora Bassa Hydroelectricity Company (HCB), a significant contributor to the Southern African Power Pool. The government has plans to expand the Cahora Bassa Dam and build additional dams to increase its electricity exports and fulfill the needs of its burgeoning domestic industries. Mozambique's once substantial foreign debt has been reduced through forgiveness and rescheduling under the IMF's Heavily Indebted Poor Countries (HIPC) and Enhanced HIPC initiatives, and is now at a manageable level. In July 2007, the US government's Millennium Challenge Corporation (MCC) signed a \$506.9 million Compact with Mozambique. Compact projects will end in September 2013 and are focusing on improving sanitation, roads, agriculture, and the business regulation environment in an effort to spur economic growth in the four northern provinces of the country. Citizens rioted in September 2010, after fuel, water, electricity, and bread price increases were announced. In an attempt to lessen the negative impact on people, the government implemented subsidies, decreased taxes and tariffs, and instituted other fiscal measures. Mozambique grew at an average annual rate of 6%-8% in the decade up to 2013, one of Africa's strongest performances. Mozambique's ability to attract large investment projects in natural resources is expected to fuel continued high growth in coming years. Revenues from these vast resources, including natural gas, coal, titanium and hydroelectric capacity, could overtake donor assistance within five years.
